Rationales

▼ 1.1 — C

Choice C is the best answer because it most logically completes the text's discussion of the ancient Inca farming method. In this context, "effective" means successful in producing a desired result. The text describes how the Inca used terraces with built-in irrigation systems to grow crops at different altitudes and then indicates that this farming method produced positive results "as evidenced by the great number and variety of crops grown at that time." The context clearly suggests that the terraced farming approach was highly productive, or effective.

Choice A is incorrect because to describe the Inca farming method as "chaotic" contradicts the text's description of a systematic approach using deliberately constructed terraces with built-in irrigation systems. Moreover, the "great number and variety of crops" yielded by this method seems unlikely to result from a disorganized, or chaotic, approach. Choice B is incorrect because "uniform" means consistent or the same throughout. It does not make sense in this context to describe a farming method as highly uniform if it produced a "great

number and variety of crops." Moreover, the text indicates that Inca terrace farming was specifically designed to accommodate different crops at different altitudes, highlighting the diversity rather than uniformity of this approach. Choice D is incorrect because the success of the method, "as evidenced by the great number and variety of crops grown," does not support the claim that the Inca farming method was "burdensome," or difficult to implement or maintain. In fact, the context clearly emphasizes the advantages, rather than the burdens, of Inca terrace farming.

▼ 1.2 — B

Choice B is the best answer because it most logically completes the text's discussion of traffic signals. The text indicates that while US traffic signals now have lights of three different colors (red, yellow, and green), before some point in the 1920s they had only red and green lights. This context conveys that before three-color signals were developed, traffic lights "featured," or had as a characteristic, just two colors.

Choice A is incorrect because it wouldn't make sense to suggest that traffic signals could have ever "avoided," or stayed away from, certain colors of lights. The people who made the traffic signals might have chosen not to use certain colors, but signals themselves can't make choices. Choice C is incorrect. In this context, "appreciated" would mean valued or recognized with gratitude, and it wouldn't make sense to suggest that traffic signals could have ever valued or recognized anything. Choice D is incorrect. In this context, "disregarded" would mean ignored or treated as unworthy, and it wouldn't make sense to suggest that traffic signals could have ever ignored something or had an opinion of something's worth.

▼ 1.3 — B

Choice B is the best answer because it most logically completes the text's discussion of the fossilized bones of the hominin known as Little Foot. As used in this context, "comparable to" would mean similar to. The text indicates that the relationship between the fossilized clavicle and shoulder bones of Little Foot and the clavicle and shoulder bones of "frequent climbers," such as chimpanzees and gorillas, suggests that Little Foot had adapted to moving around in trees. This context suggests that the relationship between the fossilized bones of Little Foot and the bones of chimpanzees and gorillas is one of similarity—the Little Foot fossils are likely comparable to the modern ape bones.

Choice A is incorrect because if the fossilized bones of Little Foot were "surpassed by," or exceeded by or made inferior to, the bones of modern apes that are frequent climbers, it wouldn't suggest, as the text says, that Little Foot was adapted to moving around in trees. If

anything, learning that Little Foot's clavicle and shoulder bones were surpassed by those of chimpanzees and gorillas would suggest that Little Foot was poorly adapted to climbing. Choice C is incorrect because if Little Foot's fossilized clavicle and shoulder bones were "independent of," or not influenced by or affiliated with, the bones of modern apes that climb often, it wouldn't suggest, as the text says, that Little Foot was adapted to moving around in trees. Choice D is incorrect because the text indicates that Little Foot's fossilized bones date to 3.6 million years ago, so they couldn't have been "obtained from," or acquired from, the bones of modern apes.

▼ 1.4 — C

Choice C is the best answer because as used in the text, "spread" most nearly means extended. The text states that the zoo is "huge," that it covers "numberless acres," and that it is large enough that a train is needed to explore it. Thus, the text's emphasis on the zoo's size suggests that the zoo extended, or stretched, over a large area of land.

Choice A is incorrect because if the zoo covers "numberless acres," then it could not reasonably be described as hidden, or concealed from view. Choice B is incorrect because there is nothing in the text to suggest that the zoo was discussed, or talked about. Rather, the text focuses on the zoo's large size. Choice D is incorrect. Although in some contexts "spread" can mean coated, it doesn't have that meaning in this context because to coat something means to apply a thin layer of a liquid substance, such as oil or paint, to a surface. Therefore, it would not be accurate to say that the zoo coated the acres on which it sits.

▼ 1.5 — B

Choice B is the best answer because it most logically completes the text's discussion of ectomycorrhizae relationships. In this context, "reciprocates" means responds in kind or degree. The text indicates that the relationship between certain fungi and trees in some habitats is "mutually beneficial" and involves a "symbiotic exchange" in which each organism helps the other access an important nutrient. In other words, each organism provides the same kind of benefit it receives: the tree provides a nutrient (carbon) for the fungus and the fungus reciprocates by helping the tree to absorb more of another nutrient (nitrogen).

Choice A is incorrect because the text emphasizes that the relationship between certain fungi and trees in some habitats involves a "symbiotic exchange" in which each organism helps the other access an important nutrient. Nothing in the text suggests that the fungus "overreacts," or responds too strongly, by allowing the tree to be better able to absorb a

beneficial nutrient. Choice C is incorrect because “retaliates” means responds to a harmful action with a similarly harmful action. The text indicates that the relationship between certain fungi and trees in some habitats is “mutually beneficial” and involves a “symbiotic exchange” in which each organism helps the other, not that the relationship is one in which the organisms harm one another. Choice D is incorrect. In this context, “deviates” would mean departs from an established course or norm. The text explains that the relationship between certain fungi and trees in some habitats involves a “symbiotic exchange” in which each organism helps the other access an important nutrient. Because the relationship involves benefits for both the fungus and the tree, it wouldn’t make sense to say that the fungus deviates by helping the tree be better able to absorb a beneficial nutrient.

▼ 1.6 — B

Choice B is the best answer because it most logically completes the text’s discussion of wild rice. As used in this context, "sensitive" means vulnerable or easily affected. The text indicates that climate change is causing the lakes to get deeper, which consequently threatens the wild rice that grows in the area. The text goes on to state that deep water can cause young wild-rice plants to uproot from the bottom of the lake. This context supports the idea that the plants are sensitive to water depth during early stages of development.

Choice A is incorrect because "immune" means protected or shielded, which wouldn’t make sense in this context. The text explains that deep water can cause young wild-rice plants to become uprooted and destroyed, indicating that these plants are harmed by deep water, not protected from it. Choice C is incorrect because "limited" means confined or restrained, which wouldn’t make sense in this context. The text explains that water depth can negatively affect young wild-rice plants but doesn’t suggest that water depth limits or restrains the plants. Choice D is incorrect because "receptive" means open or tolerant, which wouldn’t make sense in this context. The text doesn’t indicate that the wild-rice plants are open to or tolerant of an increase in water depth but rather the opposite: an increase in water depth can harm young wild-rice plants.

▼ 1.7 — D

Choice D is the best answer because as used in the text, "specific" most nearly means particular. The text is referring to the particular view of the Port of Oakland as seen from a subway train as it rises from underground. This specific, or particular, view has always been special to Moss, a lifetime resident of West Oakland.

Choice A is incorrect. Although the text itself is a work of fiction, the view is something Moss can point out to his companions on the train, so the view itself is presumably not imaginary. Choice B is incorrect. Although this view of the Port of Oakland is significant to Moss, nothing in the text describes the view as particularly energetic as opposed to calming, for example. Choice C is incorrect. The point of the text is that the view of the Port of Oakland from the subway train as it rises from underground is significant to Moss, not whether it is described as being correct, which the text does not address.

▼ 1.8 — B

Choice B is the best answer because it most logically completes the text's discussion of noses on ancient sculptures. In this context, "fragile" means weak or delicate. This matches the text's description of noses on ancient sculptures, which are often missing from sculptures' heads because they are "especially easy to break." Therefore, this context indicates that noses on ancient sculptures are the most fragile part of the sculptures' heads.

Choice A is incorrect. In this context, "recognizable" would mean identifiable, and since the text indicates that noses are often missing from ancient statues, they therefore cannot be the most recognizable part of the statue. Choice C is incorrect because the text indicates that many ancient statues are missing noses, so noses wouldn't be "common," or frequent, aspects of ancient statues; they would conversely be uncommon. Choice D is incorrect because the text only indicates that noses on ancient statues often stick out and end up missing from the heads, which doesn't relate to the noses being "sophisticated," or knowledgeable or refined.

▼ 1.9 — A

Choice A is the best answer because it most logically completes the text's discussion of oysters and ocean recordings. As used in this context, "responsive" means reacting positively. The text presents a finding and describes it as suggesting that healthy ocean sounds may encourage oyster larvae to establish a reef (a permanent home): groups of oyster larvae that heard recorded sounds of a healthy oyster reef were two times more likely to show signs of forming their own reef than groups that heard different ocean recordings were. This context conveys that the groups that heard healthy reef sounds had a more positive reaction than the other groups did—that is, they were the most responsive.

Choice B is incorrect because the text doesn't indicate that hearing sounds of a healthy oyster reef caused some groups of oyster larvae to become "inactive," or to stop engaging in

work or activity. Instead, the text conveys that the groups that heard those sounds were observed engaging in activity: they were two times more likely to create a reef (a permanent home) than groups that heard different ocean sounds were. Choice C is incorrect because describing the groups of oyster larvae that heard sounds of a healthy oyster reef as most "liked," or regarded with pleasure, wouldn't make sense in context. The text focuses on the idea that a study found that healthy reef sounds may encourage groups of oyster larvae to form reefs (permanent homes), not on the idea that some of the groups in the study were liked more than others. Choice D is incorrect because the text doesn't indicate that hearing sounds of a healthy oyster reef caused some groups of oyster larvae to be "distressed," or to experience difficulty or begin to decline. Instead, the text indicates that the sounds increased the likelihood that groups of larvae would establish a reef (a permanent home), suggesting that the sounds had a positive effect on the larvae.

▼ 1.10 — B

Choice B is the best answer. "Exposure to" means "having contact with." It makes sense that Prasad and Bainbridge were investigating whether seeing false versions of images was a cause of false visual memories. Notice how "exposure to incorrect renditions" matches the idea of "familiarity with erroneous versions," which appears later in the sentence.

Choice A is incorrect. "Compliance with" means "going along with a command or directive." False versions of images can't give commands or directives, so this doesn't apply. Choice C is incorrect. "Criteria" means "standards by which to judge something." It's not clear how people would come to have standards for the wrong version of an image in the first place, let alone how those standards would cause them to falsely remember the correct version. In other words, this choice would result in a confusing, unclear sentence. Choice D is incorrect. "Forfeiture of" means "a giving up of something." It wouldn't make sense to say that false memories of an image might be caused by giving up the wrong version of the image.

▼ 1.11 — C

Choice C is the best answer because it most logically completes the text's discussion of Olga Tokarczuk's novel *The Books of Jacob*. As used in this context, "complexity" means having many complicated parts that when taken as a whole are difficult to follow or explain. The text indicates that *The Books of Jacob* has a large cast of characters, a complicated and wandering plot (that is, a plot that is difficult to follow), and reverse page numbering. Together, these features make up a novel that's challenging to read and summarize. This context supports the idea that a brief book review can't do justice to the novel's complexity.

Choice A is incorrect. Although the word “accuracy,” or being free from error or falsehood, can sometimes be used to describe a novel, the text doesn’t discuss whether Tokarczuk’s novel has this quality. Instead, the text describes the novel as having a large cast of characters, a difficult-to-follow plot, and reverse page numbering. These features suggest complexity, not accuracy. Choice B is incorrect because “inactivity” means being in a state of idleness or doing nothing, neither of which would make sense in this context. The text describes Tokarczuk’s novel, and although it’s possible the novel could portray its characters as inactive, it wouldn’t make sense to describe the novel itself as such. Choice D is incorrect because in this context “restraint” would mean holding back or showing self-control, and the text doesn’t indicate that Tokarczuk’s novel has either of these qualities. In fact, the features of the novel that the text describes, such as a large cast of characters, a complicated and wandering plot, and reverse page numbering, suggest excess and complexity, not restraint.

