Rationales

▼ 2.1 — C

Choice C is the best answer. “Consequently” logically signals that the information in this sentence—that many individual gold prospectors gave up their fortune-hunting dreams and became employees of mining companies—is a result or consequence of the previous information about the inaccessibility of the state’s gold deposits.

Choice A is incorrect because “furthermore” illogically signals that the information in this sentence merely adds to the previous information about the inaccessibility of the state’s gold deposits. Instead, it’s a result or consequence of that information. Choice B is incorrect because “still” illogically signals that the information in this sentence offers a contrast or exception to the previous information about the inaccessibility of the state’s gold deposits. Instead, it’s a result or consequence of that information. Choice D is incorrect because “next” illogically signals that the information in this sentence is the next step in a process. Instead, it’s a result or consequence of the previous information about the inaccessibility of the state’s gold deposits.

▼ 2.2 — D

Choice D is the best answer. This sentence is arguing that new evidence contradicting popular beliefs about “tulip mania” should cast doubt on those beliefs. “Therefore” is a cause-and-effect transition, which fits perfectly in this context.

Choice A is incorrect. This choice uses an exemplification transition, which doesn’t make sense here. Skepticism about the popular beliefs is not an example of recent evidence contradicting those beliefs—rather, skepticism is an effect of that recent evidence. Choice B is incorrect. This choice uses a disagreement transition. But this sentence doesn’t disagree with the previous sentence. Instead, it connects a cause from the previous sentence (new evidence that tulip mania was not as disastrous as thought) to an effect (that we should look with skepticism upon the myth about its disastrousness). Choice C is incorrect. This choice uses a disagreement transition. But this sentence doesn’t disagree with the previous sentence. Instead, it connects a cause from the previous sentence (new evidence that tulip mania was not as disastrous as thought) to an effect (that we should look with skepticism upon the myth about its disastrousness).

▼ 2.3 — A

Choice A is the best answer. “Hence” logically signals that the information in this sentence—that geologists couldn’t confirm the theory of cyclical Ice Ages until the 1960s—is a consequence of the previous information about the destructiveness of each Ice Age and the erasure of necessary geological evidence.

Choice B is incorrect because “moreover” illogically signals that the information in this sentence is merely additional to the previous information about the destructiveness of each Ice Age. Instead, the sentence identifies a specific consequence of that information. Choice C is incorrect because “nevertheless” illogically signals that the information in this sentence is true despite the previous information about the destructiveness of each Ice Age. Instead, the sentence identifies a specific consequence of that information. Choice D is incorrect because “next” illogically signals that the information in this sentence is the next step in a process. Instead, the sentence identifies a specific consequence of the previous information.

▼ 2.4 — D

Choice D is the best answer. “Sometimes” logically signals that the information in this sentence—that words retained much of their original sound—describes an occasional exception, elaborating on the previous statement that the evolution of words to sound very different from their proto-language origins “wasn’t always the case.”

Choice A is incorrect because “however” illogically signals that the information about words retaining much of their original sound contrasts with the previous statement. Instead, the sentence describes an occasional exception, elaborating on the previous statement that the evolution of words to sound very different from their proto-language origins “wasn’t always the case.” Choice B is incorrect because “moreover” illogically signals that the information about words retaining much of their original sound merely adds to the previous statement. Instead, the sentence describes an occasional exception, elaborating on the previous statement that the evolution of words to sound very different from their proto-language origins “wasn’t always the case.” Choice C is incorrect because “thus” illogically signals that the information about words retaining much of their original sound is a result or consequence of the previous statement. Instead, the sentence describes an occasional exception, elaborating on the previous statement that the evolution of words to sound very different from their proto-language origins “wasn’t always the case.”

▼ 2.5 — D

Choice D is the best answer. "Likewise" logically signals that the information about Albert’s son David is similar to the previous information about Albert Popa. Both artists have used unconventional surfaces for their work: Albert used concrete, and David is using ice floes.

Choice A is incorrect because "however" illogically signals that the information about David contrasts with the previous information about Albert Popa. Instead, it is similar to the

previous information about Albert Popa. Choice B is incorrect because "indeed" illogically signals that the information about David emphasizes or strengthens the previous point about Albert Popa. Instead, it is similar to the previous information; it highlights a similarity between father and son. Choice C is incorrect because "second" illogically signals that the information about David is a second point or reason separate from the previous information about Albert Popa. Instead, it is similar to the previous information; it highlights a similarity between father and son.

▼ 2.6 — D

Choice D is the best answer. “Additionally” logically signals that the painting analysis discussed in this sentence is an additional part of the botany research discussed in the previous sentence. That is, to research which fruits Umbrians grew in the past, the botanist analyzes old paintings in addition to looking at old lists of ingredients.

Choice A is incorrect because “in sum” illogically signals that the painting analysis discussed in this sentence is a concluding summary of the botany research discussed in the previous sentence. Instead, the painting analysis is an additional part of that research. Choice B is incorrect because “instead” illogically signals that the painting analysis discussed in this sentence is an alternative to the botany research discussed in the previous sentence. Rather, the painting analysis is an additional part of that research. Choice C is incorrect because “thus” illogically signals that the painting analysis discussed in this sentence is a result of the botany research discussed in the previous sentence. Instead, the painting analysis is an additional part of that research.

▼ 2.7 — A

Choice A is the best answer. “Still” logically signals that the information about Sher-Gil in this sentence—that she longed to leave Paris and return to India—contrasts with what one would expect after reading about Sher-Gil’s experiences in Paris in the previous sentences.

Choice B is incorrect because “therefore” illogically signals that the information about Sher-Gil in this sentence is a result or consequence of the descriptions in the previous sentences. Instead, this information contrasts with what one would expect after reading about Sher-Gil’s experiences in Paris. Choice C is incorrect because “indeed” illogically signals that the information about Sher-Gil in this sentence offers additional emphasis in support of the descriptions in the previous sentences. Instead, this information contrasts with what one would expect after reading about Sher-Gil’s experiences in Paris. Choice D is incorrect because “furthermore” illogically signals that the information about Sher-Gil in this

sentence offers additional support for or confirmation of the descriptions in the previous sentences. Instead, this information contrasts with what one would expect after reading about Sher-Gil's experiences in Paris.

▼ 2.8 — A

Choice A is the best answer. "Then" indicates that the events in this sentence took place after the events in the previous sentence. Only after users upload images of unknown soldiers can those images be analyzed.

Choice B is incorrect. This transition is used to emphasize the truth of a statement that modifies the previous statement. But this sentence doesn't modify the step described in the previous statement: instead, it introduces an entirely new step in the process. So "in fact" wouldn't make sense here. Choice C is incorrect. This choice uses a transition that indicates the addition of a new but related idea, which doesn't make sense here. Analyzing the physical features in the uploaded photographs isn't a similar idea, but rather the next step in the process. Choice D is incorrect. This choice uses an exemplification transition, which doesn't make sense here. Analyzing physical features is not an example of uploading and tagging an image.

▼ 2.9 — A

Choice A is the best answer. "By contrast" logically signals that the information in this sentence—that paper scraps left over from printing a magazine are pre-consumer waste—contrasts with the previous information about magazines being post-consumer waste.

Choice B is incorrect because "for example" illogically signals that the information in this sentence exemplifies the previous information about post-consumer waste. Instead, the paper scraps being pre-consumer waste contrasts with the previous information. Choice C is incorrect because "as a result" illogically signals that the information in this sentence is a result or consequence of the previous information about post-consumer waste. Instead, the paper scraps being pre-consumer waste contrasts with the previous information. Choice D is incorrect because "specifically" illogically signals that the information in this sentence provides specific, precise details elaborating on the previous information about post-consumer waste. Instead, the paper scraps being pre-consumer waste contrasts with the previous information.

▼ 2.10 — D

Choice D is the best answer. “Second” logically signals that the information in this sentence—that the effort to bury the ship would likely only have been made for a king—joins the information in the previous sentence (“first⋯”) in supporting Brunning’s claim that the burial site was likely the tomb of a king.

Choice A is incorrect because “instead” illogically signals that the information in this sentence presents an alternative or substitute to the previous information about the gold artifacts inside the ship. Rather, this sentence presents a second piece of information that supports Brunning’s claim. Choice B is incorrect because “still” illogically signals that the information in this sentence exists in contrast to or despite the previous information about the gold artifacts inside the ship. Instead, this sentence presents a second piece of information that supports Brunning’s claim. Choice C is incorrect because “specifically” illogically signals that the information in this sentence specifies or elaborates on the previous information about the gold artifacts inside the ship. Instead, this sentence presents a second piece of information that supports Brunning’s claim.

▼ 2.11 — B

Choice B is the best answer. “Conversely” logically signals that the information in this sentence—that the actors’ responses were normal in nonacting contexts—presents the opposite of the previous finding that actors showed suppressed responses when their names were called during performances.

Choice A is incorrect because “specifically” illogically signals that the information about the actors’ normal responses in nonacting contexts provides specific details elaborating on the previous finding of suppressed responses during performances. Instead, the sentence presents the responses as opposites. Choice C is incorrect because “likewise” illogically signals that the actors’ normal responses in nonacting contexts are similar to the suppressed responses observed during performances. Instead, the sentence presents the responses as opposites. Choice D is incorrect because “thus” illogically signals that the actors’ normal responses in nonacting contexts are a result or consequence of the suppressed responses observed during performances. Instead, the sentence presents the responses as opposites.

▼ 2.12 — C

Choice C is the best answer. “By contrast” logically signals that the information in this sentence—that dogs can see, hear, and smell by the end of two weeks—contrasts with the preceding information (that wolves can smell but not see or hear at the same age).

