Rationales

▼ 1.1 — C

Choice C is the best answer. The text describes how *Torchy Brown* depicted the experiences of a young Black woman experiencing America's Great Migration. It further states that Ormes continued to use comics throughout her career to humorously comment on important issues impacting Black Americans.

Choice A is incorrect. The text never mentions other Black women comic strip writers. Choice B is incorrect. The text never mentions any changes in the subjects Ormes addressed. Choice D is incorrect. The text never mentions the inspiration for characters in *Torchy Brown*.

▼ 1.2 — C

Choice C is the best answer because it best describes how the underlined sentence functions in the text as a whole. The text begins with a question: have penguins always been unable to fly? The underlined sentence then presents an answer that has been offered by researchers, indicating that Theresa Cole and her team believe that penguins were once able to fly but lost that ability long ago as they began living in the sea. The text then describes the research that led to that answer. Thus, the function of the underlined sentence is to provide an answer to the question in the previous sentence.

Choice A is incorrect because none of the terms used in the sentence that follows are defined in the underlined sentence; no definitions are given at all. Instead, the sentence presents Theresa Cole and her team's answer to the earlier question about penguins' ability to fly. Choice B is incorrect because there is no contradiction between the underlined sentence and the sentence that follows since both convey that at some point penguins underwent adaptations that limited their ability to fly and helped them swim and live in the sea. Instead of contradicting later information, the underlined sentence presents an answer to the earlier question about penguins' ability to fly. Choice D is incorrect because the question in the previous sentence is about penguins' ability to fly and the underlined

sentence presents Theresa Cole and her team's answer to that question based on their research into penguin flight, which is described in the rest of the text.

▼ 1.3 — C

Choice C is the best answer because it best describes how the underlined sentence functions in the text as a whole. The text presents information about a map drawn by Blackfoot chief Ac Ko Mok Ki in 1801. The underlined sentence states that the map "demonstrates a vast amount of topographic knowledge" and mentions that it features the "specific names of mountains and rivers" and includes the first-known sketch of the Missouri River's drainage network. These are all characteristics that indicate that the map was executed with remarkable skill. Thus, the underlined sentence identifies some reasons why the map is impressive.

Choice A is incorrect. Though the sentence after the underlined sentence in the text mentions that Ac Ko Mok Ki included information about other tribes on his map, the underlined sentence itself does not address this topic. Choice B is incorrect because nothing in the underlined sentence indicates how Ac Ko Mok Ki became interested in mapmaking, only that his mapmaking skills are impressive. Choice D is incorrect because though the underlined sentence describes several features of the map, it does not specifically describe how the map was used.

▼ 1.4 — B

Choice B is the best answer because it most accurately describes the main purpose of the text. The text describes how the narrator watches people working out at a gym through a window near a bus stop. The narrator says that "there ain't nothing funnier" than watching people try to work out on the stair climber machine. Thus, the main purpose of the text is to describe an activity that the narrator finds amusing.

Choice A is incorrect because the text isn't about the narrator beginning middle school. The text describes how the narrator finds people working out at a gym amusing and makes no mention of school life. Choice C is incorrect because the text doesn't mention any problems that the narrator currently has or has overcome. It just describes how the narrator finds watching people work out amusing. Choice D is incorrect because the narrator invents the made-up movie mentioned in the text. The text doesn't indicate that the narrator has seen a movie in a theater. The focus of the text is on the narrator watching people at the gym, not watching a movie.

▼ 1.5 — C

Choice C is the best answer because it best describes how the underlined sentence functions in the text as a whole. The first two sentences establish that birds of some species don't raise their own young; instead, they lay their eggs in the nests of birds of other species. The underlined sentence then states that female cuckoo birds engage in this behavior, having been observed specifically laying their eggs in other nests while the other birds are out finding food. According to the text, the cuckoo chicks are then raised by the other birds. Thus, the underlined sentence provides a particular detail about how female cuckoos carry out the behavior of laying eggs for other birds to raise.

Choice A is incorrect. Rather than mentioning a physical feature of female cuckoos, the underlined sentence introduces a specific behavior of female cuckoos: laying eggs in the nests of birds of other species when the other birds are away. The only reference to physical features is the last sentence's general mention of cuckoo chicks looking different from chicks of other species. Choice B is incorrect because the underlined sentence refers to the nests of birds other than cuckoos and doesn't describe how any nests look, cuckoo or otherwise. Instead, the sentence addresses how female cuckoos use other birds' nests. Choice D is incorrect because the underlined sentence describes only female cuckoo behavior (laying eggs in the nests of birds of other species when the other birds are away); it's the last sentence of the text that addresses the other birds' reaction, indicating that those birds usually raise the cuckoo chicks once they've hatched.

▼ 1.6 — B

Choice B is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The first two sentences introduce two competing views on the origins of turtles. Genetic studies place them closer to the group that includes crocodiles, while fossil studies indicate that they're more closely related to other groups, including one that contains snakes. The next sentence, which is underlined, presents a limitation with many of the studies of fossils: their reliance on "incomplete data sets." The last sentence summarizes a fossil study that used more complete data ("more than 1,000 reptile fossils"), which supported the genetics studies' conclusions about turtles. Thus, the underlined sentence mainly functions to describe a limitation of some studies about the origin of turtles.

Choice A is incorrect because the underlined sentence doesn't address the topic of the tools used by scientists to examine fossils. Instead, the sentence introduces a shortcoming of

many fossil studies conducted on turtle origins. Choice C is incorrect because neither the underlined portion nor the text as a whole discusses the evolution of crocodiles. Modern crocodiles are mentioned earlier in the text because, according to genetic studies, they are a part of the group that turtles may be closely related to. Choice D is incorrect. The underlined sentence is raising an issue with fossil studies, not genetic studies, saying that fossil studies have at times relied on incomplete data. Furthermore, the sentence doesn't reference any widely held beliefs. Earlier in the text, hypotheses are mentioned that are suggested by genetic studies and fossil studies, but the underlined sentence is just introducing a limitation of some fossil studies.

▼ 1.7 — A

Choice A is the best answer because it most accurately describes the overall structure of the text. The text first presents what researchers found from studying Matabele ants: the ants can tell when colony members have infected wounds and can largely successfully treat those infections with their antimicrobial secretions. The text then indicates that the findings about the ants could help with the future development of antibiotics for humans. Thus, the text summarizes research findings and then identifies an area for further research.

Choice B is incorrect. Although the text introduces a study about Matabele ants, it never discusses how the researchers did their work or any methods they used to produce their findings. Choice C is incorrect. Although the text does describe properties of Matabele ants —their ability to detect and largely successfully treat infected wounds in colony members—it never addresses evolution or how these properties might have changed. Choice D is incorrect because the text doesn't present anything about Matabele ants as an issue or problem to be solved. Instead, it discusses beneficial abilities the ants have (detecting and treating infected wounds) and suggests that understanding those abilities might be useful for human medicine.

▼ 1.8 — C

Choice C is the best answer. The first three sentences describe the general situation: these early films have been lost, and we only know about them from small pieces of evidence. The rest of the text offers specific examples of the small pieces of evidence.

Choice A is incorrect. This isn't the overall structure. The fact that we only know about these lost early films from small pieces of evidence isn't presented as a "complex problem"—that's too extreme. And the examples presented are not "unsuccessful attempts" to solve it. If anything, the examples represent a success, because we discovered that these films

existed in the first place. Choice B is incorrect. This isn't the overall structure. There's no "debate" presented in the text, so there's no "side" for the text to support. Choice D is incorrect. This isn't the overall structure. The text doesn't discuss any "differences" between the filmmakers.

▼ 1.9 — A

Choice A is the best answer. The author describes Coketown as having streets that are all very similar and residents who live similarly and do the same work. This repetition of similarities emphasizes how everything in Coketown is alike.

Choice B is incorrect. While the text mentions that all the residents "do the same work," it never explains what that work is or why everyone does it. Besides, the idea that they all do the same work is just one of several similarities among the townspeople described in the text. Choice C is incorrect. While the last sentence states that "every day was the same as yesterday and tomorrow, and every year the counterpart of the last and the next," it never suggests that people actually "lose track of time." This is also too narrow to be the main idea, since time is just one of many aspects of Coketown that the text describes as always being the same. Choice D is incorrect. The text never mentions whether life is simple in Coketown, and the town sounds as though it's probably a pretty dull place to live, rather than a pleasant one.

▼ 1.10 — D

Choice D is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The text begins by pointing out one of the advantages of oral histories: that they allow researchers to document the daily experiences of people. The text then goes on to describe how Karida Brown utilized interviews with coal miners and their families for her book about twentieth-century coal mining in Kentucky. The underlined sentence affirms that the general advantages of oral histories mentioned earlier in the text were also benefits in Brown's particular case. Thus, the underlined sentence describes how Karida Brown benefited from incorporating oral history in her book.

Choice A is incorrect because though the text mentions coal miners who live in Kentucky, the underlined sentence does not offer a geographical fact about Kentucky. Choice B is incorrect because the underlined sentence does not mention United States politics or that Brown is an expert in this particular area. Choice C is incorrect. Although the text mentions that Brown's book revolved around coal miners during the twentieth century, the underlined sentence does not focus on a major historical event during this time.