▼ 1.12 — D

Choice D is the best answer because it most logically completes the text’s discussion of the challenge of generating electricity from ocean waves. In this context, "consistent" means steady or unchanging over time. The text introduces a challenge and then explains that wave power varies, or changes, unpredictably in ways that cause problems for electricity generation. This context conveys that the challenge being described is a lack of consistency.

Choice A is incorrect because the text introduces a challenge and then elaborates on it by emphasizing that the unpredictable nature of variations in ocean waves causes problems, which doesn’t indicate that wave power isn’t "accidental," or isn’t happening unintentionally. It wouldn’t make sense to describe waves—a natural occurrence—as happening intentionally. Choice B is incorrect because "confident" means having a feeling of self-assurance, and it wouldn’t make sense to describe wave power itself in terms of either having or lacking a sense of confidence. Choice C is incorrect because the text introduces a challenge and then elaborates on it by emphasizing that the unpredictable nature of variations in ocean waves causes problems, which doesn’t indicate that wave power isn’t "expensive," or isn’t costly. If anything, technological and planning problems might actually increase the expense of generating electricity from waves.

▼ 1.13 — D

Choice D is the best answer because it most logically completes the text’s discussion of the collaboration between the Crow Tribe and Montana State University. As used in this context,

“exemplifies” means demonstrates. The text conveys how the Crow Tribe–Montana State University collaboration serves to illustrate the model of community-based participatory research introduced earlier in the text and expanded on later in the text.

Choice A is incorrect because referring to “circumvents,” or avoids, wouldn’t make sense in context. The text suggests that the Crow Tribe–Montana State University collaboration serves as an example of the principles of community-based participatory research, not that the collaboration evades this model. Choice B is incorrect because referring to “eclipses,” or overshadows, wouldn’t make sense in context. The text describes the Crow Tribe–Montana State University collaboration as an equal partnership, which indicates that it’s an example of the community-based participatory research model, not that it overshadows the model. Choice C is incorrect because saying that the collaboration “fabricates,” or creates, the model wouldn’t make sense in context. The text indicates that the Crow Tribe–Montana State University collaboration serves as an example of the model, not that it created the model.

▼ 1.14 — C

Choice C is the best answer because it most logically completes the text’s discussion of *carte de visite* photos. To "popularize" a technology is to allow it to be used and appreciated widely. The text explains that unlike the photos produced by earlier forms of photographic technology, *carte de visite* photos were inexpensive and could easily be obtained by "everyday people," who enjoyed exchanging the images. Therefore, *carte de visite* photos helped popularize photography.

Choice A is incorrect because the text indicates that instead of weakening the emerging technology of photography, *carte de visite* photos allowed it to be more widely accessed and enjoyed by people. Choice B is incorrect. The text establishes that large numbers of people enjoyed using *carte de visite* photos, so it can be inferred that these photos caused photography to be praised, or celebrated. However, it wouldn’t make sense to say that inanimate objects—in this case, photos—had praised photography; instead, *carte de visite* consumers themselves would have praised it. Choice D is incorrect because the text explains that rather than isolating photography, or limiting its availability, *carte de visite* technology made photography more widely accessible to people.

▼ 1.15 — B

Choice B is the best answer because it most logically completes the text’s discussion of climate activity in Earth’s distant past. In this context, to “simulate” most nearly means to

represent a natural process using computer models. According to the text, understanding Earth's early climate is difficult because we cannot make direct observations of the distant past. Instead, scientists must create computer models that approximate early climate conditions, based on the physical evidence that those conditions left behind on Earth's surface. This context supports the idea that computer models simulate Earth's climate in the distant past.

Choice A is incorrect because scientists use existing physical evidence as a basis for developing computer models that describe what Earth's actual past climate might have been like. The models are not being used to "invent," or imagine, a completely fictional climate. Choice C is incorrect because the computer models are being used in an attempt to describe as accurately as possible what Earth's past climate might have been like. They are not attempting to "exaggerate," or distort, those features. Choice D is incorrect because the computer models do not "preserve," or protect from deterioration, Earth's early climate; instead, they attempt to reproduce the characteristics of that climate, based on the remaining physical evidence of that climate.

▼ 1.16 — B

Choice B is the best answer because as used in the text, "mingled" most nearly means combined. In the text, the speaker refers to several concepts mingling together and then compares this to "the blending of" two other things (an exotic plant and the fragrance of a strange flower). This comparison conveys that the speaker views the concepts of love, April, and the gold of someone's hair as being blended together, or combined.

Choice A is incorrect because "mingled" means combined, not identified. The speaker names several concepts (love, April, and the gold color of someone's hair) and then moves to a comparison of their mingling together to "the blending of" a plant and the scent of a flower, conveying the idea that the speaker views the concepts as blended together, or combined. Choice C is incorrect. The text as a whole may refer to a memory, but the comparison of the mingling of several concepts (love, April, and the gold color of someone's hair) to "the blending of" a plant and the scent of a flower conveys that the speaker views those concepts as actually blended together, or combined, and not simply remembered at the same time. Choice D is incorrect. The speaker refers to several concepts (love, April, and the gold color of someone's hair) and then compares the mingling together of those concepts to "the blending of" a plant and the scent of a flower; rather than suggesting that the concepts are celebrated, this comparison conveys that the speaker views the concepts as blended together, or combined.

▼ 1.17 — B

Choice B is the best answer because it most logically completes the text's discussion about recycling plastics. In this context, "inadequate" means not satisfactory. The text indicates that the mechanical plastic-recycling process affects the environment and causes "the loss of material quality." The text contrasts that with Chazovachii's chemical plastic-recycling process, which is cleaner and produces a desirable product. The text's emphasis on the negative aspects of mechanical recycling suggests that it is inadequate in terms of environmental impact and the quality of the material the process yields.

Choice A is incorrect because in this context "resilient" would mean able to withstand difficulty and the text does not characterize the plastic-recycling process as having this quality or describe any difficulties that these processes might need to overcome. Choice C is incorrect because in this context "dynamic" would mean constantly changing. Although the text suggests that there have been changes in the field of recycling, as is the case with the advent of Chazovachii's chemical recycling process, there is nothing to suggest that the mechanical process itself has changed or is prone to change. Choice D is incorrect because in this context "satisfactory" would mean acceptable but not perfect. The text mentions only shortcomings of the mechanical process (environmental effects and lower material quality), so the text more strongly supports a negative view of this process and provides no evidence that it would be considered satisfactory.

▼ 1.18 — D

Choice D is the best answer because it most logically completes the text's discussion of Sam Gilliam's artworks. As used in this context, "creating" means producing or bringing something into existence. The text indicates that Gilliam is an artist who made draped canvases and, later, quilt-like paintings. This context supports the idea that Gilliam explored different styles in his art by creating special types of paintings.

Choice A is incorrect because the text indicates that Gilliam actually explored and pursued the creation of quilt-like paintings; he wasn't just "predicting," or declaring in advance, the existence of these paintings. Choice B is incorrect because in this context "refusing" would mean rejecting, and there is nothing in the text to suggest that Gilliam rejected his quilt-like paintings. Instead, the text indicates that he was exploring and pursuing a new art style in these paintings. Choice C is incorrect because in this context "hiding" would mean concealing from view, and there is nothing in the text to suggest that Gilliam attempted to

conceal his quilt-like paintings. Instead, the text indicates that he was exploring and pursuing a new art style in these paintings.

▼ 1.19 — D

Choice D is the best answer because it most logically completes the text's discussion of how maple trees may respond to changes in climate. As used in this context, "adapt to" means to adjust to new conditions. The text first notes that maple trees already thrive in a wide variety of climates and then goes on to say that alterations maples may undergo are likely to be relatively small and easily achieved. This context supports the idea that maple trees will more easily adjust or adapt to a changing climate.

Choice A is incorrect. Although the text discusses how maple trees adjust to change, the trees do not "relocate from," or physically move from one place to another. Choice B is incorrect because "refer to" means to mention or allude to something, and the trees are not doing either of these actions. Choice C is incorrect because the text is discussing how maple trees may respond to changes in climate, not where they "originate from," or came from originally.

▼ 1.20 — B

Choice B is the best answer because it most logically completes the text's discussion of Renata Flores Rivera's use of Quechua in her music. In this context, "inexperienced with" means not accustomed to. The text indicates that Flores Rivera wanted to promote the Quechua language in her music and overcame a challenge by seeking help with pronunciation from her grandmother and by taking language classes. This context conveys the idea that Flores Rivera was not sufficiently familiar with Quechua to use it in her music without help. Thus, she was inexperienced with speaking the language, which she addressed by seeking help.

Choice A is incorrect because describing Flores Rivera as "prepared for"—or ready for—speaking Quechua wouldn't make sense in context. The text indicates that speaking Quechua presented a challenge, but if she were ready to speak the language, then there would be no challenge. Choice C is incorrect because describing Flores Rivera as "skilled in"—meaning good at or capable of—speaking Quechua wouldn't make sense in context. The text indicates that speaking Quechua presented a challenge, but if she were capable of speaking the language, then there would be no challenge. Choice D is incorrect. Flores Rivera was likely "excited about"—or thrilled or delighted with—speaking Quechua, but this wouldn't make sense in context. The text indicates that speaking Quechua presented a

challenge, but if she were delighted with speaking the language, then there would be no challenge.

▼ 1.21 — A

Choice A is the best answer because as used in the text, "sheltering" most nearly means protective. In the text, the speaker describes a painting featuring a female figure. The speaker ultimately confesses to falling in love with the woman in the painting, who has "stole[n] away" the speaker's heart, but first the speaker describes elements of the painting's setting. These include sterile soil, barren fields with "no ray / Of hope in a blade of green"—a description that conveys a mood of melancholy and forlornness, possibly reflecting the speaker's own sadness at falling in love with an image that can't return the speaker's love. The text continues by stating that there's no "sheltering roof" in the painting, even though the "skies are heavy and gray," showing signs of an impending storm. Generally, a roof's intended purpose is to provide protection from the elements, and in this context, a roof would offer shelter and protection from the gathering storm.

Choice B is incorrect because nothing in the text suggests that a roof would be restrictive—that is, that it would limit or restrain something in some way. Although a roof would provide some cover from stormy winds and rain, it wouldn't limit the wind and rain, only deflect them. Choice C is incorrect because there's nothing in the text to suggest that if a "sheltering roof" were present in the painting, it would be affectionate, or loving and tender. In the text, the immediate context in which the word "sheltering" appears refers to the absence of a roof that would provide protection from the oncoming storm depicted in the painting, not to the idea that such a shelter would be loving and tender if it were present. Choice D is incorrect because in this context, suspicious would mean questionable or dubious, and there's nothing in the text to suggest that if any roofs were present in the painting, they would be questionable or cause any suspicion.

▼ 1.22 — D

Choice D is the best answer because it most logically completes the text's discussion of the Indigenous method of harvesting *Hierochloe odorata.* As used in this context, "replenishes" means helps increase the population or helps it recover. The text explains that although snapping off a wild plant at the root might seem detrimental to the wild population, it actually helps *Hierochloe odorata*, increasing both their "number and vigor." This context conveys the idea that even though it seems counterintuitive, the Indigenous method of harvesting *Hierochloe odorata* actually replenishes the wild population.

Choice A is incorrect. Although a harvesting method could be used to select for certain traits in plants, it's not clear what it would mean for a harvesting method to select "wild populations" of plants. Choice B is incorrect because as used in this context, "originates" means creates. The text doesn't address the origin of *Hierochloe odorata*, but rather how the Indigenous harvesting method affects it. Choice C is incorrect because in this context, "conditions" means to influence someone or something to behave in a certain way, and the text doesn't suggest the new plants that replace the harvested ones differ in any meaningful way, or in any way that could be the result of conditioning.

▼ 1.23 — D

Choice D is the best answer because it most logically completes the text's discussion of the early years of film. In this context, "perception of" means understanding of or view of. The text states that people in the film industry had a personal stake ("a vested interest") in getting the public to embrace film when the medium was new and indicates that some film critics helped legitimize film as an art form—that is, that they helped to make film something people accepted as a type of art. This context conveys that it was the critics' ability to influence the public's view of the world of cinema that some early filmmakers relied on.