Choice A is incorrect because “in other words” illogically signals that the information about domesticated dogs in this sentence paraphrases the information about wolves in the previous sentence. Instead, the information about dogs contrasts with what came before. Choice B is incorrect because “for instance” illogically signals that the information about domesticated dogs in this sentence exemplifies the information about wolves in the previous sentence. Instead, the information about dogs contrasts with what came before. Choice D is incorrect because “accordingly” illogically signals that the information about domesticated dogs in this sentence is in accordance with, or results from, the information about wolves in the previous sentence. Instead, the information about dogs contrasts with what came before.

▼ 2.13 — D

Choice D is the best answer. This sentence compares two examples of Posey’s tone: the “heartfelt language” he used in his poetry versus the “humor and satire” he used in his journalism. We know from these descriptions and from the claim in the previous sentence that the two tones are very different from each other. So the transition “by contrast” fits the context perfectly.

Choice A is incorrect. This choice uses a transition that indicates a restatement of the same idea in other words. But the text isn’t restating the first example here. Instead, it’s offering a second, totally different example. Choice B is incorrect. This choice uses a transition that means “admittedly.” But the text isn’t admitting or conceding anything here. Instead, these two examples work together to support the claim made in the first sentence. Choice C is incorrect. This choice uses a transition that indicates the addition of an agreeing idea. But these two examples are intentionally very different from each other, so “similarly” doesn’t make sense here.

▼ 2.14 — B

Choice B is the best answer. "In so doing" logically signals that the information in this sentence about Gibson’s piece—that it blurs the distinction between contemporary art and traditional crafts—is a result or consequence of the piece’s blending of particular Native and non-Native cultural symbols.

Choice A is incorrect. "Conversely" illogically signals that the information in this sentence contrasts with the previous information about the blending of particular cultural symbols in Gibson’s piece. Instead, it presents a result or consequence of that information. Choice C is incorrect. "For instance" illogically signals that this sentence provides an example

supporting the previous information about the blending of particular cultural symbols in Gibson's piece. Instead, it presents a result or consequence of that information. Choice D is incorrect. "In particular" illogically signals that this sentence provides specific details elaborating on the previous information about the blending of particular cultural symbols in Gibson's piece. Instead, it presents a result or consequence of that information.

▼ 2.15 — B

Choice B is the best answer. "That said" logically signals that the statement in this sentence—that Metzinger offers a glimpse of four-dimensional space by depicting multiple, simultaneous perspectives—is true despite the point in the previous sentence (that Metzinger's painting doesn't technically represent a fourth dimension because humans can only see in three dimensions).

Choice A is incorrect because "moreover" illogically signals that the information in this sentence merely adds to the previous point about Metzinger's painting. Instead, it provides information that is true despite that previous point. Choice C is incorrect because "in other words" illogically signals that the information in this sentence is a paraphrase or restatement of the previous point about Metzinger's painting. Instead, it provides information that is true despite that previous point. Choice D is incorrect because "for example" illogically signals that the information in this sentence provides an example that supports the previous point about Metzinger's painting. Instead, it provides information that is true despite that previous point.

▼ 2.16 — A

Choice A is the best answer. "There" indicates that the work of calculating Coordinated Universal Time takes place at the International Bureau of Weights and Measures in France. Because "there" indicates a location, it fits the context perfectly.

Choice B is incorrect. This choice uses an exemplification transition, which doesn't make sense here. This sentence is describing where the work of coordinating Coordinated Universal Time takes place, not giving an example of the work described in the previous sentence. Choice C is incorrect. This choice uses an exemplification transition, which doesn't make sense here. This sentence is describing where the work of coordinating Coordinated Universal Time takes place, not giving an example of the work described in the previous sentence. Choice D is incorrect. This choice uses a disagreement transition. But this sentence doesn't disagree with the previous sentence. They both describe the work involved in calculating Coordinated Universal Time.

▼ 2.17 — B

Choice B is the best answer. “Additionally” logically signals that the claim in this sentence—that some Supreme Court justices worry that viewers (of televised court arguments) would watch only short, misleading clips—adds to the information in the previous sentence. Specifically, the previous sentence indicates one concern raised by those opposed to televising the court’s oral arguments, and the claim that follows indicates a second, additional concern.

Choice A is incorrect because “however” illogically signals that the claim in this sentence contrasts with the information in the previous sentence. Instead, the claim adds to the information, indicating a second, additional concern that some Supreme Court justices have about televising the court’s arguments. Choice C is incorrect because “in comparison” illogically signals that the claim in this sentence is being compared to the information in the previous sentence. Instead, the claim adds to the information, indicating a second, additional concern that some Supreme Court justices have about televising the court’s arguments. Choice D is incorrect because “for example” illogically signals that the claim in this sentence exemplifies the information in the previous sentence. Instead, the claim adds to the information, indicating a second, additional concern that some Supreme Court justices have about televising the court’s arguments.

▼ 2.18 — D

Choice D is the best answer. "Thus" logically signals that the information in this clause—that listeners can "hear" carbon levels increasing—is a result of the previous information about the audio distorting as carbon levels increase.

Choice A is incorrect because "furthermore" illogically signals that the information in this clause merely adds to the previous information about the audio distorting as carbon levels rise. Instead, the listeners’ ability to "hear" carbon levels increasing is a result of that distortion. Choice B is incorrect because "by comparison" illogically signals that the information in this clause is being compared to the information about the audio distorting as carbon levels rise. Instead, the listeners’ ability to "hear" carbon levels increasing is a result of that distortion. Choice C is incorrect because "for instance" illogically signals that the information in this clause is an example of how the audio distorts as carbon levels rise. Instead, the audio was distorted for the express purpose of representing ecological data; the listeners’ ability to "hear" carbon levels increasing is a direct, intended result of the distortion, not merely an example of it.

▼ 2.19 — D

Choice D is the best answer. "To that end" logically signals that the information in this sentence—the students' creation of a show with six starring female roles—is the product of a goal or desire in the previous sentence (the students' wish to develop a musical with roles for female actors).

Choice A is incorrect because "in other words" illogically signals that the information in this sentence is a paraphrase or restatement of the previous information about the students' wish to develop a musical with roles for female actors. Instead, the students' show is the product of that desire. Choice B is incorrect because "in summary" illogically signals that the information in this sentence summarizes the previous information about the students' wish to develop a musical with roles for female actors. Instead, the students' show is the product of that desire. Choice C is incorrect because "for example" illogically signals that the information in this sentence is merely an example of the previous information about the students' wish to develop a musical with roles for female actors. Instead, the students' show is the direct product of that desire.

▼ 2.20 — A

Choice A is the best answer. "In particular" logically signals that the information in this sentence—that maize and wheat supply chains transformed North American foodways into a global food system—provides specific, precise details elaborating on the more general information in the previous sentence about the transformation of North American foodways (with maize and wheat the "certain grains" at the center of it).

Choice B is incorrect because "alternatively" illogically signals that the information in this sentence is an alternative option to the previous information about the transformation of North American foodways. Instead, the roles of maize and wheat in creating a global food system are specific, precise details elaborating on that information. Choice C is incorrect because "by comparison" illogically signals that the information in this sentence is being compared to the previous information about the transformation of North American foodways. Instead, the roles of maize and wheat in creating a global food system are specific, precise details elaborating on that information. Choice D is incorrect because "second of all" illogically signals that the information in this sentence is a second, separate claim from the previous claim that North American foodways were transformed. Instead, the roles of maize and wheat in creating a global food system are specific, precise details elaborating on that information, rather than a separate claim.

▼ 2.21 — D

Choice D is the best answer. "Finally" logically signals that the information in this sentence—that scientists found evidence that chondrules were formed by shock waves in nearby nebulae—indicates a conclusion to the scientific debate mentioned in the previous sentences.

Choice A is incorrect because "for example" illogically signals that the information about the evidence for chondrule formation in this sentence exemplifies the information about the scientific debate regarding chondrule formation in the previous sentences. Instead, it indicates a conclusion to the debate. Choice B is incorrect because "therefore" illogically signals that the information in this sentence is a result of the previous information about the scientific debate regarding chondrule formation. Instead, it indicates a conclusion to the debate. Choice C is incorrect because "similarly" illogically signals that the information that follows is similar to the information about the scientific debate regarding chondrule formation in the previous sentences. Instead, it indicates a conclusion to the debate.

▼ 2.22 — C

Choice C is the best answer. “By contrast” logically signals that the information about bathymetric maps in this sentence—that they show landforms’ elevation below the sea—presents a direct contrast to the previous information about topographic maps showing landforms’ elevation above sea level.

Choice A is incorrect because “in conclusion” illogically signals that the information about bathymetric maps in this sentence concludes or summarizes the previous information about topographic maps. Instead, the sentence provides contrasting information about bathymetric maps. Choice B is incorrect because “for example” illogically signals that the information about bathymetric maps in this sentence exemplifies the previous information about topographic maps. Instead, the sentence provides contrasting information about bathymetric maps. Choice D is incorrect because “afterward” illogically signals that this sentence describes an event that chronologically follows the previous information about topographic maps. Instead, the sentence provides contrasting information about bathymetric maps.

▼ 2.23 — D

Choice D is the best answer. “In addition” logically signals that the information in this sentence—that the Twentieth Amendment requires newly elected US senators and

representatives to be sworn in on January 3—is separate from and additional to the amendment's mandate concerning presidential inaugurations.

Choice A is incorrect because "instead" illogically signals that the information in the sentence presents an alternative to or substitute for the Twentieth Amendment's mandate concerning presidential inaugurations. Rather, the sentence presents a separate requirement in addition to that one. Choice B is incorrect because "for instance" illogically signals that the information in the sentence exemplifies the Twentieth Amendment's mandate concerning presidential inaugurations. Instead, the sentence presents a separate requirement in addition to that one. Choice C is incorrect because "specifically" illogically signals that the sentence provides specific, precise details elaborating on the Twentieth Amendment's mandate concerning presidential inaugurations. Instead, the sentence presents a separate requirement in addition to that one.