▼ 1.11 — D

Choice D is the best answer because it accurately states the text's main purpose. The poem begins with the speaker urging a child to "go forth" with her encouragement ("my heart's desire"). The speaker goes on to suggest that new experiences ("Great reaches, yet unknown") lie ahead for the son that "life is calling" him to seek out. Thus, the main purpose is to encourage a child to embrace the experiences available to him in his life.

Choice A is incorrect because the speaker encourages the child to pursue new experiences ("Great reaches") without knowing exactly what those experiences will be ("yet unknown") or suggesting that they should match the speaker's own accomplishments. Choice B is incorrect because the speaker focuses on positive possibilities for her son ("Great reaches, yet unknown") and her enthusiastic encouragement to embrace those possibilities ("life is calling you!"), while there is no mention of raising a child or associated struggles. Choice C is incorrect because the speaker frames the possibilities for her son in a positive light when she says that "great reaches, yet unknown" are waiting for him, and this positive outlook for the son is consistent throughout the text.

▼ 1.12 — B

Choice B is the best answer because it most effectively states the main purpose of the text, which is to establish the narrator's feelings about the piano. In the text, the narrator reveals that she "had to act really happy" about the piano even though she "pretty much hated the thing" as soon as it was placed upstairs near her bedroom. The narrator also describes the piano as glaring at her and compares it to a caged bird that wants to be set free. These details establish the narrator's feelings about the piano, suggesting that she dislikes it.

Choice A is incorrect because the text doesn't state that the narrator wanted a piano near her bedroom. In fact, she "hated the thing" from the start and felt that it glared at her. These details express dislike, not desire. Choice C is incorrect because the text doesn't state that the narrator's brothers are talented piano players. The only information provided in the text about the narrator's brothers is that they were also given the piano. Choice D is incorrect because the text states only that the narrator's parents bought the piano for the children from people who were moving. The text doesn't give any information about what made the parents decide to buy a piano in the first place.

▼ 1.13 — A

Choice A is the best answer because it most effectively describes the overall structure of the text. The first sentence introduces Hiroshi Senju as an artist famous for his paintings of waterfalls. The rest of the text describes defining features of these "instantly recognizable" paintings: they are large, show only part of a waterfall, and draw from art movements in the US and from techniques and materials traditionally used in Japan. Thus, the text introduces Senju and then explains some common characteristics of his well-known paintings.

Choice B is incorrect because the text doesn't focus on a specific painting technique or name multiple artists. Instead, it focuses on describing some characteristics of works by one artist (Senju). Choice C is incorrect because the text doesn't describe any single famous painting or make a comparison between paintings. Instead, it describes features that are shared by multiple paintings by Senju. Choice D is incorrect. The text doesn't provide an opinion on Senju; it simply relates facts about him and his work. Moreover, instead of suggesting Senju's work has been largely overlooked, the text indicates that Senju is "known worldwide for his paintings."

▼ 1.14 — D

Choice D is the best answer. The text describes how a new discovery expands our understanding of Denisovans. The underlined portion describes what we used to believe about Denisovans, which helps the reader understand the significance of the discovery of the molar: it suggests that they lived in more places than we'd previously thought.

Choice A is incorrect. The underlined portion doesn't do this. Instead, it explains what we used to believe about Denisovans before the discovery—it doesn't dismiss the new discovery as false. Choice B is incorrect. The underlined portion doesn't do this. No term is defined here. Choice C is incorrect. The underlined portion doesn't do this. The text never tells us what the "goal" of the research was, just what its discovery was.

▼ 1.15 — B

Choice B is the best answer because it accurately describes the function of the underlined phrase in the text as a whole. According to the text, advertisers were reluctant to support television in its early days. The underlined phrase then indicates that this reluctance was partly due to the US's involvement in World War II, which hindered television production. Thus, the underlined phrase identifies a specific reason behind some advertisers' hesitance to support television.

Choice A is incorrect. The text merely mentions that television was expected to be financed through advertising, as radio was at the time. Nothing in the text compares the origins of radio and television. Choice C is incorrect. The underlined phrase focuses on a reason advertisers were reluctant to support television, not measures taken to convince advertisers to support television. Choice D is incorrect. The underlined phrase focuses on a reason advertisers were reluctant to support television, not what types of television programming were popular.

▼ 1.16 — B

Choice B is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The text establishes that Jam hears Bitter's studio door open early in the morning, when it is still dark. Jam then listens to her mother's footsteps, which seem to create a song that runs through the floorboards. The text indicates that the sound of Bitter's footsteps convey to Jam that Bitter is done painting. The underlined sentence then builds on this idea, stating explicitly that Bitter's feet sing the news of her completion of a painting. Thus, the sentence stating that "Bitter's feet were singing the news" further emphasizes that Bitter's footsteps themselves reveal information to Jam.

Choice A is incorrect because the text provides no evidence that Jam prefers music to art. While the underlined sentence uses musical imagery to describe the vibrations Jam feels, this is figurative language that is describing the footsteps' vibrations; it isn't an indication of Jam's personal interests. Choice C is incorrect because the text doesn't suggest that Bitter herself sings while working on paintings. The references to singing in the text are figurative descriptions of how Bitter's footsteps sound or feel to Jam, not literal statements about Bitter singing. Choice D is incorrect because the underlined sentence only describes Jam's perception of her mother's footsteps. It doesn't provide any details about Aloe or his reaction to the painting; in fact, the text doesn't mention Aloe seeing the painting at all.

▼ 1.17 — C

Choice C is the best answer because it presents the best description of the overall structure of the text. The text begins by stating that companies are increasingly giving consumers opportunities to customize products, allowing them to make design choices when buying certain sneakers, jewelry, and clothing. The text then indicates that although this trend benefits companies because they can successfully charge buyers more for customized products and don't have to rush production, it also poses a challenge because producing

unique items may require different and more expensive methods than the ones typically used for mass production, raising the companies' costs. Thus, the text first introduces a trend in consumer products and then explains how the trend both benefits and poses a challenge to companies.

Choice A is incorrect because the text doesn't present the customization of various products as a recent innovation—the fact that there are "more opportunities" now indicates that there were opportunities before—and no other innovations, in product manufacturing or otherwise, are discussed. Choice B is incorrect because the text doesn't discuss any particular company or example and instead speaks broadly about the trend of companies providing customizable products. Choice D is incorrect. Although the text discusses companies offering something that consumers like and are willing to pay more for—the ability to customize products—it doesn't characterize this as a product-marketing technique and doesn't compare it to any other kind of offering or technique.

▼ 1.18 — C

Choice C is the best answer because it most accurately describes the function of the underlined lines in the text as a whole. In the opening line of the text, the speaker describes wandering in "alien lands," which establishes that the speaker is traveling in unfamiliar territory. In the underlined lines, the speaker describes "billows" (large waves) rolling in the soul, which suggests that the speaker feels inner turmoil. The underlined lines go on to associate these rolling billows with voices calling to the speaker from the speaker's "native strands," or homeland, indicating that thoughts of home are prompting the emotional experience these lines describe. Taken together, the imagery in the underlined lines thus implies that the speaker feels a deep emotional connection to, or pull toward, home while traveling in an unfamiliar place.

Choice A is incorrect. While the text's first line states that the speaker is traveling and the underlined lines indicate that the speaker experiences an emotional pull toward home, neither the underlined lines nor the text as a whole establishes an enthusiasm about the current travels that conflicts with a growing urge to return home. The text's description of the lands the speaker is traveling in focuses on their artificial quality, stating, "Nature her prerogative resigns / To Man," which doesn't suggest enthusiasm but rather a sense of detachment or even critique. Choice B is incorrect because the underlined lines don't address uncertainty about maintaining links with relatives in distant places. In the underlined lines, the speaker expresses a sense of connection to the speaker's homeland ("native strands") but doesn't refer to any family members the speaker may have there or to

concerns about maintaining any familial ties. Choice D is incorrect because the poem doesn't indicate that the speaker has returned home after an absence. Rather, the speaker explicitly states, "I wander among the hills of alien lands," establishing that the current setting is a foreign place. Moreover, the underlined lines express a sense of connection with, or pull toward, a distant homeland, not a sense of longing for how that homeland or any other location once felt.

▼ 1.19 — B

Choice B is the best answer. The text begins by describing how the researchers used the JWST to detect CO_2 in WASP-39b's atmosphere. Then the text discusses the significance of this finding, both as the first evidence of CO_2 in an exoplanet's atmosphere and as an illustration of the JWST's potential for making new discoveries in general.

Choice A is incorrect. The text doesn't compare two different methods, but rather focuses on one study that used the JWST. Choice C is incorrect. The text doesn't present a hypothesis, but rather reports on the findings of a study. Choice D is incorrect. The text doesn't mention any scientists challenging the conclusion reached by López-Morales and colleagues.

▼ 1.20 — A

Choice A is the best answer because it most accurately states the main purpose of the text. After providing a brief introduction to computer scientist Luis von Ahn, the text focuses on discussing how von Ahn's digitization work led to the invention of a digital security test known as reCAPTCHA.

Choice B is incorrect because the text doesn't address how digital scanners work. Choice C is incorrect. Although the text mentions von Ahn's book-digitizing project, that information is provided as a detail, not as the main purpose of the text. Choice D is incorrect because the text doesn't provide any indication of reCAPTCHA's popularity; instead, it describes reCAPTCHA's origin.

▼ 1.21 — B

Choice B is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The underlined portion is a parenthetical phrase directly following the word "microfilm," and it describes film containing small ("scaled-down") images; the placement and focus of the portion indicate that it is serving to define the term "microfilm."