Choice A is incorrect because in this context, "reproduction of" would refer to a copy of something or the act of copying something, and it wouldn't make sense to describe the general public as reproducing the world of cinema, or copying film as an entire art form. Choice B is incorrect. In this context, "contribution to" would refer to playing a significant part in causing something to happen. Although the text indicates that people in the early film industry had reasons to want the public to embrace film, it wouldn't make sense to suggest that filmmakers relied on film critics to influence how the public contributed to the world of cinema; the text focuses on the public's view of film once the world of cinema existed (embracing it, regarding it as legitimate art) and doesn't suggest the general public was responsible for the medium's existence. Choice C is incorrect because in this context, "application to" would refer to putting something to direct use, and it wouldn't make sense to say that the general public needed to be used in a practical way in the world of cinema. The text focuses on the importance of the public's view of film when the medium was new but not on the idea that the public needed to be directly involved in film.

▼ 1.24 — C

Choice C is the best answer because it most logically completes the text's discussion of novelist Leon Forrest's admiration of William Faulkner's writing style. In this context,

"imitation" means something that resembles or reproduces something else. The text states that Forrest admired Faulkner's style and that anyone familiar with Faulkner's style would be able to see the stylistic similarities between a particular passage in Forrest's novel *Divine Days* and Faulkner's writing, a fact that supports the idea that Forrest's novel pays tribute to Faulkner by reproducing, or imitating, Faulkner's style.

Choice A is incorrect because in this context, a "forgetting" would mean an instance in which something is overlooked or not remembered. The text emphasizes Forrest's admiration for Faulkner's style and the fact that Forrest's writing in some instances closely resembles Faulkner's stylistically. It therefore wouldn't make sense to say that in trying to pay tribute to Faulkner's style, Forrest failed to remember it. Choice B is incorrect because in this context, a "rejection" would mean a dismissal of something as unworthy. The text emphasizes Forrest's admiration for Faulkner's writing style, stating that parts of Forrest's writings indicate efforts to copy that style. It wouldn't make sense therefore to suggest that Forrest had rejected or dismissed Faulkner's style as unworthy. Choice D is incorrect because in this context, an "opinion" would mean a view or judgment. Although the text focuses on Forrest's admiration of Faulkner, which suggests that Forrest had formed a positive judgment of Faulkner's style, the word opinion wouldn't make sense in this sentence: the sentence doesn't say that the passage from Forrest's novel expresses his view of Faulkner's style; rather, it suggests that stylistically, the passage closely resembles, or imitates, Faulkner's writing.

▼ 1.25 — C

Choice C is the best answer because it most logically completes the text's discussion of why zygomorphic flowers (those with bilateral symmetry) remain open longer than actinomorphic flowers (those with radial symmetry). In this context, "attributed to" means explained as a consequence of. The text indicates that compared with actinomorphic flowers, zygomorphic flowers have a small pool of potential pollinators and that remaining open therefore increases their chances of being pollinated successfully. This would be a reasonable explanation for why zygomorphic flowers remain open on average 1.1 days longer than actinomorphic flowers do. Thus, in context it would be most logical to say that zygomorphic flowers' extended opening period can likely be attributed to the factors discussed in the text.

Choice A is incorrect because saying that the extended period in which zygomorphic flowers remain open could be "analogous to," or comparable to, these flowers' limited pollinator pool and the fact that remaining open increases their chances of pollination wouldn't make sense in context. The text presents these factors as a possible explanation for the extended

period, not as something that the extended period resembles in some way. Choice B is incorrect because saying that the extended period could be “converted by,” or transformed by, the limited pollinator pool and the increased pollination chances wouldn’t make sense in context. The text presents these factors as a possible cause of the extended period, not as forces that change the period into something else. Choice D is incorrect because in this context, “magnified by” would mean exaggerated by or made more extreme or intense by, neither of which would make sense. The text presents zygomorphic flowers’ limited pollinator pool and the fact that this might require remaining open for longer to increase chances of pollination as factors that could explain why these flowers remain open for extended periods; nothing in the text suggests these are factors that could exaggerate an already-extended period (that is, make the period seem greater or more important than it actually is), or that the extended period is in some way extreme or intense.

▼ 1.26 — B

Choice B is the best answer because it most logically completes the text’s discussion of the work of particle physicists. In this context, “inspecting” means viewing closely in order to examine. The text indicates that as particle physicists, Arce and El-Khadra’s work involves using advanced technology to “closely examine” subatomic particles. In other words, they use technology to inspect small parts of matter that can’t be seen by the naked eye.

Choice A is incorrect because nothing in the text suggests that Arce and El-Khadra spend time “selecting,” or choosing, subatomic particles for some purpose; the text simply states that the particle physicists use advanced technology to see and study the behavior of those tiny parts of matter. Choice C is incorrect because nothing in the text suggests that Arce and El-Khadra spend time “creating” subatomic particles, or bringing them into existence; the text simply states that the particle physicists use advanced technology to see and study the behavior of those tiny parts of matter. Choice D is incorrect. In this context, “deciding” would mean making a final choice or judgment about something. It wouldn’t make sense to say that particle physicists get to choose what is and isn’t visible to the naked eye, especially when the text presents it as fact that subatomic particles are “the smallest detectable parts of matter” and would therefore be invisible. The text focuses on Arce and El-Khadra’s close observation of those particles, not on any decisions they might make.

▼ 1.27 — B

Choice B is the best answer because it most logically completes the text’s discussion of the purpose of the National Heritage Fellowship. In this context, "recognize" means acknowledge

or honor someone officially for their achievements. The text states that the fellowship was created for "exceptional folk and traditional artists." It then provides an example of one recipient of the fellowship, circus aerialist Dolly Jacobs, who was given the fellowship "to celebrate her lifetime contributions to the arts." The fact that the fellowship is given to celebrate exceptional artists for their achievements therefore suggests that its purpose is to publicly honor, or recognize, them.

Choice A is incorrect because "startle" would mean alarm or surprise, and there's nothing in the text to suggest that Jacobs and other artists who received the National Heritage Fellowship didn't expect to receive it or were alarmed by it. It therefore wouldn't make sense to say the fellowship was created to publicly alarm or surprise exceptional artists. Choice C is incorrect because in this context, "familiarize" would mean make known or familiar, but the text gives no indication that Jacobs or other recipients of the National Heritage Fellowship were unknown or unfamiliar before receiving the fellowship or that the fellowship was intended to make them familiar to the public. In fact, the text describes recipients as "exceptional" and notes that Jacobs received the award "to celebrate her lifetime contributions to the arts," both of which suggest that Jacobs and other recipients were already well known in the arts world. Choice D is incorrect because "convey" would mean either transport or communicate something, neither of which would be logical in this context. The fellowship doesn't transport artists, and though the process of awarding the fellowship might communicate something about the artists to the general public, it would be illogical to state that the fellowship communicates the artists themselves. Rather, the fellowship honors artists for their contributions.

▼ 1.28 — B

Choice B is the best answer because it most logically completes the text's discussion of the cover art of Virginia Woolf's novels. In this context, "partnership" means collaboration or joint effort. The text states that Woolf's sister Vanessa Bell was a talented painter and that Bell worked with Woolf to provide the cover art for most of Woolf's novels. Thus, this context suggests that Woolf and Bell pursued a creative partnership in order to produce several of Woolf's novels.

Choice A is incorrect because there is no indication that Woolf or Bell were undergoing a "rebellion," or revolt, against anything in particular. Instead, the text focuses on how they worked together in some aspects of the production of Woolf's novels. Choice C is incorrect because there is nothing in the text to indicate that Woolf or Bell made a "discovery," or encountered anything new for the first time as they worked together. The text suggests that

Woolf had already written her novels and that Bell then assisted Woolf with the cover art for many of them. Choice D is incorrect because the text implies that Woolf and Bell had a positive relationship. According to the text, the sisters "worked closely" together to produce the cover art for many of Woolf's novels; the text doesn't mention whether while working together, Woolf and Bell had a "disagreement," or conflict.

▼ 1.29 — C

Choice C is the best answer because it most logically completes the text's discussion about how, for Schoenemann, a damaged trilobite fossil was informative. In context, "offered" means provided or gave. The text suggests that although it may seem counterintuitive, a broken fossilized trilobite allowed Schoenemann to observe more details of the trilobite's eye than an intact fossilized trilobite would. This context conveys the idea that a damaged fossil offered, or provided, fresh insight into the structure of a trilobite's eye.

Choice A is incorrect because "resolved" means determined or figured out, which wouldn't make sense in this context. The text focuses on how Schoenemann was able to get more information from a broken fossil than an intact one. Although the damaged fossil may have allowed her to determine certain information, as an inanimate object the fossil isn't capable of resolving anything. Choice B is incorrect because saying that the broken part of a trilobite fossil "adjusted," or changed or modified, fresh insight wouldn't make sense in this context. The text focuses on how Schoenemann was able to get more information from a broken fossil than an intact one. This context suggests that the fossil offered fresh insight, or understanding, not that it adjusted fresh insight. Choice D is incorrect because "directed" means managed or instructed, which wouldn't make sense in this context. The text focuses on how Schoenemann was able to get more information from a broken fossil than an intact one. This context suggests that the fossil offered fresh insight, or understanding, not that it directed fresh insight.

▼ 1.30 — C

Choice C is the best answer because as used in the text, "beckoning" most nearly means "inviting," or attractive. The text portrays a woman who is looking at "trees in their spring beauty." She compares them to cities, which have their own pleasures even if they do not have the "easy unhuman loveliness" of trees: she thinks of cities as "seductive" and "charming," both adjectives that signify something that is enticing, or attractive. Therefore, cities that are seductive and charming would also be described as inviting people closer to them.

Choice A is incorrect because there is no indication in this context that cities are “demanding,” or requiring effort. Choice B is incorrect. Though “signaling,” or communicating something, might be considered a key feature of the act of “beckoning,” in the context here, “beckoning” suggests that cities have attractive qualities that naturally draw people to them. Such attractive qualities are not described by the word “signaling” alone. Therefore, “signaling” is an incorrect answer because it is insufficiently precise. Choice D is incorrect because there is no reason to think in this context that the cities are “shifting,” or changing shape.

▼ 1.31 — C

Choice C is the best answer. "Preserving" means "maintaining" or "keeping in good condition," so preserving the photographs means that audiences should be able to view them for a long time.

Choice A is incorrect. "Replacing" means "putting something new in place of" the photographs. Replacing the photos will make it so that audiences can’t view them at all. Choice B is incorrect. "Inventing" means "creating a new idea, process, or thing." The museum can’t invent photographs that already exist. Choice D is incorrect. Counting the photographs will not help audiences view them well into the future.

▼ 1.32 — A

Choice A is the best answer. “Suitable” means “appropriate for a particular purpose.” Since the text indicates that two of the best ballet dancers of the twentieth century were Osage, we can infer that the author believes that ballet is a very suitable artform for telling Osage stories.

Choice B is incorrect. The text never suggests that Tinker-Smith’s choice was determined. That would imply that Tinker-Smith initially faced some kind of obstacle or opposition, and nothing like that is mentioned in the passage. Choice C is incorrect. The text implies the opposite of this. “Arbitrary” means “based on random choice or whim rather than reason.” But the text does give us a good reason behind the choice to tell Osage stories through ballet: two of the best ballet dancers of the twentieth century were Osage. Choice D is incorrect. The text never suggests that Tinker-Smith’s choice was “unpredictable.” Rather, the fact that two of the best ballet dancers of the twentieth century were Osage makes ballet especially appropriate for telling Osage stories.

▼ 1.33 — A

Choice A is the best answer because it most logically completes the text's discussion of the Moon's surface. In this context, "reflect" means show or make apparent. The text states that because the surface of the Moon was softer when the Moon was still forming than it is now, early asteroid and meteoroid impacts "would have left less of an impression" and, as a result, evidence of them may no longer exist. This context supports the idea that the surface of the Moon may not accurately show signs of early impact events.

Choice B is incorrect because it wouldn't make sense to say that the surface of the Moon may not accurately "receive," or acquire or experience, early impacts from asteroids or meteoroids. The text indicates that the impacts have already occurred, and it isn't clear how the Moon's surface could be accurate or inaccurate in experiencing them. Choice C is incorrect because it wouldn't make sense to say that the surface of the Moon may not accurately "evaluate," or determine the significance or condition of, early impacts from asteroids or meteoroids, since that would suggest that it's possible for the Moon's surface to make a decision of any kind. Choice D is incorrect. In this context, "mimic" would mean to deliberately simulate or closely imitate something. It wouldn't make sense to say that the surface of the Moon may not accurately mimic early asteroid and meteoroid impacts, since that would suggest that it's possible for the Moon to deliberately imitate something.