▼ 2.24 — C

Choice C is the best answer. "Indeed" logically signals that the description of the art installation in this sentence—its blue room and preening unicorn that leave visitors "dazzled and confused"—offers additional emphasis in support of the previous sentence's claim about the installation's "whimsical yet perplexing experience."

Choice A is incorrect because "second" illogically signals that the description in this sentence is a second, separate claim from the previous sentence's claim about the installation's "whimsical yet perplexing experience." Instead, the specific details describing the installation emphasize and support the previous claim. Choice B is incorrect because "instead" illogically signals that the description in this sentence is an alternative to the previous sentence's claim about the installation's "whimsical yet perplexing experience." Rather, the specific details describing the installation emphasize and support that claim. Choice D is incorrect because "nevertheless" illogically signals that the description in this sentence is true despite the previous sentence's claim about the installation's "whimsical yet perplexing experience." Instead, the specific details describing the installation emphasize and support that claim.

▼ 2.25 — B

Choice B is the best answer. "In many cases" logically links the information that follows to the previous sentence's claim that the results of bacterial cleaning "have been impressive overall." This sentence supports that claim by indicating that the bacteria "have proven more effective than traditional chemical cleaning methods." Noting that this is true "in many

cases” appropriately frames the information in the sentence and thus completes the text with the most logical transition.

Choice A is incorrect because “however” illogically signals that the information in this sentence contrasts with the previous information. Instead, this sentence supports the previous sentence’s claim that the results of bacterial cleaning “have been impressive overall,” noting that the bacteria “have proven more effective than traditional chemical cleaning methods.” Choice C is incorrect because “as a result” illogically signals that the information in this sentence is a consequence of the claim about the results of bacterial cleaning. Instead, this sentence supports the previous sentence’s claim that the results of bacterial cleaning “have been impressive overall,” noting that the bacteria “have proven more effective than traditional chemical cleaning methods.” Choice D is incorrect because “additionally” illogically signals that the information in this sentence is merely additional to (and separate from) the previous information about the results of bacterial cleaning. Instead, this sentence supports the previous sentence’s claim that the results of bacterial cleaning “have been impressive overall,” noting that the bacteria “have proven more effective than traditional chemical cleaning methods.”

▼ 2.26 — D

Choice D is the best answer. "Specifically" logically signals that the information about Pleasant’s 1866 lawsuit provides specific, precise details elaborating on the previous point that Pleasant successfully challenged discrimination in California.

Choice A is incorrect because "for this reason" illogically signals that Pleasant’s 1866 lawsuit was a result of her successful challenge to discrimination in California. Instead, this sentence provides specific details elaborating on her challenge to discrimination in the state. Choice B is incorrect because "then" illogically signals that Pleasant’s 1866 lawsuit was subsequent to or resulted from her successful challenge to discrimination in California. Instead, this sentence provides specific, precise details elaborating on how she challenged discrimination in the state. Choice C is incorrect because "in addition" illogically signals that the information about Pleasant’s 1866 lawsuit is merely additional to the previous point that Pleasant successfully challenged discrimination in California. Instead, this sentence provides specific details elaborating on how she did so.

▼ 2.27 — A

Choice A is the best answer. “Specifically” logically signals that the information in this sentence—that the Sun releases charged particles that later collide with atoms, resulting in

auroral light—provides specific, precise details about how auroras result from the Sun's activity.

Choice B is incorrect because "similarly" illogically signals that the information in this sentence is similar to the general information about auroras in the previous sentence. Instead, this sentence provides specific, precise details about how auroras form. Choice C is incorrect because "nevertheless" illogically signals that the information in this sentence is despite the general information about auroras in the previous sentence. Instead, this sentence provides specific, precise details about how auroras form. Choice D is incorrect because "hence" illogically signals that the information in this sentence is a result of the general information about auroras in the previous sentence. Instead, this sentence provides specific, precise details about how auroras form.

▼ 2.28 — C

Choice C is the best answer. "Likewise" is a transition that indicates the addition of a new but related idea. In this sentence, the author is providing another similar example to that discussed in the previous sentence. Therefore, "likewise" works best in this context.

Choice A is incorrect. This choice uses a transition that means "admittedly." But the text isn't admitting or conceding anything here. Instead, these two examples work together to support the claim made in the first sentence. Choice B is incorrect. This choice uses an exemplification transition, which doesn't make sense here. The second story is not an example of the story in the previous sentence—it's another, similar story. And while both stories exemplify the first sentence in the text, the transition we're looking for isn't actually connected to that sentence. Choice D is incorrect. This choice uses a cause-and-effect transition, which doesn't make sense here. The first story didn't result in the events of the second story.

▼ 2.29 — A

Choice A is the best answer. "Fittingly" logically signals that the naming of an unprecedented radiocarbon surge for Fusa Miyake is appropriate to the situation, since Miyake is the person who identified the surge (through her Yaku Island tree-ring analysis).

Choice B is incorrect because "similarly" illogically signals that the information in this sentence is similar to the previous information about Miyake's identification of a massive radiation burst through tree-ring analysis. Instead, the naming of the event for its discoverer is a fitting and appropriate outcome. Choice C is incorrect because "however" illogically

signals that the information in this sentence contrasts with the previous information about Miyake's identification of a massive radiation burst through tree-ring analysis. Instead, the naming of the event for its discoverer is a fitting and appropriate outcome. Choice D is incorrect because "in other words" illogically signals that the information in this sentence is a paraphrase or restatement of the previous information about Miyake's identification of a massive radiation burst through tree-ring analysis. Instead, the naming of the event for its discoverer is a fitting and appropriate outcome.

▼ 2.30 — D

Choice D is the best answer. "Specifically" logically signals that the information in this sentence—Latimer making the light bulb more durable—provides a specific detail elaborating on the more general claim in the previous sentence that Latimer improved the light bulb.

Choice A is incorrect because "soon" illogically signals that the information in this sentence occurred shortly after Latimer improved the light bulb. Instead, Latimer making the bulb more durable was the specific improvement. Choice B is incorrect because "regardless" illogically signals that the information in this sentence is true despite the previous claim about Latimer. Instead, the information about Latimer making the bulb more durable provides a specific detail elaborating on that claim. Choice C is incorrect because "however" illogically signals that the information in this sentence contrasts with the previous claim about Latimer. Instead, the information about Latimer making the bulb more durable provides a specific detail elaborating on that claim.

▼ 2.31 — D

Choice D is the best answer. "Specifically" logically signals that the information in this sentence—that the Local Bubble's expansion trapped clouds of gas and dust that formed new stars—provides specific, precise details elaborating on the more general information in the previous sentence about the relationship between the Local Bubble's expansion and the formation of new stars.

Choice A is incorrect because "hence" illogically signals that the information in this sentence is a result of the information in the previous sentence about the relationship between the Local Bubble's expansion and the formation of new stars. Instead, this sentence provides specific, precise details elaborating on that information. Choice B is incorrect because "however" illogically signals that the information in this sentence contrasts with the information in the previous sentence about the relationship between the Local Bubble's

expansion and the formation of new stars. Instead, this sentence provides specific, precise details elaborating on that information. Choice C is incorrect because "admittedly" illogically signals that the information in this sentence provides an exception or caveat to the previous information about the relationship between the Local Bubble's expansion and the formation of new stars. Instead, this sentence provides specific, precise details elaborating on that information.

▼ 2.32 — B

Choice B is the best answer. The word "however" logically signals that the information in this sentence about the planet KELT-9b—that it orbits a B-type star—contrasts with the previous information about planets discovered outside our solar system. Most of these planets orbit G-type stars, not B-type stars.

Choice A is incorrect because "likewise" illogically signals that the information about the planet KELT-9b is similar to the previous information about most planets outside our solar system. Instead, it contrasts with that information. Choice C is incorrect because "therefore" illogically signals that the information about the planet KELT-9b is a result of the previous information about most planets outside our solar system. Instead, it contrasts with that information. Choice D is incorrect because "for example" illogically signals that the information about the planet KELT-9b is an example of the previous information about most planets outside our solar system. Instead, it contrasts with that information.

▼ 2.33 — B

Choice B is the best answer. "Previously" logically signals that the fused fiber theory came before Ramón y Cajal's discovery.

Choice A is incorrect. "However" illogically signals that the fused fiber theory in this sentence contrasts with the information in the previous sentence. While this theory does contrast with Ramón y Cajal's discovery, the previous sentence concludes by stating that his discovery went against prior assumptions about the brain. The fact that the fused fiber theory was one of those earlier assumptions makes "however" an illogical choice. Choice C is incorrect because "as a result" illogically signals that the fused fiber theory in this sentence was a result of the discovery in the previous sentence. Instead, the fused fiber theory came before Ramón y Cajal's discovery. Choice D is incorrect because "likewise" illogically signals that the fused fiber theory in this sentence was similar to the discovery in the previous sentence. Instead, the fused fiber theory, which came before Ramón y Cajal's discovery, was very different from it.

▼ 2.34 — C

Choice C is the best answer. "On the other hand" logically signals that the information in the sentence—that the snowpack at higher elevations in the Chuska Mountains was deepest in mid-March—contrasts with the previous information about the snowpack at lower elevations being deepest in early March.

Choice A is incorrect because "in other words" illogically signals that information in the sentence is merely a paraphrase or restatement of the previous information about the snowpack at lower elevations. Instead, the information about the snowpack at higher elevations contrasts with that information. Choice B is incorrect because "for instance" illogically signals that the information in the sentence exemplifies the previous information about the snowpack at lower elevations. Instead, the information about the snowpack at higher elevations contrasts with that information. Choice D is incorrect because "in summary" illogically signals that the information in the sentence summarizes the previous information about the snowpack at lower elevations. Instead, the information about the snowpack at higher elevations contrasts with that information.

