Choice A is incorrect. The sentence mentions that Monkman's painting was completed in 2019 and Leutze's was completed in 1851; it doesn't emphasize a similarity between the two paintings. Choice B is incorrect. While the sentence acknowledges that one painting was inspired by the other, it emphasizes differences between the two paintings; it doesn't emphasize a similarity between them. Choice D is incorrect. The sentence mentions a difference between the two paintings; it doesn't emphasize a similarity between them.

▼ 2.3 — D

Choice D is the best answer. The sentence emphasizes a difference between surface-dwelling and cave-dwelling tetras, noting that while surface-dwelling tetras can see, cave-dwelling tetras can't.

▼ 2.8 — A

Choice A is the best answer. The sentence makes and supports a claim about Iberian orca behavior, claiming that the orcas' destructive behavior may be the result of understimulation and citing as support the fact that as orcas have spent less time hunting (a stimulating activity), encounters with vessels have increased.

Choice B is incorrect. While the sentence makes a claim about an orca deterrent, it misrepresents information from the notes. The workshop advised avoiding orcas pending further testing of TAST's efficacy; it didn't claim that TAST was effective. Choice C is incorrect. The sentence describes a workshop that addressed the orcas' behavior; it doesn't make or support a claim about their behavior. Choice D is incorrect. While the sentence does make a claim about orcas' hunting behavior, it misrepresents information from the notes; the notes state that increased tuna populations have reduced orcas' hunting time by 99%, not that tuna populations have increased by 99% because of the orcas' behavior.

In addition, it provides a simple definition of leporellos, making this an inappropriate choice for an audience already familiar with leporellos. Choice D is incorrect.