▼ 1.34 — A

Choice A is the best answer because as used in the text, "arranged" most nearly means "organized." The text states that a welcome feature of Manchester's art galleries (as opposed to others) is that the titles of the paintings are easy to see and that a catalogue is therefore unneeded while visitors browse the art galleries. This suggests that the paintings are displayed in a systematic, or organized, way.

Choice B is incorrect. "Ranked" might mean either classified or placed in orderly rows. Neither of these meanings would necessarily imply that the names of the paintings are easy to see (even if the paintings are placed in rows, their labels might be obscured). Choice C is incorrect because it would not make sense in context to describe the paintings as "scheduled," or planned to take place at a certain time. Choice D is incorrect because if the paintings were "discussed," or talked about, this would have no bearing on whether the names of the paintings could be easily seen.

▼ 1.35 — D

Choice D is the best answer because it most logically completes the text's discussion of Georgi Vladimov's novel *Faithful Ruslan*. In this context, "suppress" means to prevent

something, such as a book, from being accessed by the public. The text indicates that the novel was circulated secretly within the Soviet Union, a stratagem that was necessary because of the government's efforts to suppress the book, or prevent it from being circulated and read.

Choice A is incorrect because in this context, "replicate" would mean to copy or reproduce a book, and this meaning wouldn't make sense in the text's discussion of *Faithful Ruslan*. If the Soviet government had attempted to replicate Vladimov's novel, there would be no reason for copies to circulate "in secret," since the government would be actively making more copies available, not restricting access. Choice B is incorrect. Although a repressive government might well "critique" a novel, or evaluate it negatively, simply critiquing one wouldn't necessarily lead to copies of it circulating "in secret." Instead, the text suggests that the Soviet government took decisive action against *Faithful Ruslan* that necessitated its underground circulation and did not merely offer criticism of the novel. Choice C is incorrect because "import" means to bring a product, such as a book, into a country from elsewhere. However, the text suggests that copies of *Faithful Ruslan* were already present in the Soviet Union and that the government was trying to restrict their circulation rather than increasing access to the novel by importing copies from another country.

▼ 1.36 — C

Choice C is the best answer because it most logically completes the text's discussion of how Ofelia Zepeda has contributed to the field of linguistics. As used in this context, "extensive" means having a wide or considerable extent. The text indicates that Zepeda's many accomplishments in linguistics are varied, including teaching linguistics, writing poetry in more than one language, creating a grammar book, and co-founding a language institute. This context supports the idea that Zepeda's contributions to the field are extensive.

Choice A is incorrect because the sentence presents Zepeda's accomplishments as examples to support the claim made in the first part of the sentence. It wouldn't make sense to say that achievements as a professor, poet and author, and co-founder of a language institute demonstrate that Zepeda's contributions in her field are "pragmatic," or related to practical matters and not involving intellectual or artistic matters. Choice B is incorrect because the sentence presents Zepeda's accomplishments as a professor, poet and author, and co-founder of a language institute as examples to support the claim made in the first part of the sentence. There's no reason to believe that the positive achievements listed demonstrate that Zepeda's contributions in her field are "controversial," or have caused disputes and opposing viewpoints. Choice D is incorrect because in this context, "universal"

would mean including or covering everything in a group. The sentence presents Zepeda's accomplishments as examples to support the claim made in the first part of the sentence, and it wouldn't make sense to say that these specific achievements—particularly as the author of a grammar book specific to the Tohono O'odham language—demonstrate that Zepeda's contributions relate to everything in the field of linguistics.

▼ 1.37 — A

Choice A is the best answer because it most logically completes the text's discussion of a relationship between the dodder plant and its host plant. As used in this context, "synchronization" means the act of things happening at the same time. The text indicates that the dodder and its host plant flower in unison and that this synchronization occurs because the dodder makes use of a protein produced by the host shortly before flowering.

Choice B is incorrect because referring to "hibernation," or the state of being dormant or inactive, wouldn't make sense in context. The text focuses on something the dodder plant actively engages in—making use of a protein and producing flowers. Choice C is incorrect because stating that the dodder plant and its host engage together in "prediction," or the act of declaring or indicating something in advance, wouldn't make sense in context. Rather than indicating that the dodder plant and its host plant make a prediction about flowering activity, the text suggests that the host produces a protein as part of its regular flowering process and that the dodder then absorbs and uses that protein to flower at the same time. Choice D is incorrect because referring to "moderation," or the act of causing something to become less intense or extreme, wouldn't make sense in context. Although the text states that the dodder plant absorbs and uses a protein made by its host plant, it doesn't suggest that the dodder lessens the host plant's flowering activity; the two plants simply flower in unison.

▼ 1.38 — D

Choice D is the best answer because it most logically completes the text's discussion of delivering biomolecules to plant cells. In this context, "overcome" means to succeed in dealing with an obstacle. The text suggests that although it's difficult to move biomolecules through plant cell walls, Landry and her colleagues have shown that carbon nanotubes may be useful, since they can cross cell walls. This context conveys that Landry and her colleagues think it's possible, using carbon nanotubes, to succeed in dealing with the obstacle of transmitting biomolecules to plant cells.

Choice A is incorrect because it wouldn't make sense in context to say that Landry and her colleagues have shown that it may be possible to "conceptualize," or form an idea of, the

difficulty of transmitting biomolecules through the walls of plant cells. The text presents this difficulty as a known problem that Landry and her colleagues think they may have solved, not as a mysterious occurrence that they have yet to form ideas about. Choice B is incorrect because the text suggests that Landry and her colleagues think it may be possible to successfully deal with the problem of transmitting biomolecules through the walls of plant cells, not that Landry and her colleagues think it may be possible to "neglect," or simply to disregard and ignore the problem. Choice C is incorrect because it wouldn't make sense in context to say that Landry and her colleagues have shown that it may be possible to "illustrate," or demonstrate, the difficulty of transmitting biomolecules through the walls of plant cells by using carbon nanotubes. According to the text, carbon nanotubes allow molecules to be transmitted to plant cells—something that is otherwise difficult to do. The text therefore presents carbon nanotubes as a way of possibly solving a problem, not as a means of demonstrating the problem.

▼ 1.39 — B

Choice B is the best answer because as used in the text, "disturbed" most nearly means alarmed. The text portrays the narrator traveling in a carriage as wolves howl in the surrounding darkness. The text contrasts the reaction of both the narrator and the horses pulling the carriage with that of the driver of the carriage: the narrator and horses are "dreadfully afraid," but the driver is "not in the least disturbed." In other words, the driver is not alarmed by the wolves nearby.

Choice A is incorrect. Although in some contexts, "disturbed" can mean disorganized, the text doesn't portray a character acting in a disorganized manner; instead, the driver continues to drive the carriage, even though the horses pulling it are alarmed. Choice C is incorrect. Although in some contexts, "disturbed" can mean offended, the text doesn't portray one character feeling offended, or upset, by another's actions; instead, it contrasts the fear felt by the narrator with another character's lack of fear. Choice D is incorrect. Although in some contexts, "disturbed" can mean interrupted, the text doesn't portray an action being interrupted; indeed, the travel depicted in the scene continues despite the threat of the wolves outside the carriage.

▼ 1.40 — B

Choice B is the best answer because it most logically completes the text's discussion of Jacob Lawrence's artistic process. In this context, "observant" means watchful and perceptive. The text emphasizes that the "close attention" Lawrence paid to "all the details"

of his neighborhood allowed him to reflect subtle elements of “the beauty and vitality of the Black experience” in his artwork. This context indicates that being observant of his surroundings was an important part of Lawrence’s work as an artist.

Choice A is incorrect because the text gives no indication that Lawrence was “skeptical,” or had an attitude of doubt in general or about particular things, let alone that skepticism was important to him as an artist. Rather than indicating that he was skeptical, the text focuses on how Lawrence paid careful attention to everything around him and reflected his observations in his artwork. Choice C is incorrect because the text gives no indication that Lawrence was “critical,” which in this context would mean inclined to criticize harshly or unfairly. Rather than indicating that Lawrence found fault in things, the text suggests that he paid careful attention to everything around him and that his artwork reflects this careful attention. Choice D is incorrect because the text doesn’t suggest that Lawrence was “confident,” or self-assured. Rather than addressing how Lawrence felt about himself and how that feeling affected his artistic process, the text emphasizes the careful attention Lawrence paid to everything around him—attention that allowed him to capture subtle elements of a particular place and time in his artwork.

▼ 1.41 — A

Choice A is the best answer because it most logically completes the text’s discussion of how kelp forests help marine animals. In this context, "tranquil" means free from disturbance, or calm. The text indicates that ocean currents are powerful and make it difficult for marine animals to hide from predators and that kelp forests slow currents down to create calmer areas. In other words, kelp forests create a more tranquil environment.

Choice B is incorrect because the text indicates that kelp forests provide shelter for marine animals, meaning they create environments that are safer, not more "dangerous." Choice C is incorrect because the text discusses how kelp forests affect currents in the ocean, and it isn’t clear how an ocean environment could be "imaginative," or full of imagination. Choice D is incorrect because the text indicates that kelp forests create a calm and safe environment, and an environment that is "surprising" would be characterized by unexpected occurrences, not calmness.

▼ 1.42 — D

Choice D is the best answer because it most logically completes the text’s discussion of the dating of Machu Picchu. In this context, "original" means first or initial. The text indicates that Lucy Salazar and her colleagues have determined the age of Machu Picchu and that the

age differs from another estimate of the site's age, explaining that the site is about 20 years older than scholars thought in 1911 when they initially encountered Machu Picchu. In other words, Salazar and her team found that the site's age differs from the first estimate.

Choice A is incorrect. The text's structure indicates that the missing word describes the estimate made by scholars when they first encountered Machu Picchu in 1911 in relation to the age determined by Salazar and her colleagues. It wouldn't make sense to suggest that the estimate by earlier scholars was "genuine," or actual and true, while the one by Salazar's team wasn't, since the text treats the finding by Salazar's team as true and as invalidating the earlier estimate ("it is approximately 20 years older than scholars thought"). Choice B is incorrect. The text's structure indicates that the missing word describes the estimate made by scholars when they first encountered Machu Picchu in 1911 in relation to the age determined by Salazar and her colleagues. It wouldn't make sense to suggest that the estimate by earlier scholars was "intentional," or done on purpose, while the one by Salazar's team wasn't; the text indicates that Salazar and her colleagues were deliberately using radiocarbon dating to study Machu Picchu. Choice C is incorrect. The text's structure indicates that the missing word describes the estimate made by scholars when they first encountered Machu Picchu in 1911 in relation to the age determined by Salazar and her colleagues. There's no reason to suggest that the estimate by earlier scholars was "independent," or not controlled by or affiliated with others, while the one by Salazar's team wasn't; there's no mention of any outside influence on the work by Salazar and her team or by scholars in 1911.

▼ 1.43 — A

Choice A is the best answer. The expression "reconcile to" means "to cause (a person) to accept something difficult or disagreeable." The text suggests that John wants his mother to accept his desire to travel, even though she doesn't like that idea.

Choice B is incorrect. This doesn't make sense. John doesn't want his mother to apologize for his own desire to travel—he wants her to accept his desire to travel. Choice C is incorrect. The text doesn't suggest that John wants his mother to match his desire to travel. Rather, he wants her to accept his desire to travel even though she doesn't like it. Choice D is incorrect. This is tempting, because it seems to pick up on the idea of people "reconciling" after a fight, but it actually doesn't make sense. The text never suggests that John's mother was "united with" the idea of him traveling in the past—if anything, it seems like she's always been against it. Besides, it would be strange to say that a person "reunites with" a notion.

▼ 1.44 — A

Choice A is the best answer because it most logically completes the text's discussion of the writing system created by Sequoyah. In this context, "widespread" means widely accepted or practiced. The text indicates that because Sequoyah's script accurately represented the spoken sounds of the Cherokee language and was easy to learn, nearly all Cherokee people were able to read and write it soon after it was created. This context demonstrates that the script was widely used by the Cherokee people.