▼ 2.35 — B

Choice B is the best answer. “Nonetheless” is a transition that indicates disagreement. The first sentence describes the unlikelihood of finding much for critical analysis in Ashbery’s poem (“barren terrain”), while the second sentence describes how Berlant did in fact find much to analyze in Ashbery’s poem (“fertile ground”), so the transition “nonetheless” fits perfectly.

Choice A is incorrect. This choice uses a transition that indicates the addition of a new but similar idea, which doesn’t make sense here. The idea in this sentence directly contradicts the idea in the previous sentence. Choice C is incorrect. This choice uses a cause-and-effect transition, which doesn’t make sense in this context—a poem seemingly having little opportunity for critical analysis would not cause someone to write an extensive critical analysis (in fact, we might expect the opposite). Choice D is incorrect. This choice uses a transition that indicates a restatement of the same idea in other words. But the text isn’t restating the first idea here. Instead, it’s offering a contradiction to the idea expressed in the first sentence.

▼ 2.36 — C

Choice C is the best answer. “However” logically signals that the information in this sentence—that Hammurabi is mainly remembered for just a single achievement, the Code of Hammurabi—is contrary to what might be assumed from the previous information about Hammurabi’s many achievements.

Choice A is incorrect because “therefore” illogically signals that the information in this sentence is a result of the previous information about Hammurabi’s many achievements. Instead, this sentence makes a point that is contrary to what might be assumed from the previous information. Choice B is incorrect because “likewise” illogically signals that the information in this sentence is similar to the previous information about Hammurabi’s many achievements. Instead, this sentence makes a point that is contrary to what might be assumed from the previous information. Choice D is incorrect because “for instance” illogically signals that this sentence exemplifies the previous information about Hammurabi’s many achievements. Instead, this sentence makes a point that is contrary to what might be assumed from the previous information.

▼ 2.37 — D

Choice D is the best answer. “Of course” logically signals that the information in this sentence—that the smokelike effect in the image was actually the blackbird’s breath hitting the cold morning air—is an expected or self-evident clarification of the previous description of the bird appearing to exhale rings of smoke.

Choice A is incorrect because “furthermore” illogically signals that the information in this sentence about the smokelike effect merely adds to the previous description of the image. Instead, the sentence clarifies what produced the smokelike effect in the image. Choice B is incorrect because “for example” illogically signals that the information in this sentence about the smokelike effect provides a specific example of the previous description of the image. Instead, the sentence clarifies what produced the smokelike effect in the image. Choice C is incorrect because “therefore” illogically signals that the information in this sentence about the smokelike effect is a result or consequence of the previous description of the image. Instead, the sentence clarifies what produced the smokelike effect in the image.

▼ 2.38 — C

Choice C is the best answer. "Indeed" logically signals that the information in this sentence—that Laleh Mehran’s installation resembled both a typical movie theater and a coal mine—supports the previous sentence’s claim that the space Mehran created felt both "familiar and distant."

Choice A is incorrect because "next" illogically signals that the description of Laleh Mehran's installation in this sentence is the next step in a process. Rather, it supports the previous sentence's claim about Mehran's installation. Choice B is incorrect because "nevertheless" illogically signals that the information in this sentence is true despite the claim about Laleh Mehran's installation in the previous sentence. Rather, it supports that claim. Choice D is incorrect because "instead" illogically signals that this sentence presents an alternative to the previous sentence's claim about Laleh Mehran's installation. Rather, it supports that claim.

▼ 2.39 — D

Choice D is the best answer. "Increasingly" logically signals that the claim in this sentence—that mathematicians are collaborating with their peers—marks a change relative to what was traditionally done. As the previous sentence explains, while mathematicians may have traditionally worked alone, evidence points to a shift in the opposite direction. The claim describes the shift: a rise in collaboration.

Choice A is incorrect because "similarly" illogically signals that the claim in this sentence is similar to, but separate from, the previous claim about the shift away from mathematicians working alone. Instead, the claim about the rise in collaboration elaborates on the previous claim, describing the shift. Choice B is incorrect because "for this reason" illogically signals that the claim in this sentence is caused by the previous claim about the shift away from mathematicians working alone. Instead, the claim about the rise in collaboration elaborates on the previous claim, describing the shift. Choice C is incorrect because "furthermore" illogically signals that the claim in this sentence is in addition to the previous claim about the shift away from mathematicians working alone. Instead, the claim about the rise in collaboration elaborates on the previous claim, describing the shift.

▼ 2.40 — D

Choice D is the best answer. "Consequently" logically signals that the information in this sentence—that many Arabic words entered the Spanish language—is a result or consequence of the previous information about Arabic-speaking Muslim states ruling Al-Andalus for centuries.

Choice A is incorrect because "for example" illogically signals that the information about Arabic words entering Spanish exemplifies the Arabic-speaking history of Al-Andalus mentioned in the previous sentence. Instead, Arabic words entering Spanish is a consequence of that history. Choice B is incorrect because "instead" illogically signals that

the information about Arabic words entering Spanish provides an alternative to the Arabic-speaking history of Al-Andalus mentioned in the previous sentence. The information about Arabic words entering Spanish is a consequence of that history. Choice C is incorrect because "specifically" illogically signals that the information about Arabic words entering Spanish provides specific details elaborating on the Arabic-speaking history of Al-Andalus mentioned in the previous sentence. Instead, Arabic words entering Spanish is a consequence of that history.

▼ 2.41 — B

Choice B is the best answer. "Instead" logically signals that the information about the researchers' discovery in this sentence—that jorō spiders are gentle giants who "freeze" in place when disturbed—contradicts their initial hypothesis about the spiders' aggressiveness described in the previous sentence.

Choice A is incorrect because "therefore" illogically signals that the discovery about jorō spiders' gentleness is a result of the initial hypothesis about their aggressive behavior. Instead, the sentence presents information that contradicts the initial hypothesis. Choice C is incorrect because "for example" illogically signals that the discovery about jorō spiders' gentleness exemplifies the initial hypothesis about their aggressive behavior. Instead, the sentence presents information that contradicts the initial hypothesis. Choice D is incorrect because "in other words" illogically signals that the discovery about jorō spiders' gentleness is merely restating or rephrasing the initial hypothesis about their aggressive behavior. Instead, the sentence presents information that contradicts the initial hypothesis.

▼ 2.42 — B

Choice B is the best answer. "Thus" logically signals that the information in this sentence—that the researchers concluded that Antarctica had glaciers long before the formation of its continent-wide ice sheet—is a result of the previous information about the discovery that Antarctica's glaciers are at least 60 million years old, whereas its continent-wide ice sheet formed just 34 million years ago.

Choice A is incorrect because "by contrast" illogically signals that the researchers' conclusion about Antarctica having glaciers before its ice sheet formed contrasts with the previous finding about the age of Antarctica's glaciers. Instead, the conclusion is a result of that finding. Choice C is incorrect because "nevertheless" illogically signals that the researchers' conclusion about Antarctica having glaciers before its ice sheet formed is true despite the previous finding about the age of Antarctica's glaciers. Instead, the conclusion is

a result of that finding. Choice D is incorrect because “even so” illogically signals that the researchers’ conclusion about Antarctica having glaciers before its ice sheet formed is true despite the previous finding about the age of Antarctica’s glaciers. Instead, the conclusion is a result of that finding.

▼ 2.43 — A

Choice A is the best answer. "By contrast" logically signals that the information in this sentence—that isolating molybdenum was a relatively long process—contrasts with the previous information that isolating selenium was a short process.

Choice B is incorrect because "thus" illogically signals that the information in this sentence is a result of the previous information about selenium’s short isolation process. Instead, the sentence presents contrasting information about molybdenum’s longer isolation process. Choice C is incorrect because "similarly" illogically signals that the information in this sentence is similar to the previous information about selenium’s short isolation process. Instead, the sentence presents contrasting information about molybdenum’s longer isolation process. Choice D is incorrect because "for instance" illogically signals that the information in this sentence exemplifies the previous information about selenium’s short isolation process. Instead, the sentence presents contrasting information about molybdenum’s longer isolation process.

▼ 2.44 — C

Choice C is the best answer. "In addition" logically signals that the claim in this sentence—that the Inca of South America may have used quipus to record more complex information—is an additional point related to the previous statement about the Inca using quipus to record countable information.

Choice A is incorrect because "as a result" illogically signals that the claim in the sentence is a consequence or result of the previous statement about the Inca using quipus to record countable information. Instead, the possibility that the Inca used quipus to record more complex information is an additional point about how the quipus were used. Choice B is incorrect because "in other words" illogically signals that the claim in the sentence is merely a paraphrase or restatement of the previous statement about the Inca using quipus to record countable information. Instead, the possibility that the Inca used quipus to record more complex information is an additional point about how the quipus were used. Choice D is incorrect because "for example" illogically signals that the claim in the sentence exemplifies the previous statement about the Inca using quipus to record countable

information. Instead, the possibility that the Inca used quipus to record more complex information is an additional point about how the quipus were used.

▼ 2.45 — C

Choice C is the best answer. “Similarly” logically signals that the information in this sentence about a labor monopsony is similar to the information in the previous sentence about a product monopsony. In both types of markets, one party (an employer or a buyer) has the power to force another party (a worker or seller) to accept less money (for labor or products).

Choice A is incorrect because “earlier” illogically signals that the information in this sentence about a labor monopsony occurs earlier (in a chronological sequence) than the information about a product monopsony. Instead, it is similar to the information about a product monopsony. Choice B is incorrect because “instead” illogically signals that the information in this sentence about a labor monopsony is an alternative to the previous information about a product monopsony. Instead, it is similar to the information about a product monopsony. Choice D is incorrect because “in particular” illogically signals that the information in this sentence about a labor monopsony provides specific details elaborating on the previous information about a product monopsony. Instead, it is similar to the information about a product monopsony.