Choice A is incorrect. Although the text is about accessing the writings of a famous historical figure (Douglass), the underlined portion doesn't give information about Douglass or any other person. Instead, it explains what microfilms are. Choice C is incorrect because the text never describes any kind of debate or disagreement; it simply describes a change in how researchers can access historical documents, with the underlined portion defining an important term. Choice D is incorrect because the text never makes any mention of a particular finding, unexpected or otherwise; it simply describes a change in how researchers do some of their work, with the underlined portion defining an important term.

▼ 1.22 — B

Choice B is the best answer because it most accurately describes the overall structure of the text. The text begins by stating that the gray wolf was eradicated from Yellowstone National Park in 1926. It then explains the consequences of this elimination—namely that the elk population grew too large and overgrazing occurred, negatively affecting other animals in the area. The text then states that once scientists realized the importance of the gray wolf to the Yellowstone food chain, they undertook efforts leading to the wolves' reintroduction to the park in 1996. Thus, the structure of the text can be accurately described as mentioning the elimination of the gray wolf from Yellowstone and then explaining why the wolf was later restored to the park.

Choice A is incorrect. While the text does summarize a problem associated with an event in the 1920s (the eradication of gray wolves from Yellowstone in 1926), the problems discussed arose after that event—namely, the subsequent elk overpopulation, resultant overgrazing, and then further impacts to other animals in Yellowstone. Furthermore, the text doesn't present multiple potential solutions. Instead, it describes one solution that was actually implemented: the reintroduction of gray wolves in 1996. Choice C is incorrect because the text doesn't make a claim about the health of the gray wolf population apart from pointing out that the wolves had been eradicated from, and then subsequently restored to, Yellowstone. Instead, the text focuses on outcomes associated with the gray wolf's eradication and reintroduction. Choice D is incorrect. Though the text does mention that the ecosystem of Yellowstone rebounded after the gray wolf was reintroduced in 1996, the text never explains why the park allowed the wolves to be eradicated in 1926. It simply states that this eradication occurred without elaborating on the decision-making process behind it.

▼ 1.23 — D

Choice D is the best answer because it best describes the overall structure of the text. The text begins by posing a question about two different cat species: "Why do sand cats purr but lions roar?" The remainder of the text then presents a possible answer to this question by explaining a hypothesis about differences in these cats' hyoid bone structure. The text details how sand cats have rigid hyoids that produce purring sounds when their larynx vibrates, while lions have more flexible hyoids attached to the skull with a stretchy ligament that enables roaring but may prevent purring.

Choice A is incorrect because the text doesn't present facts that weaken the theory about two cat species; rather, it asks a question about two species and then discusses a potential answer. Choice B is incorrect because the text doesn't discuss the habitats of sand cats and lions at all, nor does it mention any changes to their habitats. Choice C is incorrect because the text doesn't describe a behavior shared by the two cat species mentioned. On the contrary, it specifically focuses on the different vocalization behaviors of each species (purring versus roaring) and why those differences may exist.

▼ 1.24 — A

Choice A is the best answer because it best describes how the underlined sentence functions in the text as a whole. According to the text, it was hard for Yamauchi to adapt her short story into the play *And the Soul Shall Dance* because the story had included little dialogue, instead describing the characters' silent thoughts. The underlined sentence offers information about how Yamauchi ultimately succeeded in adapting the story into a play: it explains that Yamauchi created situations where the characters of the play could reveal their internal thoughts while speaking with each other.

Choice B is incorrect because neither the underlined sentence nor the text as a whole makes any mention of playwrights other than Yamauchi or how the play might have influenced them. Choice C is incorrect because the text states that Yamauchi is best known for her play *And the Soul Shall Dance*, which conveys that the play is better known than the short story it's based on is. Choice D is incorrect because neither the underlined sentence nor the text as a whole mentions the actors who performed in the play or Yamauchi's approach to choosing them.

▼ 1.25 — A

Choice A is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. In the text, the narrator makes observations about her young niece, Dot, noting that Dot is making progress toward outgrowing babyhood and is

growing stronger "day by day." The description of Dot purposefully exercising by "bouncing for hours" reinforces the narrator's earlier characterization of Dot. The underlined sentence thus offers a detail that shows how Dot is growing stronger.

Choice B is incorrect. While a sentence earlier in the text mentions Celestine's psychological state (sadness because Dot is growing fast), the underlined sentence doesn't focus on Celestine at all. Instead, the sentence focuses on Dot's physical activities to show that she is getting stronger. Choice C is incorrect because the underlined sentence describes Dot's behavior, not the narrator's psychological characteristics. While a sentence earlier in the text establishes that the narrator, like Dot, was "impatient with babyhood," the underlined sentence specifically addresses Dot's physical activities in her stroller. Choice D is incorrect. While an earlier sentence in the text mentions that Celestine is sad, the underlined sentence doesn't focus on how Celestine feels nor does it describe a behavior that Celestine engages in. The sentence focuses entirely on Dot's actions, describing her as "bouncing for hours" to show that she is growing stronger.

▼ 1.26 — D

Choice D is the best answer because it most accurately describes the overall structure of the text. The text begins by mentioning Catherine L. Cardelús, "a researcher who studies canopy soil." The text then provides information about her chosen research topic: the formation of canopy soil in tree branches, the role of canopy soil in preserving a healthy water cycle in rainforests, and Cardelús's specific interest in "the canopy soils in large choibá trees in rainforests in Costa Rica." Thus, the text introduces a researcher and then gives information about what she researches.

Choice A is incorrect because the text doesn't mention any disagreement between researchers, nor does it describe how such a disagreement was resolved. Choice B is incorrect because the text doesn't present an idea that Cardelús disagrees with; rather, it describes her research interests and the significance of canopy soil. Choice C is incorrect because the text doesn't compare the sizes of different types of trees over time. While the text mentions "large choibá trees," it doesn't compare them to any other tree type or discuss changes in tree size over several years.

▼ 1.27 — D

Choice D is the best answer because it most accurately states the main purpose of the text. The text first states that animals make use of objects as tools to help them achieve different goals. The text then explains that although people used to think only primates use tools, tool

use by dolphins (aquatic mammals) and palm cockatoos (birds) has shown that primates are not the only animals that use tools. Thus, the main purpose of the text is to argue that a variety of animals, not just primates, use tools.

Choice A is incorrect because the text doesn't mention intelligence at all, focusing just on the idea that animals use tools. Further, the text mentions one kind of bird (palm cockatoos) only as an example of a non-primate that uses tools and describes its use of tools as creative, not unintelligent. Choice B is incorrect. Although the text mentions tool use in primates (a group that includes humans) and in palm cockatoos, it doesn't compare humans' tool use with palm cockatoos' tool use. The text mentions palm cockatoos only as one example out of the variety of animals that use tools and never directly mentions tool use in humans. Choice C is incorrect because the text discusses tool use but never makes any mention of intelligence. Rather than establishing that tool use doesn't indicate intelligence, the text describes certain tool use as inventive and creative.

▼ 1.28 — A

Choice A is the best answer. The author first describes a Portland law aimed at reducing demolition waste, and then goes on to explain that 27% of materials from building deconstructions were able to be reused and the rest were recycled.

Choice B is incorrect. The text never discusses the popularity of the law. Choice C is incorrect. The text never compares building deconstruction to other measures designed to reduce demolition waste. Choice D is incorrect. The text never mentions laws in cities other than Portland, Oregon.

▼ 1.29 — B

Choice B is the best answer because it most accurately describes the main purpose of the text, which is to explain the basics of how a specific energy technology works. The text introduces Raccoon Mountain as a pumped-storage hydropower facility built in the 1970s and then explains how it operates: during periods of low demand, excess power pumps water up to a lake at the mountain's summit, and when demand for energy peaks, the water flows back down, spinning turbines along the way to generate electricity. The text provides some additional details, like the name of the water source, but the overall focus is on explaining the basics of how pumped-storage hydropower works.

Choice A is incorrect because the text focuses on one method of energy generation—pumped-water hydropower—and briefly mentions another type of energy generation (nuclear

plants) only to identify it as a source of power for the pumping process. The text never makes any comparison between the two methods. Choice C is incorrect because the text simply gives a factual description of how Raccoon Mountain, a pumped-storage hydropower facility, operates; it never suggests that more energy storage facilities should be built, whether by regional utilities or by any other entity. Choice D is incorrect because the text doesn't present pumped-storage hydropower as a new technology; it indicates that Raccoon Mountain was built in the 1970s, meaning that, rather than being new, this facility is approximately 50 years old.

▼ 1.30 — A

Choice A is the best answer. The text repeatedly claims that true self-knowledge can't possibly be achieved, and this rhetorical question emphasizes that point.

Choice B is incorrect. The underlined question doesn't do this. The text never expresses doubts about the value of self-knowledge—rather, the text expresses doubts about the possibility of achieving self-knowledge. Choice C is incorrect. The underlined question doesn't do this. The text doesn't provide directions for how to achieve self-knowledge—rather, it claims that true self-knowledge is impossible to achieve. Choice D is incorrect. The underlined question doesn't do this. The text doesn't ever define self-knowledge, and popularity isn't mentioned in the text at all.