Choice B is incorrect. In this context, "careful" would mean exercised with care and attentive concern. Although the work of creating a writing system likely involved great care, the text indicates that the system was "easy to learn," which conflicts with the idea that using this system requires a noteworthy amount of care. Choice C is incorrect because in this context "unintended" means not deliberate. The idea that using Sequoyah's script was unintentional conflicts directly with the claim that it was easy to learn and used by "over 90% of the Cherokee people" by 1830. In fact, because one had to learn this system, it's not clear how one could use it unintentionally. Choice D is incorrect because in this context "infrequent" means rare or not occurring often, which conflicts directly with the claim that "over 90% of the Cherokee people" were using Sequoyah's script by 1830.

▼ 1.45 — D

Choice D is the best answer because it most logically completes the text's discussion of Carmen Lomas Garza's artistic process. In this context, "inspired by" means influenced by or motivated by. The text refers to how, regardless of the scale of the work, Garza uses her memories of Texas and details from California to create her art. If Garza is basing her work on her direct experiences, then they play a part in her artistic process. This context thus suggests that Garza's art is inspired by the experiences of her childhood in Texas and her current life in California.

Choice A is incorrect because it wouldn't make logical sense to indicate that Garza is "complimented by"—or praised by—something inanimate such as direct experience. Choice B is incorrect because describing Garza as "uncertain about"—or unsure or doubtful of—direct experience would suggest that she had misgivings about it. If Garza were unsure of her experiences, that would suggest that she couldn't recall them, and Garza wouldn't be able to represent direct experience in her art if she were uncertain of the memories or details. Choice C is incorrect because describing Garza as "unbothered by"—or uninterested in—her experience would imply the opposite of what the text suggests about Garza's artistic

process. The text indicates that Garza's art comes from memories of her childhood in Texas and details of her surroundings in California.

▼ 1.46 — B

Choice B is the best answer because it best completes the text's discussion of how viewers respond to colors. The text presents something art scholars have noted and gives the example of people tending to find paintings with blues and greens more appealing than those with yellows and oranges. This context conveys that certain colors are more "attractive to" viewers than other colors are.

Choice A is incorrect because the text indicates only that people tend to find some colors more appealing than others and gives no indication that certain colors are ever "confusing for," or puzzling to, viewers. Choice C is incorrect because the text discusses the relative appeal of certain colors in paintings but gives no indication that any colors would ever be "corrected by" viewers, or somehow fixed or improved by them. Choice D is incorrect because it wouldn't make much sense to say that some colors are more "similar to" viewers than others, which would suggest that colors and viewers are alike to different degrees. Further, the text primarily emphasizes a difference, not a similarity, in how appealing paintings tend to be based on the colors they contain.

▼ 1.47 — C

Choice C is the best answer because it most logically completes the text's discussion of Helen Liu Fong's architectural designs. In this context, "traditional" means conventional. The text states that rather than use "standard shapes and colors," Fong pursued "innovative" and "daring" design choices in her work. Fong's style is depicted as inventive, so it therefore makes sense in this context that she avoided mainstream, traditional designs in her buildings.

Choice A is incorrect because the text indicates that Fong's work is innovative and experimental. Thus, Fong's design choices could reasonably be considered creative, or original. She likely would have pursued creative designs, not avoided them. Choice B is incorrect because the text indicates that Fong used "daring" hues in her designs. Thus, Fong likely would have pursued bold, or brave and vivid design choices; she wouldn't have avoided them. Choice D is incorrect because the text doesn't address whether Fong's designs are understandable, or reasonable or expected. The text focuses on certain characteristics of Fong's designs, not on how people received or understood them.

▼ 1.48 — B

Choice B is the best answer. The text suggests that Mrs. Adam's typical Christmas present from her husband was a vase that cost, or was "priced at," about twelve or fourteen dollars.

Choice A is incorrect. This isn't the meaning of "marked" as used here. It wouldn't make sense to say that a vase was "staged at twelve or fourteen dollars." Choice C is incorrect. This isn't the meaning of "marked" as used here. It wouldn't make sense to say that a vase was "stained at twelve or fourteen dollars." Choice D is incorrect. This isn't the meaning of "marked" as used here. It wouldn't make sense to say that a vase was "watched at twelve or fourteen dollars."

▼ 1.49 — A

Choice A is the best answer because it most logically completes the text's discussion of Nuttall's 1886 research paper. In this context, "acknowledged" means recognized as having a certain status. The text indicates that other researchers recognized Nuttall's work as groundbreaking because of its "convincing demonstration" related to the age of the ancient sculptures. In other words, the researchers recognized the groundbreaking status of Nuttall's work.

Choice B is incorrect because in this context, "ensured" would mean to have guaranteed or made sure something was the case. The text states that other researchers gave Nuttall's work recognition after it was published, but there's no indication that they contributed to the work or had any involvement that would have allowed them to make sure the work would be groundbreaking. Choice C is incorrect because the text doesn't suggest that other researchers "denied," or refused to admit or accept, that Nuttall's work was groundbreaking; on the contrary, it indicates that researchers praised the work, recognizing it as groundbreaking due to its "convincing demonstration" related to the age of the ancient sculptures. Choice D is incorrect because the text doesn't suggest that other researchers "underestimated," or undervalued, Nuttall's work; on the contrary, it indicates that researchers praised the work, recognizing it as groundbreaking due to its "convincing demonstration" related to the age of the ancient sculptures.

▼ 1.50 — B

Choice B is the best answer because it most logically completes the text's discussion of Marilyn Dingle's baskets. In this context, to say that Dingle's baskets are "handmade from" particular plants means that Dingle creates baskets herself using those plants but without

using machines. The text says that Dingle “skillfully winds” parts of palmetto palm plants around sweetgrass plants to make baskets with an appearance that “no factory can reproduce.” This context suggests that Dingle’s baskets are handmade from sweetgrass and palmetto palm.

Choice A is incorrect because the text describes how Dingle uses sweetgrass and palmetto palm to create her baskets, not how her baskets are “indicated by,” or signified by, sweetgrass and palmetto palm. Choice C is incorrect. Although Dingle’s baskets are described as being made using sweetgrass and palm, there’s nothing in the text to suggest that the baskets are “represented by,” or exemplified or portrayed by, sweetgrass and palmetto palm. Instead, the focus of the text is on Dingle’s use of sweetgrass and palmetto palm and the impossibility of replicating the appearance of her baskets using machines. Choice D is incorrect because there’s nothing in the text to suggest that Dingle’s baskets are “collected with,” or brought together in a group with, sweetgrass and palmetto palm. Instead, the text describes how Dingle uses those plants to make her baskets.

▼ 1.51 — A

Choice A is the best answer because as used in the text, “assumed” most nearly means acquired, or came to possess. The text portrays a character named Drowne carving a figure out of wood. At first “irregular and misty,” or haphazard and indistinct, the figure’s outline gradually showed “distincter grace and beauty” until the general design of the carved object “was now obvious to the common eye,” or plainly recognizable to anyone. In other words, as Drowne continued to carve, the wooden object came to possess, or acquired, greater precision, changing from an indistinct outline or shape into a graceful, beautiful, and clearly recognizable form.

Choice B is incorrect. Although in some contexts “assumed” can mean acknowledged, or recognized, it doesn’t have that meaning in this context because an inanimate object like the wooden figure can’t acknowledge its own precision. Choice C is incorrect because there’s nothing in the text to suggest that the wooden figure merely imitated, or mimicked, precision. Rather, the text suggests that as Drowne carved his wooden figure, it gradually became more precise. Choice D is incorrect. Although in some contexts “assumed” can mean speculated, or supposed based on incomplete information, it doesn’t have that meaning in this context because an inanimate object like the wooden figure can’t speculate about its own precision.

▼ 1.52 — D

Choice D is the best answer because as used in the text, "collects" most nearly means gathers or accumulates. In the text, Gogol "collects" (or gathers) rocks and digs in the sand while strolling the beach with his father. Thus, "gathers" is the best answer.

Choice A is incorrect because in this context, "increases" would mean expands or inflates, which is not something a child could logically do to rocks. Rather, the text indicates that Gogol "collects" or gathers rocks while strolling the beach with his father. Choice B is incorrect because in this context, "makes" would suggest that Gogol is creating or manufacturing rocks, which doesn't make sense. Rather, the text indicates that Gogol "collects" or gathers rocks while strolling the beach with his father. Choice C is incorrect because in this context, "ignores" would mean disregards or avoids, but in the text Gogol "collects rocks," which indicates that he's engaging with the rocks, not ignoring them.

▼ 1.53 — A

Choice A is the best answer because it most logically completes the text's discussion of how Bing Xie and her team analyzed plains zebra vocalizations. In this context, "categorize" means to sort into groups based on shared characteristics. The text states that Xie and her team discovered that the vocalizations of plains zebras can be grouped into at least four distinct types: "snorts," "soft snorts," "squeals," and "quagga quagga" calls. According to the text, the team also found that whereas snorts vary from zebra to zebra, squeals are more consistent across zebra populations. The text indicates that the researchers used machine-learning algorithms to arrive at these findings. This context supports the idea that the researchers used the algorithms to categorize recorded vocalizations.

Choice B is incorrect because in this context, "extend" would mean to make longer or greater in size. The text discusses the researchers' use of machine-learning algorithms to study recorded zebra vocalizations and identify patterns among the different types of calls that the researchers had recorded, not to lengthen or increase the size of the recordings. Choice C is incorrect because in this context, "collapse" would mean to break down or combine into a smaller form. The text indicates that the researchers used machine-learning algorithms as part of a process that yielded findings about distinct types of zebra vocalizations, suggesting that the researchers used the algorithms to distinguish among vocalization types, not to combine them. Choice D is incorrect because in this context, "suppress" would mean to hold back or eliminate. The text indicates that the researchers used machine-learning algorithms as part of a process that yielded findings that zebra vocalizations can be classified into four distinct types, not that the researchers used the algorithms to hold back or eliminate the vocalizations themselves.

▼ 1.54 — C

Choice C is the best answer because it most logically completes the text's discussion of Ester Hernandez's art. In this context, "featured" means shown prominently. The text focuses on where Hernandez's works have been and continue to be displayed, explaining that her early works, which consisted of murals, could be viewed in outdoor spaces in San Francisco. The central contrast developed in the text is between where her early works could be viewed and where her works can be viewed now, which is in museums across the United States and around the world. The context therefore supports the idea that Hernandez's works are now shown, or featured, in museums globally.

Choice A is incorrect because in this context "invented" would mean created something for the first time, which isn't supported since the text doesn't discuss where Hernandez creates her works or whether they're original or innovative. Choice B is incorrect because "adjusted" in this context would mean adapted. Although the text mentions that many of Hernandez's early works were outdoor murals and thus it may be reasonable to infer that Hernandez altered her approach to creating art so that her works could be displayed in indoor venues instead, the text makes no mention of how Hernandez's works might have been adapted for such venues. The text focuses on where Hernandez's works have been and continue to be displayed, not on how she or anyone else may have adapted, or adjusted, her works. Choice D is incorrect because "recommended" in this context would mean endorsed or put forth as a suggestion for something that is worth seeing. Although it may be reasonable to say that in choosing to display certain works, museum curators believe such works are worth seeing, the text doesn't discuss the reasons why museums display Hernandez's works. Instead, the text mainly develops a contrast between where Hernandez's early works could once be viewed and where her work can be viewed now.

▼ 1.55 — B

Choice B is the best answer because it most logically completes the text's discussion of Ochoa's prediction that humans will one day need to live in places other than Earth. As used in this context, "speculates" would mean puts forward an idea without firm evidence. The text states that Ochoa "doesn't have a definite idea" about when humans might need to live in other environments and characterizes Ochoa's prediction as a "conjecture," or a conclusion presented without convincing evidence. This context indicates that Ochoa speculates when she makes this prediction.

Choice A is incorrect because saying that Ochoa “demands,” or insists or requires, that humans will one day need to live in other environments than Earth’s would not make sense in context. The text indicates that she’s unsure about the timing but hypothesizes that it will someday happen. Choice C is incorrect because saying that Ochoa “doubts,” or questions or disbelieves, that humans will one day need to live in other environments than Earth’s would not make sense in context. The text indicates that although Ochoa is unsure about the timing, she hypothesizes that humans will need to live in places other than Earth and encourages research into future travel to the moon. Choice D is incorrect because saying that Ochoa “establishes,” or proves, that humans will one day need to live in other environments than Earth’s would not make sense in context. Rather than stating that Ochoa discusses her idea with certainty and supports it with evidence, the text indicates that Ochoa is unsure about when humans might need to live in other environments.