▼ 2.46 — C

Choice C is the best answer. The second sentence provides more specific information about the fieldwork mentioned in the first sentence—that the paleontological digs took place in Utah, Montana, and Wyoming. Therefore, “specifically” fits perfectly in this context.

Choice A is incorrect. This choice uses a disagreement transition. But this sentence doesn’t disagree with the previous sentence. Rather, this sentence agrees with and elaborates on the last sentence by providing more specifics about the fieldwork Black does. Choice B is incorrect. This choice uses a transition that indicates that an event took place after another event. But the two sentences are not describing different events—instead, this sentence gives more details about the fieldwork discussed in the first sentence. Choice D is incorrect. This choice uses a disagreement transition. But this sentence doesn’t disagree with the previous sentence. Rather, this sentence agrees with and elaborates on the last sentence by providing more specifics about the fieldwork Black does.

▼ 2.47 — B

Choice B is the best answer. "Nevertheless" logically signals that the claim in the sentence—that the speaker could visit every state in the US and not find the oldest public library in the Western Hemisphere—is true despite the previous claim about the speaker seeking out old public libraries.

Choice A is incorrect because "as a result" illogically signals that the claim in the sentence is a consequence of the previous claim about the speaker seeking out old public libraries. Instead, the claim is true despite the previous claim. Choice C is incorrect because "earlier" illogically signals that the claim in the sentence occurs earlier in a chronological sequence of events than the previous claim about the speaker seeking out old public libraries. Instead, the claim is true despite the previous claim. Choice D is incorrect because "in other words" illogically signals that the claim in the sentence is merely a paraphrase or restatement of the previous claim about the speaker seeking out old public libraries. Instead, the claim is true despite the previous claim.

▼ 2.48 — D

Choice D is the best answer. “Thus” logically signals that the claim in this sentence—that animals performing only basic actions should allocate relatively few resources to their brain tissue—is a consequence of the previous sentence’s claim about the energy demands of animal brains (namely, that the more diverse an animal’s behaviors, the more energy its brain needs).

Choice A is incorrect because “subsequently” illogically signals that the claim in this sentence occurs later in a chronological sequence of events than the previous sentence’s claim about the energy demands of animal brains. Instead, the second claim is a consequence of the first. Choice B is incorrect because “besides” illogically signals that the claim in this sentence provides a separate point in addition to, or apart from, the previous sentence’s claim about the energy demands of animal brains. Instead, the second claim is a consequence of the first. Choice C is incorrect because “nevertheless” illogically signals that the claim in this sentence is true in spite of the previous sentence’s claim about the energy demands of animal brains. Instead, the second claim is a consequence of the first.

▼ 2.49 — D

Choice D is the best answer. “In fact” logically signals that the information in this sentence—that McFerrin finds the research phase of her work to be just as fascinating as travel—emphasizes and elaborates on the previous sentence’s point that McFerrin regards background research as a rewarding activity.

Choice A is incorrect because “by contrast” illogically signals that the information in this sentence contrasts with the previous sentence’s point about McFerrin’s attitude toward background research. Instead, it emphasizes and elaborates on that point. Choice B is incorrect because “likewise” illogically signals that this sentence merely adds a second, similar point to the previous sentence’s point about McFerrin’s attitude toward background research. Instead, it emphasizes and elaborates on that point. Choice C is incorrect because “besides” illogically signals that this sentence provides a separate point in addition to, or apart from, the previous sentence’s point about McFerrin’s attitude toward background research. Instead, it emphasizes and elaborates on that point.

▼ 2.50 — C

Choice C is the best answer. “Moreover” logically signals that the information in this sentence—that nonrecyclable products can damage machinery—adds to the information in the previous sentence to support the claim in the first sentence of the text. The first sentence indicates that “wishcycling” is harmful, the second sentence gives an example, and this sentence gives another example.

Choice A is incorrect because “fittingly,” which means “appropriately,” illogically signals that it is fitting or appropriate that nonrecyclable products can damage machinery, which doesn’t make sense in this context. Instead, this sentence adds another example of the potential harm caused by “wishcycling.” Choice B is incorrect because “on the contrary” illogically signals that this sentence provides information contrary to the information in the previous sentence. Instead, this sentence adds another example of the potential harm caused by “wishcycling.” Choice D is incorrect because “nevertheless” illogically signals that this sentence provides information that is true in spite of the information in the previous sentence. Instead, this sentence adds another example of the potential harm caused by “wishcycling.”

▼ 2.51 — D

Choice D is the best answer. "Though" logically signals that the information in this sentence—that volcanologists can distinguish the two volcanoes by how they were formed—presents a qualification or exception to the previous statement that the volcanoes look similar. The volcanoes are actually of two different types.

Choice A is incorrect because "for example" illogically signals that the information in this sentence exemplifies the previous information about the volcanoes looking similar. Instead, the sentence presents a qualification to that apparent similarity—the volcanoes are actually

of two different types. Choice B is incorrect because "in addition" illogically signals that the information in this sentence merely adds to the previous information about the volcanoes looking similar. Instead, the sentence presents a qualification to that apparent similarity—the volcanoes are actually of two different types. Choice C is incorrect because "therefore" illogically signals that the information in this sentence is a result of the previous information about the volcanoes looking similar. Instead, the sentence presents a qualification to that apparent similarity—the volcanoes are actually of two different types.

▼ 2.52 — B

Choice B is the best answer. “By contrast” logically signals that the information in this sentence—that a firefly’s glow ceases when it stops drawing in oxygen—contrasts with the previous sentence’s discussion of the processes that cause a firefly to begin to glow.

Choice A is incorrect because “for instance” illogically signals that the information in the sentence exemplifies the previous sentence’s discussion of how a firefly begins to glow. Instead, it contrasts with the previous sentence’s discussion. Choice C is incorrect because “specifically” illogically signals that the information in the sentence provides specific details elaborating on the previous sentence’s discussion of how a firefly begins to glow. Instead, it contrasts with the previous sentence’s discussion. Choice D is incorrect because “in conclusion” illogically signals that the information in the sentence sums up the previous sentence’s discussion of how a firefly begins to glow. Instead, it contrasts with the previous sentence’s discussion.

▼ 2.53 — B

Choice B is the best answer. “For example” logically signals that the Siletz beeswax stories mentioned in this sentence are examples consistent with the previous claim that Siletz stories support the shipwreck theory.

Choice A is incorrect because “for this reason” illogically signals that the Siletz stories about the beeswax were caused by the previous claim that Siletz stories support the shipwreck theory. Instead, the beeswax stories are examples consistent with the claim. Choice C is incorrect because “however” illogically signals that the Siletz stories about the beeswax contrast with the previous claim that Siletz stories support the shipwreck theory. Instead, the beeswax stories are examples consistent with the claim. Choice D is incorrect because “likewise” illogically signals that the Siletz stories about the beeswax are similar to the previous claim that Siletz stories support the shipwreck theory. Instead, the beeswax stories are examples consistent with the claim.

▼ 2.54 — C

Choice C is the best answer. “Granted” logically signals that the information in this sentence —that Alkaid’s brightness is likely due to its relative proximity to Earth—is a concession acknowledging that the star likely appears bright for different reasons than the faraway star to which it is compared, Shaula.

Choice A is incorrect because “indeed” illogically signals that the information in this sentence offers additional emphasis in support of the previous information about Alkaid ranking among the 50 brightest stars. Instead, the sentence concedes that the most likely reason Alkaid is counted among the sky’s brightest stars is its relative proximity to Earth. Choice B is incorrect because “as a result” illogically signals that Alkaid’s brightness is caused by the previous information about Alkaid ranking among the 50 brightest stars. Instead, the sentence concedes that the most likely reason Alkaid is counted among the sky’s brightest stars is its relative proximity to Earth. Choice D is incorrect because “similarly” illogically signals that the information in this sentence is similar to the previous information about Alkaid ranking among the 50 brightest stars. Instead, the sentence concedes that the most likely reason Alkaid is counted among the sky’s brightest stars is its relative proximity to Earth.

▼ 2.55 — C

Choice C is the best answer. “Similarly” logically signals that the activity described in this sentence (Nancy Tuttle Craig distributing Votes for Women Tea in her Los Angeles grocery stores) is like the activity described in the previous sentence (the Woman’s Suffrage Party selling Equality Tea at fairs in San Francisco). Together, the two examples support the preceding claim that “activists across the state sold tea to promote the cause of suffrage.”

Choice A is incorrect because “for example” illogically signals that the activity described in this sentence exemplifies the activity described in the previous sentence. Instead, the two activities are similar, and both support the preceding claim about selling tea to promote women’s right to vote. Choice B is incorrect because “to conclude” illogically signals that the activity described in this sentence concludes or summarizes the information in the previous sentences. Instead, the activity is similar to the one described in the previous sentence, and both support the preceding claim about selling tea to promote women’s right to vote. Choice D is incorrect because “in other words” illogically signals that the activity described in this sentence paraphrases the activity described in the previous sentence. Instead, the two

activities are similar, and both support the preceding claim about selling tea to promote women's right to vote.

▼ 2.56 — B

Choice B is the best answer. "In fact" logically signals that the critics' claim at the end of this sentence—that the two editions are essentially two different novels altogether—offers additional emphasis in support of the previous claim that the differences between the editions are extreme.