▼ 1.31 — A

Choice A is the best answer because it most accurately describes the function of the underlined portion in the text. The underlined portion ("which made me sad because that was the only thing Mago had envied me for") directly expresses Grande's unhappiness about her sister's diminished interest in her Barbie doll. The underlined text specifically identifies that Grande feels sad and explains why Mago's disinterest particularly affects her—because it was the one rare instance where her older sister had envied her, rather than the reverse.

Choice B is incorrect because the underlined portion expresses sadness, not anger. Although there is some correspondence between the emotions anger and envy and the text does indicate that Grande usually envies her sister, the underlined portion states that Grande feels sad about Mago's disinterest in Grande's Barbie, not angry about Mago's refusal to spend time with her. Choice C is incorrect. While the first part of the sentence that contains the underlined portion indicates that Mago has previously taken an interest in Grande's Barbie, implying that the sisters may regularly have played with the Barbie together in the past, the underlined portion doesn't provide an example of this. The underlined portion

instead explains why Mago's recently developed disinterest in the Barbie saddens Grande. Choice D is incorrect because neither the underlined portion nor the text as a whole explains why Mago is unwilling to play with Grande. Rather than addressing Mago's motivation or reasoning, the underlined portion describes Grande's emotional reaction to Mago's disinterest in Grande's Barbie and explains why this lack of interest matters to Grande.

▼ 1.32 — A

Choice A is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The first sentence of the text establishes that scientists didn't know much about the ocean floor in the 1950s. The second sentence, which is underlined, describes what many scientists thought at the time—that the ocean floor was mostly flat. The remainder of the text establishes that the ocean floor is far from flat, citing research conducted by Marie Tharp and Bruce Heezen. Thus, the purpose of the underlined sentence is to identify a scientific belief that Tharp and Heezen showed to be wrong.

Choice B is incorrect. Although Tharp and Heezen's work with sonar data in the Atlantic Ocean is mentioned later in the text, the underlined sentence doesn't describe the design of their experiment. Instead, it identifies a belief held by scientists that Tharp and Heezen demonstrated to be wrong. Choice C is incorrect because the underlined sentence presents a belief held by many scientists in the 1950s; nowhere does the text mention a disagreement between Tharp and Heezen, whom the text describes as research partners working together to map the ocean floor. Choice D is incorrect because the underlined sentence doesn't present data in support of a claim; instead, it presents a scientific belief that Tharp and Heezen's work showed to be wrong.

▼ 1.33 — B

Choice B is the best answer because it best describes the main purpose of the text. The text indicates where and when jazz tap first developed (in African American communities in the 1920s) and what influenced it (the quick rhythms and improvisations in jazz music) and then explains that it evolved alongside jazz music in the 1930s and 1940s, resulting in a very different form of tap dance than had existed before. Therefore, the main purpose of the text is to discuss jazz tap's development.

Choice A is incorrect. Although the text indicates that jazz music became widely popular in the US in the 1920s and describes some of jazz music's qualities, the text never explains why audiences prefer some kinds of music—jazz or otherwise—over others. Choice C is

incorrect because the text never mentions any musical instruments and doesn't describe how to play one. Choice D is incorrect because the text discusses jazz tap generally and never identifies a particular dancer, famous or otherwise.

▼ 1.34 — C

Choice C is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The first sentence of the text states that Shakti knows the woods she is walking in well. The next sentence, which is underlined, emphasizes Shakti's familiarity with, and sense of security within, the woods by describing how the tree branches are friendly and "welcoming," as they are depicted as extending open arms to her. The remainder of the text also shows that Shakti is comfortable and content in the woods by describing her as "an old friend" of the trees. Thus, the function of the underlined portion is to emphasize Shakti's sense of belonging in the wooded landscape that she visits.

Choice A is incorrect because the text and underlined portion suggest that Shakti is comfortable, not uncomfortable, in her surroundings: the trees around her are described as welcoming and reassuring. Moreover, the underlined portion discusses Shakti's feelings in the forest, not the river, since she hasn't reached the river yet. Choice B is incorrect because the text and underlined portion emphasize Shakti's familiarity with the woods. The trees are inviting, and she feels like "an old friend" to the woods, so she isn't lost or confused there. Choice D is incorrect because the third sentence uses the phrase "as an old friend" figuratively in reference to Shakti's sense of familiarity with the landscape, not in reference to her long-standing friendships with other people, and the text and underlined portion never discuss her feelings about such friendships.

▼ 1.35 — B

Choice B is the best answer because it best states the main purpose of the text. The text begins by briefly stating that San Francisco is known for its murals, then transitions to a discussion of a single collection of murals, which is found on Balmy Alley in the city's Mission District. The text explains that the murals in this area were originally created in the 1970s, then observes that they have changed over time: as some have faded through the decades, others have been painted in their place. The text ends by emphasizing that these murals are significant because they reflect San Francisco's artistic spirit and cultural life. Therefore, the text provides an overview of the history and importance of the Balmy Alley murals.

Choice A is incorrect. Although it can be inferred from the text that there are murals in other areas of San Francisco besides Balmy Alley, the text doesn't specifically discuss murals in other areas or compare the murals of Balmy Alley to those in other areas. Choice C is incorrect. By observing that some of the murals of Balmy Alley have been replaced due to fading, the text implies that murals can decay, but it never urges readers to protect this specific collection of murals—or any murals elsewhere in San Francisco, for that matter. Indeed, by describing the ever-changing murals of Balmy Alley as "a living showcase of San Francisco's artistic spirit," the text emphasizes the positive aspects of the fact that the original Balmy Alley murals have faded and been replaced with new murals. Choice D is incorrect because the text doesn't describe the rise of mural painting in San Francisco generally or note when this occurred. The only historical development of the 1970s mentioned in the text is the origin of the murals in a specific area of the city: Balmy Alley in the Mission District.

▼ 1.36 — C

Choice C is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The underlined sentence establishes a difference between Uncle Katsuhisa and the narrator's father by describing Uncle Katsuhisa as "loud" and the narrator's father as "quiet." The text then elaborates on that contrast, describing some ways Uncle Katsuhisa is very noisy even when he isn't speaking.

Choice A is incorrect because the text doesn't indicate what kinds of topics Uncle Katsuhisa enjoys discussing, only that he is loud even when he isn't speaking. Choice B is incorrect because the text never indicates how Uncle Katsuhisa feels about meeting new people, only how loud he is. Choice D is incorrect because the text never describes a conversation occurring between any people; it refers to talking only when stating that Uncle Katsuhisa is loud even when he isn't speaking.

▼ 1.37 — A

Choice A is the best answer because it most accurately describes how the underlined phrase functions in the text as a whole. The text states that the wax produced by Liu and colleagues' reactor can be turned into a surfactant. The underlined phrase, which is set off with parentheses, then provides a definition for the term "surfactant," explaining that it's a chemical compound that can be used as a detergent. Thus, the underlined portion of the text functions to clarify the meaning of a scientific term.

Choice B is incorrect. Though the text as a whole focuses broadly on an environmental concern, the underlined phrase does not; it simply indicates what a surfactant is. Choice C is incorrect. Though the text as a whole focuses on a scientific discovery (Liu and colleagues' solution to the problem of plastic recycling), the underlined phrase does not explain its significance; it simply defines a scientific term used in the discussion. Choice D is incorrect. Though the text as a whole includes discussion of the result found by Liu and colleagues, the underlined phrase does not discuss it; it simply defines a scientific term used in the discussion. Additionally, at no point in the text is it mentioned that the team was confused.

▼ 1.38 — D

Choice D is the best answer because it most accurately describes the main purpose of the text. In the first sentence of the text, the narrator states that she thinks there's a chance she will become part of the basketball team at her college. She goes on to explain that she is "quick" and "tough." Based on these characteristics, she thinks she has a chance to join the team. Thus, the main purpose of the text is to explain why the narrator thinks she might make the basketball team.

Choice A is incorrect because the text focuses solely on basketball and doesn't mention any other kinds of sports. Choice B is incorrect because the text doesn't describe aspects of the game of basketball. Instead, it provides the narrator's reasoning for thinking that she might make her school basketball team. Choice C is incorrect. Although the narrator explains why she thinks she will be chosen for the basketball team at her school, the text doesn't go into the general decision-making process or the requirements for being picked for the team.

▼ 1.39 — D

Choice D is the best answer because it most accurately describes the overall purpose of the text. The text indicates that "for as long as he could remember," Max had "begged" his father to take him to La Reina. This point is later emphasized in the text by indicating that "this summer" his father might "finally take" Max to visit La Reina. Thus, the purpose of the text as a whole is to show how much Max wants to visit La Reina.

Choice A is incorrect. The text does not discuss Papa's feelings toward Max. Rather, it mentions that Max has long wanted Papa to take him to La Reina and that, unlike Max and some other children, Papa does not believe that La Reina is haunted. Choice B is incorrect. The text mentions that Max is "almost twelve" at the time, which suggests anticipation of growing up rather than refusal to. Choice C is incorrect. The text indicates that Max hopes to visit La Reina during the current summer, but nothing suggests that Max dislikes summer.

▼ 1.40 — C

Choice C is the best answer because it most accurately describes the main purpose of the text. The text states that archaeologists recently discovered a well-preserved food shop, or *thermopolium*, in Pompeii, Italy. The text then further describes the contents of the discovery and provides an example of what was found. Thus, the overall purpose of the text is to present a recent archaeological discovery.