▼ 1.56 — D

Choice D is the best answer because it most logically completes the text’s discussion of painter Alma W. Thomas’s work. In this context, "influenced" means to have had an effect on something’s development. The text indicates that there is a connection between Thomas’s work and the flowers and trees in her home’s garden, giving the example of Thomas’s brushstrokes being inspired by light shining through the leaves of a tree in front of her house. This context conveys that Thomas’s work was influenced by the flowers and trees in the garden.

Choice A is incorrect because the text conveys that Thomas drew inspiration for her work from the plants in her garden, which suggests that the flowers and trees contributed positively to her work, not that they "restricted," or limited, her work. Choice B is incorrect because it wouldn’t make sense to suggest that flowers and trees in a garden could have "announced," or made known, a painter’s work. Choice C is incorrect because the text conveys that Thomas drew inspiration for her work from the plants in her garden, which suggests that the flowers and trees contributed positively to her work, not that they were a distraction. Further, it’s not clear how an artist’s work could itself be "distracted."

▼ 1.57 — A

Choice A is the best answer because as used in the text, "featured" most nearly means displayed. The text describes Nina’s fascination with a framed photograph. It then goes on to describe what the photograph showed, or displayed, which is a portrait of Nina’s great-great-

grandmother Rosita as a young woman. Thus, the text indicates that the photograph displayed a portrait of Rosita.

Choice B is incorrect because the text identifies the person shown in the photograph as Nina's great-great-grandmother; it gives no indication that the contents of the photograph were questioned, or asked about. Choice C is incorrect because approved means expressed a favorable opinion of, and there's nothing to suggest that the photograph of Nina's great-great-grandmother has received approval or been viewed favorably, only that Nina is unable to stop looking at it. Choice D is incorrect because nothing in the text suggests that the photograph Nina is fascinated with ignored, or refused to take notice of, Nina's great-great-grandmother Rosita. Rather, the text indicates that the photograph was a portrait of Rosita.

▼ 1.58 — D

Choice D is the best answer because it most logically completes the text's discussion of the helmets found in Denmark. In this context, "justify" means confirm or give reasons for. The text indicates that scholars have long been skeptical about the supposed Viking origin of two helmets found in Denmark. The radiocarbon dating of the helmets conducted by Vandkilde and colleagues demonstrates that the helmets date from the Nordic Bronze Age, making the helmets too old to have belonged to Vikings. This context supports the idea that the scholars' skepticism is justified.

Choice A is incorrect because "anticipate" means expect or come before, neither of which would make sense in context. The text indicates that scholars have long been skeptical of the idea that the helmets belonged to Vikings. Because the skepticism has existed for a long time, Vandkilde and colleagues' research couldn't be said to anticipate it. Instead, the radiocarbon dating results justify or confirm the scholar's skepticism. Choice B is incorrect because "inspect" means examine or review, which wouldn't make sense in this context. Research findings are inanimate and therefore unable to inspect scholars' skepticism. The text focuses on the origin of two helmets, which some people believe belonged to Vikings. Vandkilde and colleagues found that the helmets are from the Nordic Bronze Age and therefore much older than the Vikings. This context suggests that the researchers' findings justify, not inspect, the scholars' skepticism. Choice C is incorrect because "reveal" means uncover or report, which wouldn't make sense in context. The text focuses on the origin of two helmets, which some people believe belonged to Vikings. Vandkilde and colleagues tested the helmets and found that they date to the Nordic Bronze Age and therefore are much older than the Vikings. This context suggests that the researchers' findings confirm or justify the scholars' skepticism, which was already known so didn't need to be revealed.

▼ 1.59 — A

Choice A is the best answer because it most logically completes the text's discussion of how biodiversity loss due to invasive species can be avoided. As used in this context, "preventable" means able to be stopped or kept from happening. The text indicates that "people can take simple steps" to avoid bringing possible invasive species into new environments. It presents these steps as an example of how biodiversity loss due to invasive species is preventable.

Choice B is incorrect because it wouldn't make sense to say that a simple step like washing your shoes after traveling is an example of biodiversity loss due to invasive species being "undeniable," or something that can't be proved to be wrong. Although the text may suggest that biodiversity loss due to invasive species is something that really happens, the word that completes the text must make the first sentence into an assertion that is illustrated by the second sentence, and the second sentence illustrates the idea that biodiversity loss due to invasive species is preventable, not undeniable. Choice C is incorrect because it wouldn't make sense to say that a simple step like washing your shoes after traveling is an example of biodiversity loss due to invasive species being "common," or something that happens regularly. Additionally, the text doesn't provide any information about how frequently invasive species cause biodiversity loss. Choice D is incorrect because it wouldn't make sense to say that a simple step like washing your shoes after traveling is an example of biodiversity loss due to invasive species being "concerning," or something that is troubling or causes worry. Although the text implies that the phenomenon of biodiversity loss due to invasive species is itself a concerning phenomenon, the word that completes the text must make the first sentence into an assertion that is illustrated by the second sentence, and the second sentence illustrates the idea that biodiversity loss due to invasive species is preventable, not concerning.

▼ 1.60 — B

Choice B is the best answer because it most logically completes the text's discussion of Booker T. Whatley. In this context, "hinder" means hold back or obstruct. The text explains that Whatley encouraged farms to allow customers on site to pick their own produce for a fee. He did so despite critics' concerns that the customers would never pay to do so. This context establishes that the critics' concerns didn't hinder Whatley's efforts to promote the practice.

Choice A is incorrect. The text indicates that critics' skepticism of the idea that customers would pay to pick their own produce didn't have some effect on Whatley's promotion of the practice. The text illustrates this assertion by describing Whatley's "determined advocacy" for the practice. This context suggests that critics' concerns didn't obstruct Whatley's efforts, not that critics' concerns didn't "enhance," or increase or improve, Whatley's efforts. Choice C is incorrect because in this context, "misrepresent" would mean portray inaccurately, and the text includes no information relevant to the issue of how Whatley's efforts were portrayed by critics of the practice of charging customers to pick their own produce. Choice D is incorrect. The text indicates that critics' skepticism of the idea that customers would pay to pick their own produce didn't have some effect on Whatley's promotion of the practice. The text illustrates this assertion by describing Whatley's "determined advocacy" for the practice. This context suggests that critics' concerns didn't obstruct Whatley's efforts, not that critics' concerns didn't "aggravate," or irritate or make more severe, Whatley's efforts.

▼ 1.61 — C

Choice C is the best answer because it most logically completes the text's discussion of repairing the Hubble Space Telescope. In this context, "relying on" means depending on. The text states that astronauts have regularly had to go on missions to repair the Hubble Space Telescope but that robots might soon be able to make the repairs, which would be helpful because involving astronauts in the process is expensive. It is most reasonable to assume that it is the need to send astronauts on missions that is expensive; thus, the context suggests that employing robots for repairs will be helpful because depending on repeatedly sending humans to space is costly.

Choice A is incorrect. In this context, "straightening" would mean physically aligning or removing curves and bends. It's not clear how astronauts would be physically straightened to maintain the telescope or why that would be expensive. Choice B is incorrect because the text suggests that it is the ongoing involvement of astronauts—the need to send them to space regularly—that is expensive. Nothing in the text indicates that astronauts have been forgotten about or that forgetting about them would be expensive. Choice D is incorrect. In this context, "reducing" would most likely mean lowering in status, and nothing in the text suggests that astronauts are diminished in any way by repairing the telescope (indeed, they have regularly done repairs for years). Further, it isn't clear how a decrease in status would be expensive.

▼ 1.62 — C

Choice C is the best answer. "Protect" means "preserve" or "keep safe from." By ensuring that the wilderness areas along the Appalachian Trail can't be sold or developed, the National Trails System Act protects them.

Choice A is incorrect. "Borrow" means "to take something with intent to return it." The text doesn't say anything about taking and returning the wilderness that surrounds the Appalachian Trail. Choice B is incorrect. "Postpone" means "to put off until later." Nothing in the passage suggests that Congress wants to "postpone" the wilderness areas (and that doesn't make sense anyway—they can postpone doing something to the wilderness areas, but they can't postpone the areas themselves). Choice D is incorrect. "Decorate" means "to adorn" or "add extra items or pictures to make more attractive." No details in the text suggest that Congress wishes to make the trail fancier or more attractive.

▼ 1.63 — A

Choice A is the best answer because it most logically completes the text's discussion of how logo shapes affect consumer attitudes toward brands. In this context, "a contributing factor" means an element that helps produce a particular outcome. The text indicates that researchers studied how consumers develop attitudes toward brands and found that logo shape affects those attitudes: rounded logos led consumers to view brands as "significantly more approachable" than angular logos did, even when the brand names were the same. This context supports the idea that logo shape is a contributing factor to consumer attitudes toward brands—that is, it helps influence how consumers perceive brands.

Choice B is incorrect because describing logo shapes as "an analogous case," or an instance comparable to another instance, wouldn't make sense in this context. The text doesn't mention any factor other than logo shape, and thus the text doesn't provide another case (analogous or otherwise) against which to compare the effect of logo shape. Choice C is incorrect because describing logo shapes as "an overlooked effect," or a result that has been disregarded, wouldn't make sense in this context. The text is focused on describing observations about the effect of logo shape on consumer attitudes toward brands, but at no point does it suggest that this effect has been overlooked or disregarded. Choice D is incorrect because describing logo shapes as "a surprising paradox," or a self-contradictory finding, wouldn't make sense in this context. The finding that different logo shapes produce different consumer attitudes is straightforward and doesn't exhibit any internal contradiction.

▼ 1.64 — D

Choice D is the best answer because in context, sharing "similarities with" means having some resemblance to. The text establishes a comparison between two groups of mammals, stating that although they aren't closely related, hedgehog tenrecs and true hedgehogs play similar roles in their habitats, a circumstance that has resulted in the independent development of some of the same physical traits. This context supports the idea that hedgehog tenrecs resemble, or share basic similarities with, true hedgehogs in some respects.

Choice A is incorrect because the text doesn't suggest that hedgehog tenrecs are "examples of," or representative of, true hedgehogs. The text states that despite some shared physical traits, the two groups of mammals aren't closely related; therefore, hedgehog tenrecs can't be examples of true hedgehogs. Choice B is incorrect because in this context, "concerns about" would mean worries about or interests in. The text focuses on the various physical traits that hedgehog tenrecs and true hedgehogs share. There's nothing in the text to suggest why hedgehog tenrecs would be worried about true hedgehogs, or why they would be interested in them. Choice C is incorrect because in this context, "indications of" would mean evidence of. By listing a set of traits that hedgehog tenrecs share with true hedgehogs, the text establishes a comparison between the two groups of mammals, and saying that the traits shared within one group of mammals provide evidence of another group of mammals wouldn't be an effective way to establish the similarities between the two groups.

▼ 1.65 — C

Choice C is the best answer because it most logically completes the text's discussion of the play's effect on audiences. As used in this context, "rousing" means exciting or energizing. The text indicates that critics found the play to have "the opposite effect" on audiences of what the playwrights hoped for. The critics, the text says, thought the play was wearying rather than energizing to viewers. This context supports the idea that the playwrights hoped live performances of the play would be energizing, or rousing, to audiences.

Choice A is incorrect because there's no information in the text suggesting that the playwrights hoped live performances of the play would be "multifaceted," or be varied or have many aspects. The text indicates that critics found the play to be wearying to audiences and that this was the opposite of what the playwrights hoped for. Multifaceted is not the opposite of wearying, but rousing is, which suggests that the playwrights hoped the play would be rousing. Choice B is incorrect because there's no information in the text suggesting that the playwrights hoped live performances of the play would be "realistic," or lifelike or

sensible. The text says that critics found the play to be wearying to audiences and that this was the opposite of what the playwrights hoped for. Realistic is not the opposite of wearying, but rousing is, which suggests that the playwrights hoped the play would be rousing. Choice D is incorrect because there's no information in the text suggesting that the playwrights hoped live performances of the play would be subtle, or complex or understated. The text says that critics found the play to be wearying to audiences and that this was the opposite of what the playwrights hoped for. Subtle is not the opposite of wearying, but rousing is, which suggests that the playwrights hoped the play would be rousing.