Choice A is incorrect because "by contrast" illogically signals that the claim at the end of this sentence contrasts with the previous claim about the differences between the editions. Instead, the critics' opinion offers additional emphasis in support of that claim. Choice C is incorrect because "nevertheless" illogically signals that the claim at the end of this sentence is true despite the previous claim about the differences between the two editions. Instead, the critics' opinion offers additional emphasis in support of that claim. Choice D is incorrect because "in other words" illogically signals that the claim at the end of this sentence is merely paraphrasing the previous claim about the differences between the two editions. The critics' opinion adds new information to the previous claim rather than simply paraphrasing it.

▼ 2.57 — A

Choice A is the best answer. This sentence emphasizes just how far maglev advocates' dreams are from coming true. "In fact" is a transition used to emphasize the truth of a statement that modifies the previous statement and therefore fits perfectly in this context.

Choice B is incorrect. This choice uses a cause-and-effect transition, which doesn't make sense here. Maglev advocates' dream remaining unrealized would not cause there to be only a few maglev trains, all located in Asia. Choice C is incorrect. This choice uses a disagreement transition, which doesn't make sense here. In fact, this sentence agrees with the previous sentence—both talk about how maglev trains are far from becoming common in the US. Choice D is incorrect. This choice uses a disagreement transition, which doesn't make sense here. In fact, this sentence agrees with the previous sentence—both talk about how maglev trains are far from becoming common in the US.

▼ 2.58 — D

Choice D is the best answer. "For instance" logically signals that the details in this sentence —that Mexican conductor Alondra de la Parra and Colombian conductor Lina Gonzalez-

Granados took new conducting positions—are examples supporting the previous claim about the new generation of artists.

Choice A is incorrect because “in addition” illogically signals that the details in this sentence about de la Parra and Gonzalez-Granados are merely additional facts related to the previous claim about the new generation of artists. Instead, they are examples supporting that claim. Choice B is incorrect because “lastly” illogically signals that the details in this sentence about de la Parra and Gonzalez-Granados are the last step or a concluding summary of the previous claim about the new generation of artists. Instead, they are examples supporting that claim. Choice C is incorrect because “granted” illogically signals that the details in this sentence about de la Parra and Gonzalez-Granados are exceptions to the previous claim about the new generation of artists. Instead, they are examples supporting that claim.

▼ 2.59 — B

Choice B is the best answer. "Fittingly" logically signals that the information in this sentence—that the audience was amazed when Malinin landed the first quad axel—describes a suitable or appropriate reaction to the completion of this extremely difficult jump.

Choice A is incorrect. "Moreover" illogically signals that the information in this sentence merely adds to the previous information about the difficulty of completing a quad axel. Instead, the audience’s amazement is a suitable or appropriate reaction to this accomplishment. Choice C is incorrect. "Next" illogically signals that the information in this sentence is simply the next step in a process. Instead, the audience’s amazement is a suitable or appropriate reaction to the accomplishment. Choice D is incorrect. "However" illogically signals that the information in this sentence is in contrast or an exception to the difficulty of completing a quad axel. Instead, the audience’s amazement is a suitable or appropriate reaction to this accomplishment.

▼ 2.60 — C

Choice C is the best answer. "Again and again" logically signals that the information in this sentence—that new calculations revealed increasingly precise coordinates for the location of the prime meridian—refers to events that occurred multiple times in the decades after the establishment of the prime meridian in 1884 (which is described in the preceding sentence).

Choice A is incorrect because "specifically" illogically signals that the information in this sentence provides specific, precise details elaborating on the description of the prime meridian’s establishment in the previous sentence. Instead, the sentence indicates that

increasingly precise coordinates were revealed on multiple occasions in the decades following the meridian's establishment. Choice B is incorrect because "to that end" illogically signals that the information in this sentence is a means of accomplishing a goal established in the previous sentence about the prime meridian's establishment. Instead, the sentence indicates that increasingly precise coordinates were revealed on multiple occasions in the decades following the meridian's establishment. Choice D is incorrect because "granted" illogically signals that the information in this sentence is in opposition to the information about the prime meridian's establishment in the previous sentence. Instead, the sentence indicates that increasingly precise coordinates were revealed on multiple occasions in the decades following the meridian's establishment.

▼ 2.61 — B

Choice B is the best answer. "On the contrary" logically signals that the information in this sentence—that *Dies Irae*'s appearance of depth is merely an illusion—contrasts with the previous statement about a viewer's possible assumption regarding the street painting.

Choice A is incorrect because "additionally" illogically signals that this sentence is simply additional information about a viewer's possible assumption regarding the street painting. Instead, the information about how Wenner achieved the illusion of depth contrasts with the previous sentence's description of the illusion. Choice C is incorrect because "as a result" illogically signals that the information in this sentence is a result of, or caused by, a viewer's possible assumption regarding the street painting. Instead, the information about how Wenner achieved the illusion of depth contrasts with the previous sentence's description of the illusion. Choice D is incorrect because "next" illogically signals that the information in this sentence is the next step in a process. Instead, the information about how Wenner achieved the illusion of depth contrasts with the previous sentence's description of the illusion.

▼ 2.62 — D

Choice D is the best answer. "Accordingly" logically signals that this sentence states a result or consequence of the previous information about the 2003 Human Genome Project. Taking into account an important lesson of the 2003 project (that a gene is affected by interactions with the protein products of other genes), research has begun to consider the human proteome instead of just the genome.

Choice A is incorrect because "in other words" illogically signals that the information in this sentence is a paraphrase or restatement of the previous information about the 2003 Human

Genome Project. Instead, this sentence states a result or consequence of that information. Choice B is incorrect because "that said" illogically signals that the information in this sentence qualifies or contrasts with the previous information about the 2003 Human Genome Project. Instead, this sentence states a result or consequence of that information. Choice C is incorrect because "for example" illogically signals that this sentence provides an example supporting the previous information about the 2003 Human Genome Project. Instead, this sentence states a result or consequence of that information.

▼ 2.63 — C

Choice C is the best answer. "More often" logically signals that the claim in this sentence—that new via ferratas favor recreation over utility—explains a difference between the new "sporting activity" routes and the older "mode of travel" routes. In so doing, it emphasizes and reinforces the previous claim ("modern via ferratas are rarely designed to simply reach a summit").

Choice A is incorrect because "additionally" illogically signals that this sentence's claim about new via ferratas adds a new, separate point to the previous claim ("modern via ferratas are rarely designed to simply reach a summit"). Instead, the second claim—that new routes favor recreation over utility—emphasizes and reinforces the previous one. Choice B is incorrect because "on the other hand" illogically signals that this sentence's claim about new via ferratas contrasts with or opposes the previous claim ("modern via ferratas are rarely designed to simply reach a summit"). Instead, the second claim—that new routes favor recreation over utility—emphasizes and reinforces the previous one. Choice D is incorrect because "nonetheless" illogically signals that this sentence's claim about new via ferratas is true despite the previous claim ("modern via ferratas are rarely designed to simply reach a summit"). Instead, the second claim—that new routes favor recreation over utility—emphasizes and reinforces the previous one.

▼ 2.64 — D

Choice D is the best answer. "Similarly" logically signals that the information in the sentence—that Dove situates Beulah's life in the context of the US Civil Rights Movement—is similar to the previous information about Thomas and the Great Migration. Both sentences support the first sentence's claim that Dove portrays her characters in the context of broader historical narratives.

Choice A is incorrect because "specifically" illogically signals that the information about Beulah in this sentence provides specific details elaborating on the previous information

about Thomas. Instead, it's similar to the previous information about Thomas. Choice B is incorrect because "thus" illogically signals that the information about Beulah in this sentence is a result or consequence of the previous information about Thomas. Instead, it's similar to the previous information about Thomas. Choice C is incorrect because "regardless" illogically signals that the information about Beulah in this sentence is true despite the previous information about Thomas. Instead, it's similar to the previous information about Thomas.

▼ 2.65 — C

Choice C is the best answer. The first sentence describes an experience that the viewer has when they're looking at the photos: they imagine other planets. This sentence describes an experience that the viewer has afterward: the title reminds them that the photos are of frying pans, bringing them back to reality. "Ultimately" is a transition that means "eventually" or "in the end," so it fits the context perfectly.

Choice A is incorrect. This choice uses a cause-and-effect transition, which doesn't make sense here. The viewer imagining other planets when they're looking at the photos doesn't cause the title to bring them back to reality. Choice B is incorrect. This choice uses a transition that indicates another option or possibility, which doesn't make sense here. Rather, the viewer has both experiences: first the viewer imagines that they're looking at another planet, and then the title reminds them that it's just a frying pan. Choice D is incorrect. This choice uses a transition that indicates the addition of an agreeing idea. But the viewer's experience in the second sentence is actually the opposite of the viewer's experience in the first sentence. In the first sentence, the viewer is imagining that they're seeing a landscape from another planet. In the second sentence, the viewer is reminded that they're looking at a frying pan.

▼ 2.66 — C

Choice C is the best answer. "What's more" logically signals that this sentence introduces an additional aspect of Wadud's poem beyond what was previously discussed. While the previous sentence establishes that Adnan's painting has inspired "the poem's exploration of temporality and identity," this sentence provides a separate, additional claim about the poem: that it reflects on poetry's relationship to other art forms.

Choice A is incorrect because "in other words" illogically signals that the information in this sentence is a paraphrase or restatement of the previous point about how Adnan's painting has inspired "the poem's exploration of temporality and identity." Instead, the sentence provides a separate, additional claim about the poem. Choice B is incorrect because "for

instance" illogically signals that the information in this sentence supports the previous point about "the poem's exploration of temporality and identity" by providing an example. Instead, the sentence provides a separate, additional claim about the poem. Choice D is incorrect because "conversely" illogically signals that the information in this sentence is contrary to the previous point about how Adnan's painting has inspired "the poem's exploration of temporality and identity." Instead, the sentence provides a separate, additional claim about the poem.