Choice A is incorrect. Although the text states that archaeologists found ancient artworks, it doesn't compare these artworks to modern ones or to any other artworks. Choice B is incorrect. Although the archaeological discovery discussed in the text was made in Italy, the text doesn't provide any information about politics or government in Italy. Choice D is incorrect because the text doesn't discuss the climate where the archaeological discovery was made or in any other region.

▼ 1.41 — D

Choice D is the best answer because it most accurately describes the main purpose of the text, which is to explain different ways in which Julius was helpful. The text begins with the narrator stating that Julius was very helpful to him and his wife when they moved to their new residence. The narrator then provides a list of examples to illustrate Julius's helpfulness. For instance, the narrator states that Julius was familiar with the neighborhood's roads, which suggests that he was helpful in navigating them, and that Julius helped manage the horses and dogs. The text's many examples of Julius's usefulness reinforce just how helpful he was and in how many different ways.

Choice A is incorrect because the text doesn't portray either the narrator's or his wife's reaction to their new home. Rather, the text focuses on how Julius was useful to the narrator and his wife in their new home. Choice B is incorrect. Although the text states that Julius was knowledgeable about the soil, this is one of several supporting details that illustrate how helpful Julius was. Moreover, the text merely states that Julius was knowledgeable about soil; it doesn't provide an example of that knowledge. Choice C is incorrect because there's nothing in the text to suggest the frequency with which the narrator and Julius hunted and fished together. In fact, it's unclear from the text whether the narrator and Julius hunted and fished together at all. The text merely indicates that Julius knew the best places to hunt and fish—a detail that supports the text's main purpose by conveying Julius's usefulness.

▼ 1.42 — B

Choice B is the best answer because it most accurately states the main purpose of the text. The text begins by noting that little is known about juvenile sea turtles during their oceanic stage, establishing this as an understudied area. The text then describes a study in which researchers tagged and released six juvenile green sea turtles and reports the findings: most turtles drifted passively with currents, while two swam against them. Therefore, the main purpose of the text is to summarize research on an understudied stage of sea turtle development.

Choice A is incorrect because although the text mentions that understanding migratory patterns is important for conservation, it does not describe any conservation efforts, successful or otherwise; instead, the text summarizes research findings about a stage of sea turtle development. Choice C is incorrect. Although the text notes that adult sea turtles are well studied while juveniles are not, it does not compare the migratory behavior of adults and juveniles; instead, the text focuses solely on findings about juvenile turtles. Choice D is incorrect. Although the text briefly mentions that two turtles swam against currents and speculates that they may have done so in search of foraging grounds, this is a single detail within the text's broader summary of the study, not the main purpose of the text as a whole.

▼ 1.43 — A

Choice A is the best answer. The previous sentence broadly mentions "autobiographies written by the freedom seekers." This sentence identifies Loguen's autobiography as a specific example.

Choice B is incorrect. The sentence never explains why Loguen chose to write about his experiences. Choice C is incorrect. The previous sentence identifies autobiographies as useful sources of historical information about a specific topic, but not for "information about geography." The underlined sentence provides details of one autobiography as an example of a source of information about that specific topic (interactions between Indigenous people and Black freedom seekers). Choice D is incorrect. The text never discusses other specific people who helped freedom seekers, and therefore can't make a comparison between the Neshnabé and anyone else.

▼ 1.44 — D

Choice D is the best answer. The text defines horizontal gene transfer and then gives one possibility for how it happens in vertebrates (via infection by parasites). The underlined part describes how that mechanism could work.

Choice A is incorrect. The underlined portion doesn't do this. Parasites are only described as the mechanism that does the transferring, not the species that gives or receives the genes. Choice B is incorrect. The underlined portion doesn't do this. The text never discusses which genes are more likely to be transferred. Choice C is incorrect. The underlined portion doesn't do this. The text never discusses how horizontal gene transfer occurs among invertebrates.

▼ 1.45 — A

Choice A is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The first two sentences of the text establish that in California, houses were heated by building fires year-round. The underlined portion then indicates that the fires didn't merely provide physical warmth: they also represented being "home" and feeling protected. The underlined portion thus illustrates that a fire provides comfort beyond physical warmth.

Choice B is incorrect because the underlined portion doesn't summarize information that came before it. Whereas the previous two sentences describe fires' ability to provide physical warmth to homes, the underlined portion focuses on the psychological comfort the fires offered. Choice C is incorrect. Although the text's second sentence mentions that fires were built in the summer because fog came in, which may have cooled the house, this detail isn't the focus of the underlined portion. Instead, the underlined portion indicates that fires were built for reasons beyond physical warmth: to create a sense of being home and safe. Choice D is incorrect because the underlined portion focuses on the emotional significance the author places on having a fire going inside the home. There is no indication that the author feels equally comfortable without a fire present.

▼ 1.46 — A

Choice A is the best answer because it most accurately describes the main purpose of the text, which is to show how Polly reacted to some of Fanny's other friends. The text describes Polly as being frightened of Fanny's friends because they seemed "much older and wiser" to her and elaborates that they "talked about things of which" Polly was unfamiliar, uninterested, and shocked. Thus, the main purpose of the text is to describe Polly's impressions of Fanny's other friends.

Choice B is incorrect because the text does not provide any of the topics Polly discussed with Fanny's friends, stating only that Polly found the topics unfamiliar, uninteresting, and shocking. Choice C is incorrect because the text says nothing about how Fanny and her other

friends first met. Choice D is incorrect because the focus of the text is on Polly's feelings about Fanny's other friends, not on the other friends' feelings about Polly.

▼ 1.47 — A

Choice A is the best answer because it describes how the underlined portion of the sentence functions in the text as a whole. The text begins by discussing ordinary soap bubbles, objects that usually exist for less than a minute before popping due to either evaporation or gravity-induced drainage. The text then goes on to mention work by researchers Aymeric Roux and colleagues, who have discovered how to increase the longevity of bubbles by altering their chemical composition. Finally, the underlined portion of the text describes how this process works: since the bubble contains both water and glycerol, it can draw water molecules from the surrounding air to replace those lost to evaporation. Therefore, the underlined portion of the sentence describes the effects of a process devised by researchers that increases the longevity of an object described in the text.

Choice B is incorrect because the circumstance that prompted the research is discussed in the first sentence of the text, not the underlined portion. Choice C is incorrect because the underlined portion of the text does not address why soap bubbles must eventually rupture. Rather, it explains how the longevity of soap bubbles can be extended. Choice D is incorrect because the underlined portion of the text does not mention any future experiments.

▼ 1.48 — B

Choice B is the best answer because it most accurately describes the main purpose of the text, which is to showcase how Adam's flexibility and consideration strengthen his relationship with his great-uncle Richard. The text begins by stating that the meeting between the two characters is proceeding well and then describes Adam's thoughtful behavior: noticing his great-uncle's interest in the ship, Adam suggests staying on board overnight and expresses willingness to accommodate his great-uncle's schedule and destination preferences. The text goes on to describe the positive effect of Adam's thoughtfulness and flexibility, indicating that Adam's "affectionate willingness" to accommodate Richard's preferences "quite won the old man's heart." The text concludes by suggesting that Adam's ability to anticipate his great-uncle's wishes and willingness to accommodate them result in the rapid development of affection and intimacy between them, stating that they soon became "almost like old friends." Therefore, the text's main purpose is to demonstrate how Adam's flexibility and consideration strengthened his and his great-uncle's relationship.

Choice A is incorrect. Although the text explains Adam's reason for suggesting that Richard spend the night on the ship rather than finding lodging on land (which is that Adam perceives Richard's interest in the ship), this isn't the text's main purpose. Rather, Adam's suggestion about where to sleep for the night serves as an example of the consideration Adam shows toward Richard, and the text mentions it mainly to explain how an affectionate relationship developed so quickly between them. Moreover, the text only states that Adam encourages Richard to stay on the ship; it doesn't specify where Adam plans to spend the night. Choice C is incorrect because the text doesn't describe why Adam and his great-uncle Richard are excited about their journey. While the text mentions that Adam is willing to "start at any hour and go anywhere," it provides no details about any planned journey, its destination, or even whether they will be continuing by ship or some other mode of transportation, nor does the text mention anything about either character's feelings of excitement about their plans. We learn only that Adam is accommodating about potential travel plans, not that either character is particularly eager about the journey itself. The text's main focus is on Adam and Richard's developing relationship, not on any anticipated travel experiences. Choice D is incorrect because the text doesn't show a contrast between initial wariness and later affection. On the contrary, the text begins by stating that the meeting between Adam and his great-uncle Richard has begun in an "auspicious," or promising, manner and is "proceed[ing] well," suggesting that Richard's impression is positive from the outset. There's no indication of any initial suspicion, caution, or reserve on Richard's part that later changes to affection. Instead, the text describes a consistently positive interaction that deepens from a good first impression into a stronger, more familiar relationship because of Adam's considerate behavior.

▼ 1.49 — B

Choice B is the best answer because it most accurately states the main purpose of the text, which is to show that Henry's mother, Mrs. Higgins, wants Henry to leave her house. In the text, Mrs. Higgins complains that Henry offends all her friends and that they stop coming when he's also visiting. She then tells him directly, "you mustn't stay." The overall exchange conveys Mrs. Higgins's intention for Henry to leave so as not to drive away her friends with his behavior.