▼ 1.66 — A

Choice A is the best answer. "Stimulated" means "encouraged interest or increased activity in." Because the newspapers discussed the benefits of westward migration and "inspired readers to relocate," we can infer that they encouraged people to move west.

Choice B is incorrect. "Assigned" means "gave a job or duty." Newspapers do not have the power to assign people to move west, although they can encourage it. Choice C is incorrect. "Opposed" means "disapproved of." We can tell that this isn't the case, because the newspapers discussed "the easy fortunes and high salaries miners could make in California" and "inspired readers to relocate." Choice D is incorrect. "Disregarded" means "ignored." If the newspapers are writing about the west and "inspir[ing] readers to relocate," they can't be ignoring it at the same time.

▼ 1.67 — A

Choice A is the best answer because it most logically completes the text's discussion of Ronyoung Kim's novel *Clay Walls*. In this context, "distinct" means clearly separate and different. The text indicates that the novel consists of three sections and that each section is narrated from the perspective of a different character. This context supports the idea that Kim's novel features three distinct perspectives.

Choice B is incorrect because describing the three perspectives in Kim's novel as "required," or demanded as necessary to be done or provided, wouldn't make sense in context. When writing a novel, a novelist is free to choose to narrate the story from any number of perspectives. There's nothing in the text to indicate that providing three perspectives was demanded of Kim. Instead, the text focuses on identifying the three different perspectives featured in Kim's novel. Choice C is incorrect because describing the three perspectives in Kim's novel as "unintended," or not planned as a purpose or goal, wouldn't make sense in context. Authors make deliberate choices about the perspectives they feature in their works,

and the text indicates that Kim chose to incorporate three different perspectives in her novel. Choice D is incorrect because describing the three perspectives in Kim's novel as "unknown," or not revealed, wouldn't make sense in context. The text directly identifies the three perspectives that appear in her novel as those of Faye and her two parents, Haesu and Chun, which indicates that the novel's perspectives are in fact known.

▼ 1.68 — D

Choice D is the best answer because it most logically completes the text's discussion of the fashion resale market's continued growth. As used in this context, "predicted" means forecast, or indicated that something would happen in the future. The text indicates that the fashion resale market made a lot of money in 2019 and that some analysts expected the market to continue to grow. This context suggests that the analysts believed that the fashion resale market was going to make more money than it had already made, with the analysts indicating that revenues would more than double by 2028.

Choice A is incorrect because it wouldn't make sense in context to say that some analysts "produced," or manufactured or brought about, the increase in future revenues of the fashion resale market. The analysts themselves couldn't have brought about the future revenue growth, since, as the text suggests, they were merely in the position of drawing conclusions about future fashion resale market revenue based on 2019 revenue. Choice B is incorrect because the text indicates that some analysts expected the fashion resale market to continue to grow in the future, not that they "denied," or rejected, this notion. Nothing in the text supports the idea that these analysts thought the revenues wouldn't grow. Choice C is incorrect because the text indicates that some analysts expected the fashion resale market to continue to grow in the future, not that they "worried," or felt concerned, that revenue would significantly increase by 2028. Nothing in the text suggests that the analysts felt concerned about the increase; rather, the text suggests that the increase would represent a favorable outcome, since it would mean that the fashion resale market grew to generate even more revenue.

▼ 1.69 — D

Choice D is the best answer because as used in the text, "receiving" most nearly means hearing, or perceiving sound. The text describes Mr. Spring Fragrance as he reads a newspaper, focusing on his eyes and ears. While his eyes look at the newspaper, he is unwillingly distracted by words coming through a nearby open window (that is, "his ears could not help receiving the words"). The words are being perceived specifically by his ears and not

his eyes, and ears are the organs of sense with which one hears, so therefore Mr. Spring Fragrance is hearing the words through the open window.

Choice A is incorrect because there is no indication in the text that Mr. Spring Fragrance is denying, or refusing the truth of, the words coming to him through the window. He is merely distracted by them. Choice B is incorrect because it wouldn't make sense to say that Mr. Spring Fragrance's ears couldn't help entering, or coming into, the words coming to him through the window. Instead, the text indicates that the opposite occurs: that is, when Mr. Spring Fragrance hears the words, they enter his ears, but his ears don't enter the words. Choice C is incorrect because it doesn't make sense in this context to think of Mr. Spring Fragrance as carrying the words coming to him through the window, even though the word "carry" can have a number of different meanings depending on context: for example, he is not lifting them, he is not supporting them, and he is not accepting blame for them (as one "carries the blame" for a mistake).

▼ 1.70 — A

Choice A is the best answer because it most logically completes the text's discussion of environmental management along the US and Mexican border. In this context, "requires" means needs in order to perform a task. The text indicates that because ecosystems span the border, actions taken by the government on one side of the border can affect the environment in the nation on the other side of the border, which makes international cooperation crucial. In other words, because actions on one side of the US and Mexican border can affect the other side of the border, managing environmental matters along the border requires coordination between the two governments.

Choice B is incorrect because "praises" in this context would mean to express a favorable judgment, but the text doesn't describe approval expressed by anyone, and it wouldn't make sense to say that environmental management itself praises intergovernmental coordination. Choice C is incorrect. In this context, "reports" would mean gives an account. Although coordination between the US and Mexican governments likely would involve some sort of reporting, the text doesn't describe any such practice. Choice D is incorrect. In this context, "advises" would mean recommends a course of action, and although governments can advise one another, it wouldn't make sense to say that environmental management itself makes recommendations.

▼ 1.71 — C

Choice C is the best answer because it most logically completes the text's discussion of the preservation efforts undertaken by Erika Karuzas and the Confederated Salish and Kootenai Tribes of Montana. In this context, "promote" means play a part in the success or growth of something or someone. The text indicates that Karuzas and the Confederated Salish and Kootenai Tribes work to preserve culturally important sites. It goes on to say that their decision to create a national trail connecting the sites was motivated by the fact that such a trail would receive protections from the US government that the sites wouldn't otherwise receive. Thus, such a decision would promote the preservation efforts.

Choice A is incorrect because "inspire" means motivate or influence, which wouldn't make sense in context. The text establishes that Karuzas and the Confederated Salish and Kootenai Tribes of Montana work to preserve culturally significant sites and that their decision to create a new national trail occurred as a result of a desire to add protections to the sites that they wouldn't otherwise receive. Thus, creating the trail wouldn't inspire the efforts to preserve the sites; instead, it would promote the efforts. Choice B is incorrect because "ignore" means overlook, which wouldn't make sense in context. The text indicates that Karuzas and the Confederated Salish and Kootenai Tribes of Montana work to preserve culturally significant sites and that they decided to create a national trail connecting the sites because such a trail would receive protections from the US government that the sites wouldn't otherwise receive. Thus, the creation of the trail would promote, not ignore, the preservation efforts. Choice D is incorrect because "reduce" means decrease or restrict, which wouldn't make sense in context. The text indicates that Karuzas and the Confederated Salish and Kootenai Tribes of Montana work to preserve culturally significant sites and that they decided to create a national trail connecting the sites because such a trail would receive protections from the US government that the sites wouldn't otherwise receive. The decision would therefore promote, not reduce, the preservation efforts.

▼ 1.72 — A

Choice A is the best answer because as used in the text, "soft" most nearly means gentle. The text portrays Alice speaking about the snow falling against the window, describing it as sounding "nice" and similar to someone "kissing the window." These details most strongly suggest that Alice thinks the sound made by the snow falling against the window is gentle.

Choice B is incorrect. Although in some contexts, "gentle" can mean sensitive, or caring about others' feelings, that isn't the meaning in this context; it doesn't make sense to say that Alice thinks the sound of the snow cares about anything. Choice C is incorrect because the text doesn't suggest that Alice thinks the sound of the snow is shapeless, or lacks a

definite shape; she isn't indicating how anything looks or feels but, rather, is describing how "nice" and gentle the snow sounds. Choice D is incorrect because the text doesn't suggest that Alice thinks the sound of the snow is bland, or uninteresting; rather, she notices the sound and comments on how "nice" it is.

▼ 1.73 — C

Choice C is the best answer because as used in the text, "invent" most nearly means create or make up. The text begins by stating that Sara likes to tell stories and thoroughly enjoys telling them. The rest of the text describes how she looks and acts when she invents, or creates, "wonderful things" in her stories ("what she told").

Choice A is incorrect. Although the text suggests that Sara makes up "wonderful things," nothing suggests that she does so to mislead, or intentionally deceive, others; there is no reason to assume that Sara's listeners don't know that she's creating the stories she shares. Choice B is incorrect because nothing in the text suggests that Sara is disguising, or trying to cover up or conceal, "wonderful things" when she tells stories; rather, she is creating them and presenting them in ways that make them "lovely or alarming" for her listeners. Choice D is incorrect because nothing in the text suggests that Sara is discovering, or unexpectedly finding, "wonderful things" in the stories she loves to tell; rather, that she is making things up as she tells the stories.

▼ 1.74 — A

Choice A is the best answer because as used in the text, "drew" most nearly means pulled. In the text, the speaker stands at a window, looking out on a landscape at night. The speaker then "drew the shades far down, crept into bed." That is, the speaker pulled down, or lowered, the shades until they were completely shut before going to sleep.

Choice B is incorrect. Although in some contexts, "drew" can refer to draining or removing liquid, especially water, as when someone draws water from a well, in this context it refers to the speaker pulling down window shades for the night. Choice C is incorrect. In some contexts, "drew" can be used to describe how a person or thing inspires, or elicits, a response from someone, as when a performer draws applause from an audience. But in this context it refers to the speaker pulling down window shades for the night. Choice D is incorrect. Although "drew" has several meanings, including sketched, or illustrated with a pen or pencil, in this context it refers to the speaker pulling down window shades for the night.

▼ 1.75 — D

Choice D is the best answer because as used in the text, "clear" most nearly means transparent, or see-through. Muir states that the water beneath the boat "was so clear that it was almost invisible," suggesting that those on the boat were able to see through the water and easily observe plants and fish below the surface.

Choice A is incorrect. In some contexts "clear" can mean "simple," or uncomplicated, but Muir is describing the water, and water isn't typically described as either simple or complicated. Muir emphasizes the water's transparency, not its simplicity. Choice B is incorrect. In some contexts "clear" can mean "understandable," or reasonable or easily comprehended, but Muir is describing the water, and it doesn't make much sense to describe water as understandable. Muir emphasizes the water's transparency, not how easily the water can be understood. Choice C is incorrect. Although "clear" can mean "obvious," or easily seen or understood, in some contexts, Muir's description emphasizes that the water "was almost invisible" and that the boat seemed to be "sustained in the air," suggesting that the water was almost impossible to see, not that it was obvious.

▼ 1.76 — A

Choice A is the best answer because it most logically completes the text's discussion of programs that encourage money to cycle within a community. In this context, "instituting" means initiating. The text indicates that making purchases at small local businesses can help keep money cycling within a community. The text goes on to state that some cities are establishing incentives to promote small business shopping. This context supports the idea that some cities are instituting programs to encourage this consumer behavior.

Choice B is incorrect because saying that some cities are "occupying," or forcibly holding possession or control of, programs that encourage shoppers to make purchases at small local businesses wouldn't make sense in context. The text doesn't discuss who controls these programs but instead indicates that some cities are establishing incentives that encourage shoppers to make purchases at small local businesses. Furthermore, it wouldn't make sense to say that a city is occupying a program. Choice C is incorrect because nothing in the text suggests that cities are "underestimating," or failing to understand the value of, programs that encourage consumers to shop at small local businesses. The text indicates that some cities are establishing incentives to encourage small business shopping, which suggests that these cities understand the value of such programs. Choice D is incorrect because saying that some cities are "encountering," or coming into contact with, programs that encourage consumers to shop at small local businesses wouldn't make sense in context. The text indicates that some cities are already establishing incentives to encourage

shoppers to make purchases at small businesses. This context suggests that the cities are instituting the programs, not that they are encountering them.