▼ 2.67 — C

Choice C is the best answer. "Specifically" logically signals that this sentence provides specific, precise details elaborating on the previous sentence's claim that de Larios's art reflects a mix of cultures. This sentence specifies which cultures the previous sentence is referring to: the artistic traditions of both Mexico and Japan.

Choice A is incorrect because "in addition" illogically signals that the information in this sentence is a separate point that follows the previous claim about de Larios's art. Instead, it provides specific details elaborating on that claim. Choice B is incorrect because "in contrast" illogically signals that the information in this sentence contrasts with the previous claim about de Larios's art. Instead, it provides specific details elaborating on that claim. Choice D is incorrect because "therefore" illogically signals that the information in this sentence is a result of the previous claim about de Larios's art. Instead, it provides specific details elaborating on that claim.

▼ 2.68 — B

Choice B is the best answer. "Additionally" logically signals that the information in this sentence—that Varichon's book features many high-quality images of color presentation tools—is an additional feature of the book, supplementing the vivid prose descriptions of these tools mentioned in the previous sentence.

Choice A is incorrect because "consequently" illogically signals that the information about the book's high-quality images is a result or consequence of the previous statement about Varichon's vivid prose descriptions. Instead, the images are an additional feature of the book. Choice C is incorrect because "that said" illogically signals that the information about the book's high-quality images is an exception to or qualification of the previous statement about Varichon's vivid prose descriptions. Instead, the images are an additional feature of the book. Choice D is incorrect because "specifically" illogically signals that the information about the book's high-quality images provides specific, precise details about the vivid prose

descriptions mentioned in the previous sentence. Instead, the images are an additional feature of the book.

▼ 2.69 — C

Choice C is the best answer because "that said" logically signals that the information that follows—that the crystals of microcrystalline minerals can be seen with a microscope—is an exception to the previous information about the crystalline structure of minerals not being visible under a microscope.

Choice A is incorrect because "thus" illogically signals that the information that follows is a direct result or consequence of the fact that the crystals of microcrystalline minerals aren't visible to the naked eye. Instead, the fact that they can be seen under a microscope is an exception to the previous information about crystalline minerals. Choice B is incorrect because "for example" illogically signals that the information that follows exemplifies the fact that the crystals of microcrystalline minerals aren't visible to the naked eye. Instead, the fact that they can be seen under a microscope is an exception to the previous information about crystalline minerals. Choice D is incorrect because "similarly" illogically signals that the information that follows is similar or comparable to the fact that the crystals of microcrystalline minerals aren't visible to the naked eye. Instead, the fact that they can be seen under a microscope is an exception to the previous information about crystalline minerals.

▼ 2.70 — B

Choice B is the best answer. This sentence compares a chiral molecule to an achiral one. It discusses how when a chiral molecule is flipped, it results in something very different than when an achiral molecule is flipped. So the transition "by contrast" fits the context perfectly.

Choice A is incorrect. This choice uses a transition that indicates a restatement of the same idea in different words. But this sentence doesn't restate the same idea as the previous sentence. Instead, it makes a new point about a different type of molecule (chiral instead of achiral). Choice C is incorrect. This choice uses a transition that introduces an example, which doesn't make sense here. The second sentence isn't an example of the first sentence's claim about achiral molecules: it actually introduces an entirely different idea that focuses on chiral molecules. Choice D is incorrect. This choice uses a transition that indicates the addition of an agreeing idea. But this sentence shows a contrast with the first sentence—namely, that a chiral molecule acts very differently from an achiral molecule when flipped.

▼ 2.71 — B

Choice B is the best answer. "Then" signals that this sentence's claim about Darwin and Wallace follows logically from the previous information. In other words, both scientists independently arriving at the theory of natural selection was, arguably, an expected outcome of the circumstances mentioned in the previous sentence.

Choice A is incorrect because "however" illogically signals that the claim in this sentence contrasts with the previous information about the ideas circulating among British scientists in the 1800s. Instead, this claim follows logically from that information. Choice C is incorrect because "moreover" illogically signals that the claim in this sentence merely adds to the previous information about the ideas circulating among British scientists in the 1800s. Instead, this claim follows logically from that information. Choice D is incorrect because "for example" illogically signals that this sentence provides an example supporting the previous information about the ideas circulating among British scientists in the 1800s. Instead, it presents a claim that follows logically from that information.

▼ 2.72 — A

Choice A is the best answer. The second part of the sentence says that many volcanoes use shallow pockets of magma. This is an elaboration of the same underlying idea from the first part of the sentence, which says that the super deep magma of Icelandic volcanoes' makes them outliers. "Indeed" is a transition used for elaborating on the same idea, so it fits the context perfectly.

Choice B is incorrect. This choice uses a disagreement transition. But these two parts of the sentence agree with each other, so "nevertheless" doesn't make sense. Choice C is incorrect. This choice uses a transition that indicates the addition of a new idea. But the second part of the sentence isn't adding a new idea: it's elaborating on the same idea expressed in the first part of the sentence. Choice D is incorrect. This choice uses a cause-and-effect transition, which doesn't make sense here. The fact that Iceland's deep-magma volcanoes are outliers doesn't cause many other volcanoes to get fed by shallow pockets of magma.

▼ 2.73 — B

Choice B is the best answer. "Instead" logically signals that the information in this sentence —that an aircraft sustains flight past the Kármán line primarily by its velocity—is an

alternative means of sustaining flight past this line, which the previous sentence indicates is the theoretical height at which an aircraft no longer remains aloft by using the force of lift.

Choice A is incorrect because “for instance” illogically signals that the information about an aircraft sustaining flight by velocity exemplifies the previous information about the Kármán line marking the theoretical height at which an aircraft no longer remains aloft using lift. Rather, the sentence describes an alternative means of sustaining flight past this line. Choice C is incorrect because “granted” illogically signals that the information about an aircraft sustaining flight by velocity is a concession or acknowledgment that qualifies the previous information about the Kármán line marking the theoretical height at which an aircraft no longer remains aloft using lift. Rather, the sentence describes an alternative means of sustaining flight past this line. Choice D is incorrect because “regardless” illogically signals that the information about an aircraft sustaining flight by velocity is true despite the previous information about the Kármán line marking the theoretical height at which an aircraft no longer remains aloft using lift. Rather, the sentence describes an alternative means of sustaining flight past this line.

▼ 2.74 — C

Choice C is the best answer. “Granted” logically signals that the information in this sentence —that iconicity is not as highly correlated with acquisition as sign frequency is—is true in spite of the information in the previous sentence about the positive correlation between iconicity and acquisition.

Choice A is incorrect because “in fact” illogically signals that this sentence either emphasizes or refutes the information in the previous sentence about the positive correlation between acquisition and iconicity. Instead, it provides information about a different correlation—that between acquisition and sign frequency. Choice B is incorrect because “in other words” illogically signals that this sentence merely restates the information in the previous sentence about the positive correlation between acquisition and iconicity. Instead, this sentence provides information about a different correlation—that between acquisition and sign frequency. Choice D is incorrect because “as a result” illogically signals that this sentence is a consequence of the information in the previous sentence about the positive correlation between acquisition and iconicity. Instead, this sentence provides information about a different correlation—that between acquisition and sign frequency.

▼ 2.75 — B

Choice B is the best answer. “Ultimately” logically signals that the information in this sentence—that, for Dillard, nature’s mesmerizing intricacy and pitiless harshness are inextricably linked—is the final conclusion or realization reached after her struggle to reconcile the juxtapositions of the natural world mentioned in the previous sentence.

Choice A is incorrect because “to that end” illogically signals that linking nature’s intricacy and harshness was Dillard’s deliberate goal or purpose in struggling to reconcile nature’s juxtapositions. Instead, the sentence presents her final realization after that struggle. Choice C is incorrect because “moreover” illogically signals that the information in this sentence merely adds to Dillard’s struggle to reconcile nature’s juxtapositions mentioned in the previous sentence. Instead, the sentence presents her final realization after that struggle. Choice D is incorrect because “hence” illogically signals that nature’s intricacy and harshness being linked is a direct consequence of Dillard’s struggle to reconcile the juxtapositions mentioned in the previous sentence. Instead, the sentence presents her final realization after that struggle.

▼ 2.76 — B

Choice B is the best answer. “In contrast” logically signals that the information in this sentence—that ABA triggers accelerated growth in the mustard plant *Schrenkiella parvula*—contrasts with the previous information about ABA triggering a slowdown in most plants’ biological processes.

Choice A is incorrect because “moreover” illogically signals that the information in this sentence about the mustard plant merely adds to the previous information about the effects of ABA. Instead, it contrasts with that information. Choice C is incorrect because “for example” illogically signals that the information in this sentence about the mustard plant provides an example consistent with the previous information about the effects of ABA. Instead, it contrasts with that information. Choice D is incorrect because “thus” illogically signals that the information in this sentence about the mustard plant is a consequence, or result, of the previous information about the effects of ABA. Instead, it contrasts with that information.

▼ 2.77 — A

Choice A is the best answer. “Accordingly” logically signals that the information in this sentence—that Precisionist works often feature angular, symmetrical structures, such as skyscrapers, bridges, and factories—is in accordance with the previous claim about the

Precisionist style of “cold, machine-like perfection, with crisp lines, geometric shapes, and smooth, brushstroke-free surfaces.”

Choice B is incorrect because “in the end” illogically signals that the information in this sentence is a final conclusion or summary of the previous claim about the Precisionist style. Instead, the sentence describes features in Precisionist works that are in accordance with that style. Choice C is incorrect because “that said” illogically signals that the information in this sentence is an exception to or qualification of the previous claim about the Precisionist style. Instead, the sentence describes features in Precisionist works that are in accordance with that style. Choice D is incorrect because “however” illogically signals that the information in this sentence contrasts with the previous claim about the Precisionist style. Instead, the sentence describes features in Precisionist works that are in accordance with that style.