Choice A is incorrect because the text doesn't indicate what Henry's mother does when she's out with her friends. Instead, it focuses on what goes on when Henry and her friends visit her at the same time, indicating that since her friends find Henry's company disagreeable, she wishes him to leave before they arrive. Choice C is incorrect because the text doesn't contain an account of what Henry's home looks like. The setting is established

as the house of Henry's mother, and the dialogue focuses solely on her wish that Henry should depart before her friends arrive. Choice D is incorrect because the text doesn't mention how often Henry visits his mother nor does it provide any explanation for why he visits his mother. Instead, it indicates that she thinks her friends dislike Henry and that she therefore wants him to depart before they arrive.

▼ 1.50 — B

Choice B is the best answer because it most accurately describes the function of the underlined portion in the text as a whole. The first two sentences introduce the idea that soil and rocks can be moved from one location to another by something other than rivers and streams. The underlined sentence then states that the term used by scientists to refer to this process is "aeolian transport." The discussion that follows explains what aeolian transport is (the movement of small geological materials over potentially great distances by the wind) and describes an example of a study that found that dust particles had been moved by aeolian transport from Australia to Antarctica. Thus, the underlined portion introduces a scientific term that is used in the discussion that follows.

Choice A is incorrect because the underlined portion of the text doesn't present any remarks from Melisa Diaz, nor does it suggest that Diaz and her team encountered difficulties in their study. Instead, the phrase in quotation marks in the underlined portion simply presents a term that is used by scientists to refer to a specific process discussed in the text. Choice C is incorrect because nothing in either the underlined portion or the text as a whole suggests that the findings of the study presented in the text were surprising or unexpected. In fact, the text suggests that Diaz and her team wanted to see if aeolian transport could explain the appearance of certain geological materials in Antarctica, and their findings did indeed confirm the involvement of aeolian transport. Choice D is incorrect. Although the first sentence of the text mentions soil and rocks, which are two different kinds of geological material, the underlined portion doesn't refer to these materials, nor does it explain the difference between them. Rather, the underlined portion introduces the scientific term "aeolian transport," which is used in the discussion that follows.

▼ 1.51 — D

Choice D is the best answer. The text presents a brief history of the Nuyorican Poets Cafe, from how it got started in the '70s, to its expansion in the '80s, to its ongoing mission today.

Choice A is incorrect. This isn't the overall purpose. The text never mentions Algarín's motivations. Choice B is incorrect. This isn't the overall purpose. The text never discusses the cultural life of New York as a whole. Choice C is incorrect. This is too narrow. One sentence mentions that the Nuyorican Poets Cafe expanded its scope to include art and music, but this is only one point in the broader history of the Nuyorican Poets Cafe, which is the overall focus of the text.

▼ 1.52 — D

Choice D is the best answer because it most accurately describes the main purpose of the text, which is to explain a study's conclusion and how researchers involved in the study arrived at that conclusion. The text begins by summarizing the main conclusion of the study conducted by Paul Hanel and colleagues: when confronted with ideas they disagree with in discussions about controversial topics, people are more likely to respond politely if they think about their personal values before engaging in such discussions. The text then goes on to describe the design of Hanel and colleagues' experiment. By comparing interactions between members of an experimental group (who had been prompted to write about their personal values beforehand) to those between members of a control group (who had been prompted to write about a beverage), the team found that people in the experimental group behaved more civilly, or politely, than people in the control group did during discussions about a controversial topic. This finding led to the conclusion described at the beginning of the text.

Choice A is incorrect. Although the text discusses the results of a study, it doesn't provide any indication that the conclusion the study supported—that when facing disagreement, people behave more politely when they have thought about their values—is a belief that is widely held. Choice B is incorrect because the text doesn't indicate that the researchers found the results of their study to be surprising, or contrary to what they expected. In fact, there's no indication provided in the text about how the researchers felt about the study's results or that the results should be considered surprising. Choice C is incorrect. Although the text discusses the experimental design of a study, it doesn't suggest any improvements to that design; instead, it focuses on how the design enabled the researchers to draw a particular conclusion.

▼ 1.53 — A

Choice A is the best answer because it most accurately describes the main purpose of the text. The narrator describes how Joe responds to being in "the metropolis": he's excited and

“wild with enthusiasm.” He also envies the young fellows who walk by because, dressed as they are, they look as if they have somewhere special to go. The text contrasts this new place with the place Joe comes from, where apparently there wasn’t as much to do. Thus, the main purpose of the text is to illustrate Joe’s reaction to a new environment.

Choice B is incorrect because the text makes no reference to why Joe has moved. The narrator indicates that Joe is enthusiastic about being in a city, but there’s no explanation provided for the move. Choice C is incorrect because the text makes no reference to how Joe thinks about an event. The narrator describes young men passing by in the evening and then recalls places worth going to at home—church and a few people’s houses—but there’s no explicit comparison made nor is a time of day mentioned for these events back home. Choice D is incorrect because the text doesn’t support the idea that Joe feels regret over leaving home. Instead, Joe is described as “wild with enthusiasm” at being in the city. Joe’s home is mentioned, but only to compare it unfavorably with the city.

▼ 1.54 — B

Choice B is the best answer because it most accurately describes the main purpose of the text. The text begins by stating that there were many Spanish-language newspapers in cities across Texas in the late 1800s, citing San Antonio as a city that produced eleven such newspapers. The text then goes on to note that in El Paso, there were twenty-two newspapers published in Spanish in the late 1800s, more than any other Texas city. The text then concludes by explaining that the reason for this large number of Spanish-language newspapers was likely El Paso’s location near Mexico and its large population of Spanish speakers. Therefore, the main purpose of the text is to explain that Spanish-language newspapers thrived in Texas cities, especially in El Paso, in the late 1800s.

Choice A is incorrect because the text doesn’t discuss Spanish-language newspapers published in Texas today, let alone compare them with newspapers that were published in the 1800s. Choice C is incorrect. Although the text characterizes El Paso as a particularly rich site for Spanish-language journalism in the late 1800s, the text doesn’t discuss whether newspapers published in El Paso influenced the newspapers published in other cities across Texas, including San Antonio. Choice D is incorrect because the text doesn’t mention whether Spanish-language newspapers published in Texas were also widely read in Mexico. The text only focuses on the popularity of Spanish-language newspapers within Texas, and especially in El Paso.

▼ 1.55 — C

Choice C is the best answer because it best describes the function of the underlined portion in the text as a whole. The text begins by defining alternative-history fiction as a subgenre centered on “what if?” questions. The underlined portion then poses two such questions—one about India starting the Industrial Revolution and one about Soviet cosmonauts landing on the moon first. The sentence that follows refers to the two questions as “speculative counterfactuals like these,” confirming that the underlined questions serve as examples. Thus, the underlined portion provides examples of the types of scenarios addressed in alternative-history fiction.

Choice A is incorrect because the underlined portion provides examples of “what if?” scenarios, not evidence of a line of influence from academic historians to fiction writers; nothing in the text addresses such a relationship. The text mentions academic historians only in the context of how alternative-history stories can supplement their work. Choice B is incorrect because the text states that counterfactuals like the ones presented in the underlined portion are “commonly deployed by academic historians,” indicating engagement with such questions rather than neglect. Instead of acknowledging overlooked questions, the underlined portion provides examples of the types of scenarios addressed in alternative-history fiction. Choice D is incorrect because nothing in the text indicates that the specific questions in the underlined portion originated with fiction writers or that they subsequently inspired academic historians. Instead, the underlined portion simply illustrates the kind of “what if?” questions typical of the alternative-history fiction subgenre.

▼ 1.56 — C

Choice C is the best answer because it best describes the function of the underlined portion in the text as a whole. In the text, the speaker mentions the occurrence in nature of seedpods being shaken by a slight wind. The speaker then goes on to compare the black seeds to thoughts, using language that indicates that the speaker’s state of mind is unsettled (e.g., "my thoughts are spent"; "My thoughts tear me, I dread their fever"). The text concludes with a comparison between the speaker’s "scattered" state of mind and the "hot shrivelled seeds." Thus, the underlined portion of the text presents an observation of an occurrence in the natural world that the speaker then expands on to convey a sense of a turbulent interior state.

Choice A is incorrect because the text does not indicate that the seedpods are the cause of the speaker’s state of mind; thus, they could not be responsible for any misgivings the speaker has. Choice B is incorrect because the text does not contrast the natural landscape with the speaker’s state of mind or describe the wind shaking the seedpods as consistent;

rather, the text suggests that the state of the natural world and the speaker's state of mind are similar in that both are unsettled. Choice D is incorrect because there is no indication in the text that the speaker regularly engages in critical self-evaluation, only that in this particular instance the speaker's state of mind is turbulent.

▼ 1.57 — A

Choice A is the best answer because it most accurately describes the function of the underlined sentence in the text as a whole. The first sentence of the text indicates that Johnson returned to the US in 1938 at which time his painting style suddenly changed. The second sentence is underlined and gives more detail about this stylistic change, noting that his earlier work consisted largely of landscapes in an expressionist style and his new works were highly stylized portraits of Black Americans. In other words, the function of the underlined sentence is to elaborate on a transitional moment in Johnson's painting career.