▼ 1.77 — C

Choice C is the best answer because as used in the text, “simply” most nearly means easily, or involving minimal difficulty or effort. The text first provides Alice’s reflections on her plan to gain access to a garden and then offers commentary on her plan by the novel’s narrator. The text indicates that a reason Alice likes her plan despite not being fully thought through is that she nonetheless believes it can be efficiently arranged. In other words, the text indicates that one of the supposed benefits of Alice’s plan is that it can be easily arranged.

Choice A is incorrect because the text describes how Alice’s plan can be arranged, and it wouldn’t make sense to say that it can be arranged “faintly,” or with little strength or not strongly. Instead, the text indicates that the plan can be arranged with little difficulty. Choice B is incorrect. Although in some contexts “simply” can mean quickly, hastily, or hurriedly, the word “hastily” indicates that something is done too quickly. Although it may be true that Alice’s plan was made in haste, the text doesn’t focus on this aspect of her plan. Instead, the text focuses on the plan’s seemingly good qualities, saying that Alice thinks of it as “the best,” and the narrator refers to it as “excellent” and “neatly,” or efficiently, arranged. Choice D is incorrect. Although in some contexts “simply” can mean foolishly, or lacking good sense, it doesn’t have this meaning in this context. Although the text says that Alice doesn’t know how to go about her plan, it begins by presenting her plan in a positive light: Alice describes her plan as “the best,” and the narrator refers to the plan as “excellent” and “neatly,” or efficiently, arranged.

▼ 1.78 — D

Choice D is the best answer because as used in the text, “I couldn’t be stopped” most nearly means the author seemed to talk all the time. The text establishes that the author is discussing her early speaking habits, stating, “When I started to talk on my own, I couldn’t be stopped.” The following sentences provide context that clarifies the significance of this statement: her sister’s friends “could hardly stand to ride to school” with the author because she “was loud and unrelenting.” This suggests that once the author began speaking, she talked all the time—to the point of annoying others.

Choice A is incorrect because although the phrase “I couldn’t be stopped” could potentially refer to physical movement, the context clearly establishes that the author is discussing her talking habits, not her inability to sit still. The text specifically mentions that she “was loud

and unrelenting” and that her sister’s friends disliked riding in the car with her, suggesting that the issue was excessive talking, not physical restlessness. Choice B is incorrect because nothing in the text suggests that the author was fickle or frequently changed her mind. In this context, the phrase “I couldn’t be stopped” refers to the author’s persistent talking, as signaled by her characterization as “loud and unrelenting.” Choice C is incorrect because the text doesn’t indicate that the author was popular or well liked as a child. In fact, it suggests the opposite by stating that her sister’s friends “could hardly stand” to ride in the car with her. Because of her excessive talking, in other words, people found the author annoying as a child.

▼ 1.79 — C

Choice C is the best answer because as used in the text, “endure” most nearly means tolerate. In the text, Cecily and Algernon discuss parting, or saying goodbye. Cecily remarks on the deep pain of saying goodbye to people whom one has only known briefly and then comments on the equanimity, or calm steadiness, one experiences when separated from old friends. The text sets up an ironic contrast: one can easily tolerate, or put up with, the absence of close friends, but even a very short separation from a new acquaintance is unbearable.

Choice A is incorrect. Nothing in the text suggests that Cecily associates regret, or a feeling of sorrow, with the absence of old friends. Rather, the text sets up an ironic contrast between the feeling of calm steadiness one feels when separated from old friends and the unbearable pain of being separated from new acquaintances. Choice B is incorrect. Although in some contexts “endure” can mean persist, or proceed stubbornly, it doesn’t have that meaning in this context because what is being endured is the absence of old friends. Whereas one can persist *despite* the absence of someone else, one can’t persist the absence itself. Choice D is incorrect because the text doesn’t convey that Cecily encourages, or urges, old friends to be absent. Although it may be that Cecily prefers new acquaintances to friends she has known for a long time, the text focuses on her feelings as a result of others’ absences, not on her treatment of others.

▼ 1.80 — B

Choice B is the best answer because it most logically completes the text’s discussion of ways to detect people through walls. In this context, "inexpensive" means less costly or low in price. The passage describes two kinds of methods that can be used to "detect objects or people through walls": radar and sonar, and changes to the Wi-Fi technology used in

smartphones. The word "comparatively" before the blank indicates that the best answer would be one that helps to describe a comparison between the two. Radar and sonar are described as "costly," while the method that uses Wi-Fi technology is described as "cheap"; therefore, it would be comparatively affordable, or inexpensive.

Choice A is incorrect because the text indicates that a small modification to the smartphones that many consumers already own would presumably result in consumers using that technology to detect objects or people through walls more regularly, or frequently; therefore, it would not be true that such technology would be comparatively infrequent, or uncommon. Choice C is incorrect because there is nothing in the text to indicate that either radar and sonar or changes to smartphone Wi-Fi technology are capable of being misunderstood or mistaken for something else; therefore, it would not make sense to describe changes to Wi-Fi smartphone technology as comparatively unmistakable, or indisputable. Choice D is incorrect because the text indicates that a small modification to the smartphones that many consumers already own and carry with them would be more functional or practical than radar and sonar, not more impractical, or unrealistic.

▼ 1.81 — B

Choice B is the best answer because it most logically completes the text's discussion of the contributions of the Sumerian civilization. In this context, "introduced" means brought into practice or use. The text states that the first reference to a seven-day week appears in the Sumerian *Epic of Gilgamesh*. The text presents this information about the seven-day week as an example of a concept introduced by the Sumerian civilization that persists into present-day civilizations.

Choice A is incorrect because nothing in the text suggests that the Sumerian civilization "transformed," or changed the nature of, concepts that persist into present-day civilizations. Instead, the text's presentation of a Sumerian literary work that contains the first description of the seven-day week is an example of the phenomenon described in the first half of the sentence, suggesting that the Sumerians invented many concepts that still persist. Choice C is incorrect because the information that a Sumerian literary work includes the first description of the seven-day week suggests that Sumerian civilization may have originated the seven-day week and other concepts that persist into present-day civilizations, not that it "inherited" the concepts, or received them from an ancestral figure or culture. Choice D is incorrect because the information that Sumerian civilization produced the first description of the seven-day week is presented as an example of the phenomenon described in the first half of the sentence, suggesting that Sumerian civilization originated this and other concepts

that still persist, not that the Sumerians "overlooked," or failed to notice or consider, such concepts.

▼ 1.82 — C

Choice C is the best answer because it most logically completes the text's discussion of John Ashbery's poems. As used in this context, "interpret" would mean decipher the meaning of. The text indicates that Ashbery's poems have many unusual features, that it's difficult to tell what exactly the poems' subject matter is, and that scholars strongly disagree about the poems. This context conveys the idea that it's difficult to interpret Ashbery's poems.

Choice A is incorrect because "delegate" means to assign someone as a representative of another person or to entrust something to someone else, neither of which would make sense in context. The text is focused only on the difficulty that readers have interpreting Ashbery's poems due to their many unusual features; it doesn't suggest anything about the poems being difficult to delegate. Choice B is incorrect because describing Ashbery's poems as difficult to "compose," or put together or produce, would make sense only if the text were about Ashbery's experience of writing the poems. It could be true that it was difficult for Ashbery to compose his poems, but the text doesn't address this; it instead discusses how readers interpret and engage with the poems. Choice D is incorrect because describing Ashbery's poems as being difficult to "renounce," or give up or refuse, wouldn't make sense in context. The text focuses on the idea that features of Ashbery's poems are odd or unclear and have caused heated scholarly debate. This context suggests that the poems are difficult to interpret, not that the poems are difficult to renounce.

▼ 1.83 — C

Choice C is the best answer because it most logically completes the text's discussion of Annie Dodge Wauneka's work as a Navajo Nation legislator. As used in this context, "persistent" means existing continuously. The text states that Wauneka "continuously worked to promote public health," traveling extensively and authoring a medical dictionary; this indicates that Wauneka's effort was persistent.

Choice A is incorrect because describing Wauneka's effort related to public health as "impartial," or not partial or biased and treating all things equally, wouldn't make sense in context. The text suggests that Wauneka's continuous work was partial in one way, as she focused specifically on promoting public health throughout the Navajo homeland and to speakers of the Navajo language. Choice B is incorrect because the text emphasizes that Wauneka's effort to promote public health as a Navajo Nation legislator was continuous and

extensive, involving wide travels and the authoring of a medical dictionary. Because this work clearly involved care and dedication, it wouldn't make sense to describe it as "offhand," or casual and informal. Choice D is incorrect because nothing in the text suggests that Wauneka's effort to promote public health was "mandatory," or required by law or rule, even though Wauneka was a Navajo Nation legislator. Rather than suggesting that Wauneka's effort was required for any reason, the text emphasizes the continuous and extensive nature of her work.

▼ 1.84 — D

Choice D is the best answer. "Demonstrating" means "showing," and the text describes how de Santana disproved a previous belief in only one species of electric eel by showing that three electric eel species actually exist.

Choice A is incorrect. Pretending that there are three species of electric eel might be a fun game for marine biologists, but it wouldn't prove the existence of more than one species. Choice B is incorrect. Complaining won't prove anything about eels, so de Santana could not have proved wrong the idea of only one species of electric eel by complaining about it. Choice C is incorrect. "Requiring" means "needing." It wouldn't make sense to say that de Santana "needed" there to be three distinct species of electric eel.

▼ 1.85 — D

Choice D is the best answer because it most logically completes the text's discussion of the initial spread of silk beyond China. In this context, "contradicted" means opposed or challenged. The text indicates that new archaeological evidence about silk use in South Asia has done something to a long-held thought about the initial spread of silk. According to the text, the new evidence reveals that people used silk in South Asia 1,000 years before the second century CE, which directly challenges the previous belief that silk first spread beyond China in the second century CE.

Choice A is incorrect because the text indicates that an archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and it wouldn't make sense to suggest that the finding could have "investigated," or examined, a belief; evidence can't examine anything. Choice B is incorrect because the text indicates that an archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and it wouldn't make sense to suggest that the finding could have "misinterpreted," or incorrectly understood, a belief; evidence can't try to understand anything. Choice C is incorrect. In this context, "anticipated" would mean expected or

predicted. The text indicates that a new archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and a new finding can't predict a belief that is already established.

▼ 1.86 — C

Choice C is the best answer because it most logically and precisely completes the text's discussion of the fossil record from the Cambrian period. In this context, "abrupt" means sudden. The text explains that the fossil record reflects the unexpected appearance and rapid diversification, or increase in variety, of animal remains during the Cambrian period. This context establishes that these remains' entry into the fossil record was sudden.

Choice A is incorrect. Although the word "explosion" appears in the name of the event marked by the fossil record change, the text never suggests that the change was "catastrophic," or disastrous. In context, "explosion" refers to the rapid diversification, or the swift increase in variety, of animal remains in the fossil record—a phenomenon that the text presents in a relatively neutral manner, without commenting on whether it was negative or positive. Choice B is incorrect because the text never suggests that the change toward greater diversification is "elusive," or difficult to locate, in the fossil record. Rather, the text notes that the change occurred about 541 million years ago, suggesting that scientists have indeed been able to locate it. Choice D is incorrect because it wouldn't make sense in context to describe the change in the fossil record as "imminent," or about to occur, since the text indicates that the change already occurred millions of years ago.

▼ 1.87 — C

Choice C is the best answer because it most logically completes the text's discussion of the conservationists' efforts to increase Azores bullfinch's numbers. In this context, "successful" means accomplishing a goal or purpose. According to the text, conservationists planted more than 500,000 native trees in an Azores bullfinch habitat in order to boost the bird's population size. The text then indicates that the population size did indeed grow as a result of the planted trees. Thus, in this context, the conservationists' approach of planting native trees was successful because it achieved the goal of increasing the bird's population size.

Choice A is incorrect because the text gives no indication that the conservationists' approach of planting native trees to increase Azores bullfinch's numbers was "amusing," or comical or entertaining. Instead, the approach was seriously undertaken and ultimately accomplished. Choice B is incorrect because the text doesn't address how much it cost to achieve the goal of planting native trees to increase Azores bullfinch's numbers. The text

indicates that the approach was beneficial and successful rather than "costly," or expensive or harmful. Choice D is incorrect. According to the text, the conservationists' approach of planting native trees to increase Azores bullfinch's numbers was beneficial and successful rather than "disastrous," or damaging or unsuccessful.