Choice B is incorrect. Although the text does mention that Johnson spent a decade in Europe, it does not discuss what other travel Johnson might have done. Furthermore, although the text mentions African, American, and Scandinavian artistic elements in Johnson's work, it does not indicate that he traveled to different locations to learn about these practices. Choice C is incorrect because the text does not focus on Johnson's personal life nor does it address how successful his career was in general. Choice D is incorrect because, rather than call it into question, the underlined sentence continues the discussion of Johnson's career by adding further relevant detail of Johnson's artistic transformation.

▼ 1.58 — D

Choice D is the best answer. The text describes an experiment wherein space scientists compared plant growth in terrestrial and lunar soil conditions. It then discusses the findings of the study, including the fact that all the seeds germinated but that the plants grown in lunar soil exhibited signs of stress.

Choice A is incorrect. The text doesn't address this question, and never describes any specific characteristics of either soil. It merely describes the outcome of an experiment that exposed a plant species to lunar soil conditions. Choice B is incorrect. The text never compares methods of assessing indicators of stress—instead, it simply mentions several stress indicators observed in the study (red pigmentation, reduced leaf size, and inhibited growth rates). Choice C is incorrect. The text doesn't present any evidence that we could

never achieve seed germination in lunar habitats, and in fact states that the seeds in the lunar soil did germinate.

▼ 1.59 — C

Choice C is the best answer because it most accurately describes the main purpose of the text, which is to portray Francie's determination to reach her goal of reading all the books in the world. The text indicates that to achieve this aim, Francie works systematically and persistently: she reads all the books in the library in alphabetical order and devotes much time and effort to the project, finishing one book per day over a long period of time. The text then suggests that even though she progresses slowly ("she was still in the B's") and that she struggled with some books ("some of the B's had been hard going"), she doesn't give up because she thinks of herself as "a reader." These details show Francie's resolve.

Choice A is incorrect. Although the text mentions several topics (bees and buffaloes, Bermuda vacations, and Byzantine architecture) that Francie has read about, it doesn't indicate that any of these topics are unusual or that she especially enjoyed reading about one of these topics in particular. If anything, the text suggests that she may have found some of these topics to be dull, saying that she even read the "dry ones"—that is, the boring books—and that some of the books were "hard going," meaning they were difficult to get through. Choice B is incorrect because the text doesn't discuss Francie's involvement in other activities, only her dedication to reading. Although it's possible that Francie dedicates herself to reading because she prefers it to other activities, the text doesn't indicate whether this is the case. Choice D is incorrect. Although the text mentions one author (Abbott) whose book Francie has read as well as several topics (bees and buffaloes, Bermuda vacations, and Byzantine architecture) she has encountered, the text doesn't say whether Francie admires any of the books she's read so far. Instead, the text focuses on the time and effort she devotes to reaching her goal of reading all the books in the world—even ones she doesn't enjoy.

▼ 1.60 — C

Choice C is the best answer because it most accurately states the main purpose of the text, which is to describe a collection of medieval maps and how it was created. The text begins by mentioning Muhammad al-Idrisi's collection of maps of lands known to medieval Arabic and European scholars. It then states that the Norman king Roger II hired al-Idrisi to create the collection and details al-Idrisi's methods of creation: consulting Arabic and Greek maps

and interviewing travelers. In short, the text presents a collection of medieval maps and then goes on to describe how that collection came to be.

Choice A is incorrect because the text describes a collection of maps and the process of creating that collection but does not discuss the benefits of studying mapmaking in general. Choice B is incorrect because though the text mentions that al-Idrisi interviewed travelers, the text does not describe how those travelers created maps. Choice D is incorrect because though the text mentions that al-Idrisi consulted Arabic and Greek maps, the text does not offer a comparison of Arabic and Greek mapmaking techniques.

▼ 1.61 — D

Choice D is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The first two sentences establish a natural phenomenon: there is a richness of plant life found in the Atacama Desert despite the hard soil that makes it challenging for seeds to germinate. The next sentence, which contains the underlined portion, offers a potential explanation for the phenomenon: local birds dig ground nests exposing seeds to moisture and materials in the soil necessary for germination. The last sentence summarizes a study that compared the fertileness of mounds of dirt dug up by birds to mounds that were undisturbed to support the explanation in the underlined portion. Thus, the underlined portion mainly functions to explain how certain birds promote seed germination in the Atacama Desert soil.

Choice A is incorrect because the underlined portion doesn't address the topic of the soil's tough crust or its formation. Instead, the text elaborates on the idea that local birds that build ground nests may help seeds germinate in the hard soil. Choice B is incorrect because the underlined portion describes how some birds may support seed germination in Atacama Desert soil but doesn't describe how the seeds are deposited into the soil before germination begins. Choice C is incorrect because neither the underlined portion nor the text as a whole identifies a reason that a particular bird species may choose to dig ground nests in the Atacama Desert soil.

▼ 1.62 — D

Choice D is the best answer because it best describes the overall structure of the text. The speaker begins by stating that he has heard that others are accusing him of seeking to destroy institutions. The speaker then addresses this criticism by stating that he is "neither for nor against institutions." Instead, the speaker states that his ultimate goal is to instill "the institution of the dear love of comrades" everywhere in the country. Therefore, the

overall structure of the text is best described as an address of criticism followed by an announcement of a grand ambition.

Choice A is incorrect. While the speaker does address an opinion of him that he believes to be untrue, he doesn't indicate that this attitude has become increasingly prevalent. The speaker also concludes by explaining his goal for the future rather than his current worldview. Choice B is incorrect because the text doesn't portray the speaker as isolated or regretful, and the speaker gestures toward a hope for societal change but doesn't offer an explicit prediction that it will happen. Choice C is incorrect because the speaker addresses a criticism of him that he believes to be false; he doesn't admit any personal shortcomings. Moreover, the speaker concludes by stating a goal he has rather than showcasing his achievements.

▼ 1.63 — C

Choice C is the best answer. The text does indeed present Mukerjee's critique of the social sciences—that they were too Eurocentric—and then provides an example of how he attempted to address the issues he identified: by suggesting a social science model based on the Indian village.

Choice A is incorrect. The text doesn't discuss Mukerjee's early training or his oversight of the implementation of social policies at all. Choice B is incorrect. The text never discusses any other Indian social scientists. Choice D is incorrect. The text never mentions other social scientists' responses to Mukerjee's work.

▼ 1.64 — A

Choice A is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The first sentence explains that Bernabei and his team studied growth rings to obtain information about the ancient oak planks found during a construction project in Rome. The next sentence presents what the researchers learned: the wood from the planks came from France's Jura region, which is far from Rome. The underlined sentence then presents the implications of the findings about the planks: the wood must have been brought to Rome by boat, a difficult task that suggests Roman trade routes were complex. Thus, the underlined sentence mainly functions to present a conclusion about Roman trade routes based on the team's findings.

Choice B is incorrect because the text doesn't suggest that the team thought the ancient planks were used in the construction of a boat, nor does the underlined sentence question

that conclusion. Instead, the text states that the wood could only have been transported from Jura to Rome in a boat. Choice C is incorrect because the underlined sentence simply offers a conclusion drawn from the team's findings about the likely place of origin of the ancient planks; the text never mentions why oak was chosen for the planks instead of other wood. Choice D is incorrect because neither the underlined sentence nor the text as a whole addresses any methods that Romans used in constructing subways. Instead, the underlined sentence offers a conclusion drawn from the team's findings about the likely place of origin of the ancient wooden planks discovered.

▼ 1.65 — B

Choice B is the best answer because it most accurately states the main purpose of the text. The text begins by introducing research on variation in frugivorous birds' feeding patterns based on the specific part of their habitat range the birds occupy. The text then explains that birds at the geographic edges of their range feed selectively based on beak size, whereas birds at altitude-based boundaries feed based on local competition with other species. Therefore, the main purpose of the text is to present research findings concerning how location within a habitat affects the feeding patterns of frugivorous birds.

Choice A is incorrect. Although the text does discuss studying habitats of frugivorous birds, it doesn't address specific research methods. Choice C is incorrect. Although the text mentions territorial competition as a factor affecting the feeding patterns of frugivorous birds at elevation boundaries, nothing in the text suggests that such competition affects the boundaries of those birds' habitats. Choice D is incorrect. Although the text mentions beak size as a key factor shaping frugivorous birds' feeding patterns at the geographic boundaries of the birds' natural range, it doesn't compare the relative importance of different factors or indicate that habitat boundaries matter more than beak size. Instead, the text presents findings showing that different types of boundaries—geographic and elevational—are associated with different influences on feeding patterns.

▼ 1.66 — A

Choice A is the best answer because is accurately states the main purpose of the text. The text begins by declaring that although a song is "but a little thing," or seemingly insignificant, singing it brings joy and gives the speaker of the text "zest," or excitement, in "hours of toil." The remainder of the text explores the idea that as night is falling, singing allows the speaker to feel that "all is well." Thus, the main purpose of the text is to convey how engaging in song makes the speaker feel.

Choice B is incorrect. Although the text mentions a shepherd, it neither indicates that the shepherd is singing nor does it compare the shepherd to the speaker. Choice C is incorrect. The text indicates that the speaker works hard, engaging in "hours of toil," and it can be inferred that the speaker likely lives in a rural area, since cows and a cowbell can be heard nearby. However, the text does not suggest that the speaker is a farmer or feels excited about farming. Moreover, the shepherd in the text is not a literal reference to someone who herds sheep but instead a figurative description of the moon as the shepherd of the stars. Choice D is incorrect because in the text, the speaker is singing a song, not listening to others sing one. Moreover, the text describes the feelings that the speaker has when singing a song, not the song itself.

▼ 1.67 — B

Choice B is the best answer. The underlined sentence provides information about import/export firms, showing how Chinese communities across the world were connected by trade routes.

Choice A is incorrect. The underlined sentence never suggests that the countries of origin of the fish are in question—in fact, it tells us exactly where they came from. Choice C is incorrect. The passage never describes the steps taken to discover the fish bones described in the previous sentence. Choice D is incorrect. The underlined sentence doesn't outline a hypothesis but instead provides evidence. And the following sentence agrees with the underlined sentence, so we could eliminate this choice just for saying that the following sentence "casts some doubt on" the underlined one—partly wrong is all wrong.

▼ 1.68 — C

Choice C is the best answer because it best states how the underlined portion functions in the text as a whole. The first sentence states that Tule geese typically take four days to migrate south. Then in the next sentence, which contains the underlined portion, the text describes the first part of that journey, which begins with the geese flying over the Gulf of Alaska while keeping about 100 miles from the Canadian shore. The rest of the text details the remainder of the geese's typical journey and then mentions circumstances in 2020 that resulted in the geese taking an unusually long time to complete it. Thus, the underlined portion describes part of the Tule geese's typical winter migration journey.

Choice A is incorrect. Although the text concludes by stating that in 2020, Tule geese took twice as long to complete their typical migration, which suggests a change in their usual flight behavior, the underlined portion doesn't discuss this. Instead, the underlined portion

describes the first part of the Tule geese's typical winter migration journey over the Gulf of Alaska. Choice B is incorrect. Although the sentence containing the underlined portion mentions that Tule geese breed in Alaska, the underlined portion doesn't explain why the geese breed in that location. Rather, the text mentions Alaska to explain that it's the starting point of the Tule geese's typical winter migration. Choice D is incorrect because the underlined portion doesn't discuss any other birds that migrate south for the winter. In fact, the text is only concerned with the migration of Tule geese.

▼ 1.69 — B

Choice B is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The first sentence presents the general claim that industrial activity is not always a threat to wildlife. The underlined portion of the sentence that follows suggests that the silver-studded blue butterfly is an example of wildlife thriving in areas of industrial activity: active limestone quarries. Thus, the function of the underlined portion is to introduce a specific example in support of the general claim in the previous sentence.

Choice A is incorrect. Although the first sentence indicates that "industrial activity is often assumed" to harm wildlife, in the case of the silver-studded blue butterfly the text mentions neither an assumption about this species nor any challenge to such an assumption. Choice C is incorrect because the text mentions only one study: the "survey." Additional studies are not mentioned in the text. Choice D is incorrect because neither the underlined portion nor any other portion of the text provides a definition for any of the terms used in the text's argument.

▼ 1.70 — A

Choice A is the best answer because it most accurately describes the function of the underlined sentence. The sentence indicates that scientists used time-lapse photography during both day and night to detect pollinators visiting red clover. Therefore, the underlined sentence has the function of describing an approach scientists used in the pollinator study discussed in the text.

Choice B is incorrect because the underlined sentence discusses equipment the scientists used to conduct their study, and the text provides nothing to suggest these elements of their experimental design could, by themselves, question claims resulting from the study. Choice C is incorrect because nothing in either the underlined sentence or the rest of the text addresses whether moths have a preference for red clover or any other flowers. Choice D is

incorrect. Although the sentences that follow the underlined sentence discuss research findings, nothing in the text suggests that these findings were unexpected. Moreover, the underlined sentence describes part of the scientists' experimental design (day and night time-lapse photography), not a finding of the scientists' study.

▼ 1.71 — C

Choice C is the best answer because it most accurately states the main purpose of the text. The text begins by describing Zhao's filmmaking decisions: incorporating real events, casting nonprofessional actors from the locations she portrays, and encouraging those actors to bring personal experiences to their roles. The text then states that this approach "adds powerful resonance" to films that explore themes of place, home, and the decision to stay or leave. Therefore, the main purpose of the text is to emphasize that Zhao's filmmaking decisions reinforce the themes of her films.

Choice A is incorrect because the text explicitly states that Zhao's films are fictional. Although the text states that Zhao uses a "documentary-like style," it does not suggest that the films are best understood as documentaries, or nonfiction movies. Instead, the text describes how her approach strengthens her films' themes. Choice B is incorrect because the text does not discuss whether Zhao has a background in documentary filmmaking. The text does not mention her background. Instead, the text describes Zhao's filmmaking approach and its effect on her films' themes. Choice D is incorrect because the text does not address changes in Zhao's filmmaking style over time; instead, it describes her consistent approach and how that approach reinforces her films' themes.

▼ 1.72 — B

Choice B is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The text presents the speaker's experience of viewing the sea. In the underlined portion, the speaker focuses on the idea that the waves hitting rocks on the shore are a relentless and enduring force: they are constantly pushed back ("ever repulsed") but always return ("ever rushing on"), as though they have an energy that can't be overcome ("a life that will not know defeat").

Choice A is incorrect. Although the underlined portion characterizes the waves as a relentless force (always "repulsed" but still "rushing on" and never being defeated), the speaker doesn't suggest that the surroundings are intimidating. Instead, the speaker presents the scene in a positive way, describing the "deep delight" of the "gladsome," or cheerful, waves and feeling "the heart / Leap joyous" while viewing the sea. Choice C is

incorrect because the underlined portion doesn't suggest that the speaker is ambivalent, or has mixed feelings about, the natural world. Instead, it presents a single view of one part of the immediate surroundings: the speaker characterizes the sea's waves as an unstoppable force, since they are constantly pushed back but always return ("ever repulsed, yet ever rushing on"). Choice D is incorrect. Although the text later suggests the speaker's view of her own thoughts by referring to a "clouded brain" and a heart that leaps joyously, this reference neither occurs within the underlined portion nor establishes a clear contrast with the relentless determination of the waves. The underlined portion addresses only the speaker's view of the waves and doesn't suggest what her own thoughts might be.

▼ 1.73 — B

Choice B is the best answer because it best states the main purpose of the text, which is to make a case for the importance of Scott Joplin's less famous works. The text begins by introducing Joplin's most popular works and then goes on to assert that gaining a full understanding of Joplin's creativity requires a consideration of his lesser-known pieces as well. The text concludes by characterizing the lesser-known works "Pleasant Moments" and *Treemonisha* as masterpieces that deserve to be famous. These details indicate that the text's main purpose is to argue that more attention should be given to Joplin's lesser-known works.

Choice A is incorrect. Although the text discusses some of the ragtime music and an opera that Joplin composed, it does not compare the two types of music in general. Instead, the text argues that Joplin's lesser-known works, including his opera, deserve as much attention as his more famous ragtime pieces receive. Choice C is incorrect because the text discusses only Joplin's music and does not ask music lovers to listen to a variety of composers. Instead, the text encourages listeners to pay attention to Joplin's lesser-known works in order to gain a full understanding of his creativity. Choice D is incorrect because the text does not discuss how Joplin learned to compose and perform ragtime music. Instead, the text focuses on Joplin's less famous works and makes a case for their importance.

▼ 1.74 — D

Choice D is the best answer. The author first describes an unresolved question: what effect do bank forests have on stream biodiversity? Then the author presents a study that answers the question: bank forests increase stream biodiversity.

Choice A is incorrect. This isn't the main purpose of the text. The text never mentions agricultural yields. Choice B is incorrect. This isn't the main purpose of the text. The text

never mentions other kinds of agricultural environments. Choice C is incorrect. This isn't the main purpose of the text. The text never mentions any previously held view about how fish in these streams try to avoid predators.

▼ 1.75 — D

Choice D is the best answer because it accurately describes the overall structure of the text. The text begins by pointing out an obstacle to observing the astronomical phenomenon of the NCP: the NCP is visible only at night. The text then indicates that, inspired by the ability of some insects and birds to navigate using visualizations of polarized sunlight, researchers devised a way to locate the NCP during daylight. The text then indicates that the researchers mimicked the insects' and birds' polarized-light visualization capabilities using a polarimetric camera. Thus, the text notes an obstacle to observing an astronomical phenomenon, mentions a navigational ability of certain animals that inspired a solution to that obstacle, and then explains how researchers used an optical device to mimic that ability.

Choice A is incorrect. Although it's reasonable to conjecture that humans have used the NCP for navigation, the text doesn't indicate this is the case, let alone that the NCP is relevant to a majority of navigational tools. Furthermore, the text doesn't state that researchers discovered that insects and birds navigate without the NCP; rather, it indicates that it's known that some animals navigate by using skylight polarization to locate the NCP during the day and that this knowledge inspired the method the researchers devised. Choice B is incorrect. Although it's reasonable to conjecture that humans have used the NCP for navigation, the text doesn't state that this is the case. Furthermore, the text discusses how some animals' use of navigational strategies based on the same celestial occurrence served as the inspiration for the researchers' polarized-light approach, not as the basis for a comparison of the relative effectiveness of animal and human methods of navigation. Choice C is incorrect. Although the text implies that humans have typically been able to locate the NCP visually at night and indicates that some animals use the NCP to navigate, the text doesn't state that humans use the NCP for navigation. The text therefore doesn't emphasize a difference between how humans and animals use the NCP for this purpose. Furthermore, the text doesn't suggest that existing navigational instruments will be augmented with polarimetric technologies.