▼ 2.78 — B

Choice B is the best answer. "Of course" logically signals that the information that follows—about many dances being "defined by order, repetition, and synchronicity"—acknowledges an obvious similarity between these dances and the previous description of the Madison. The sentence then goes on to emphasize a distinguishing feature of the Madison.

Choice A is incorrect because "however" illogically signals that the information that follows contrasts with the previous description of the Madison. Instead, the information about many dances’ features acknowledges an obvious similarity between these dances and the Madison. The sentence then goes on to emphasize a distinguishing feature of the Madison. Choice C is incorrect because "specifically" illogically signals that the information that follows specifies or elaborates on the previous description of the Madison. Instead, the information about many dances’ features acknowledges an obvious similarity between these dances and the Madison. The sentence then goes on to emphasize a distinguishing feature of the Madison. Choice D is incorrect because "moreover" illogically signals that the information that follows adds to or expands on the previous description of the Madison. Instead, the information about many dances’ features acknowledges an obvious similarity between these dances and the Madison. The sentence then goes on to emphasize a distinguishing feature of the Madison.

▼ 2.79 — D

Choice D is the best answer. "Moreover" logically signals that the information in this sentence—that Franklin stamped imprints on paper money to make forgery more difficult—

adds to the previous information by describing Franklin’s other strategy for combatting forgers: weaving materials into the paper used for printing money.

Choice A is incorrect because "specifically" illogically signals that the information in this sentence provides specific, precise details elaborating on the previous information about Franklin’s other strategy for combatting forgers (weaving materials into paper). Instead, this information about stamping imprints on money adds new information. Choice B is incorrect because "that said" illogically signals that the information in this sentence is an exception to the previous information about Franklin’s other strategy for combatting forgers (weaving materials into paper). Instead, this information about stamping imprints on money adds new information. Choice C is incorrect because "for example" illogically signals that the information in this sentence serves as an example of the previous information about Franklin’s other strategy for combatting forgers (weaving materials into paper). Instead, this information about stamping imprints on money adds new information.

▼ 2.80 — A

Choice A is the best answer. "To that end" logically signals that the activity described in this sentence—Nazareth titling his course "Elvis as Anthology"—is meant to further Nazareth’s goal of helping others understand Presley’s music as an anthology with a wide range of influences.

Choice B is incorrect. "In sum" illogically signals that the activity described in this sentence summarizes Nazareth’s view of Presley’s music as an anthology. Instead, titling his course "Elvis as Anthology" is a way for him to promote this view. Choice C is incorrect. "That is" illogically signals that the activity described in this sentence is a clarification or interpretation of Nazareth’s view of Presley’s music as an anthology. Instead, titling his course "Elvis as Anthology" is a way for him to promote this view. Choice D is incorrect. "In addition" illogically signals that the activity described in this sentence is merely an additional fact about Nazareth. Instead, titling his course "Elvis as Anthology" is a way for him to promote his view of Presley’s music as an anthology.

▼ 2.81 — A

Choice A is the best answer. “Alternatively” logically signals that the soil decontamination method described in this sentence—removing toxic metals from the soil via phytoremediation—offers an alternative to the previously described method (removing the contaminated soil from the ground).

Choice B is incorrect because “specifically” illogically signals that the soil decontamination method described in this sentence specifies or elaborates on an aspect of the previously described method (removing the contaminated soil from the ground). Instead, phytoremediation is an alternative to that method. Choice C is incorrect because “for example” illogically signals that the soil decontamination method described in this sentence is an example of the previously described method (removing the contaminated soil from the ground). Instead, phytoremediation is an alternative to that method. Choice D is incorrect because “as a result” illogically signals that the soil decontamination method described in this sentence is a result or consequence of the previously described method (removing the contaminated soil from the ground). Instead, phytoremediation is an alternative to that method.

▼ 2.82 — D

Choice D is the best answer. "As such" correctly signals that the claim in this sentence—that Ostrom’s work is a repudiation of the "tragedy of the commons" view—follows logically from the information about Ostrom’s studies in the previous sentence. According to that sentence, Ostrom’s studies demonstrate that common pool resources can in fact be sustainably managed by the people who use them.

Choice A is incorrect because "by contrast" illogically signals that the information in this sentence contrasts with the information about Ostrom’s studies in the previous sentence. Instead, the claim that Ostrom’s work repudiates the "tragedy of the commons" view follows logically from that information. Choice B is incorrect because "for example" illogically signals that the claim in this sentence exemplifies the information about Ostrom’s studies in the previous sentence. Instead, the claim that Ostrom’s work repudiates the "tragedy of the commons" view follows logically from that information. Choice C is incorrect because "that said" illogically signals that the information in this sentence is an exception or caveat to the information about Ostrom’s studies in the previous sentence. Instead, the claim that Ostrom’s work repudiates the "tragedy of the commons" view follows logically from that information.

▼ 2.83 — A

Choice A is the best answer. “Though” logically signals that the information in this sentence—that Morgado and colleagues detected a dense ring orbiting outside the Roche limit that remained intact—presents an exception to the previous sentence’s claim about debris

orbiting outside an object's Roche limit. Such debris would be expected to accrete into a satellite, not remain intact as a ring.

Choice B is incorrect because "for example" illogically signals that the information about Morgado's discovery exemplifies the previous sentence's claim about debris orbiting outside an object's Roche limit. Instead, the sentence presents an exception to the claim. Choice C is incorrect because "fittingly" illogically signals that the information about Morgado's discovery aligns with the previous sentence's claim about debris orbiting outside an object's Roche limit. Instead, the sentence presents an exception to the claim. Choice D is incorrect because "likewise" illogically signals that the information about Morgado's discovery is similar to the previous sentence's claim about debris orbiting outside an object's Roche limit. Instead, the sentence presents an exception to the claim.

▼ 2.84 — C

Choice C is the best answer. "Indeed" logically signals that the information that follows—that the majority of jets reach heights of only 20 to 50 km—offers additional emphasis in support of the previous claim that jets reaching the ionosphere (about 80 km above Earth) are outliers.

Choice A is incorrect because "nevertheless" illogically signals that the information about most jets reaching heights of only 20 to 50 km contrasts with the previous claim that jets reaching the ionosphere are outliers. Instead, it provides additional emphasis in support of that claim. Choice B is incorrect because "consequently" illogically signals that the information about most jets reaching heights of only 20 to 50 km is a consequence, or result, of some jets being outliers. Instead, it offers additional emphasis in support of the claim that jets reaching the ionosphere are outliers. Choice D is incorrect because "in addition" illogically signals that the information about most jets reaching heights of only 20 to 50 km merely adds to the previous claim that jets reaching the ionosphere are considered outliers. Instead, it provides additional emphasis in support of that claim.

▼ 2.85 — D

Choice D is the best answer. "Hence" logically signals that the information in this sentence about turtle shells—that people incorrectly assume they are exoskeletons—is a consequence of the shells appearing external to the animal.

Choice A is incorrect because "that being said" illogically signals that this sentence qualifies or contrasts with the previous information about turtle shells appearing external to the

animal. Instead, it presents a consequence of that information. Choice B is incorrect because "however" illogically signals that this sentence contrasts with the previous information about turtle shells appearing external to the animal. Instead, it presents a consequence of that information. Choice C is incorrect because "for instance" illogically signals that this sentence provides an example supporting the previous information about turtle shells appearing external to the animal. Instead, it presents a consequence of that information.

▼ 2.86 — D

Choice D is the best answer. “By contrast” logically signals that the information in this sentence—that one of de la Paz’s poems subverts sonnet conventions—contrasts with the previous information that his poems often adhere to sonnet conventions.

Choice A is incorrect because “fittingly” illogically signals that the information in this sentence is an appropriate or expected outcome of the previous information about de la Paz’s adherence to sonnet conventions. Instead, de la Paz’s subversion of sonnet conventions contrasts with that information. Choice B is incorrect because “similarly” illogically signals that the information in this sentence is similar to the previous information about de la Paz’s adherence to sonnet conventions. Instead, de la Paz’s subversion of sonnet conventions contrasts with that information. Choice C is incorrect because “for example” illogically signals that the information in this sentence exemplifies the previous information about de la Paz’s adherence to sonnet conventions. Instead, de la Paz’s subversion of sonnet conventions contrasts with that information.

▼ 2.87 — D

Choice D is the best answer. The first sentence tells us that Al-Malaika sometimes used "traditional forms". The second tells us that even when she used traditional forms, Al-Malaika was "breaking new ground". To connect these ideas, we need a contrast word like "but." "Though" is a contrast word similar to "but."

Choice A is incorrect. This isn’t a logical transition. The first sentence tells us that Al-Malaika sometimes used "traditional forms". The second tells us that even when she used traditional forms, Al-Malaika was "breaking new ground". To connect these ideas, we need a contrast word like "but." "Therefore" doesn’t show contrast; it shows cause and effect. Choice B is incorrect. This isn’t a logical transition. The first sentence tells us that Al-Malaika sometimes used "traditional forms". The second tells us that even when she used traditional forms, Al-Malaika was "breaking new ground". To connect these ideas, we need a

contrast word like "but." "In fact" is a phrase that usually emphasizes the truth of the previous statement. Choice C is incorrect. This isn't a logical transition. The first sentence tells us that Al-Malaika sometimes used "traditional forms". The second tells us that even when she used traditional forms, Al-Malaika was "breaking new ground". To connect these ideas, we need a contrast word like "but." "Moreover" doesn't show contrast—it introduces additional information that continues or supports the previous idea.

▼ 2.88 — B

Choice B is the best answer. "More often" logically signals that the historical outcome in this clause—dust bowl migrants' relocation within the Great Plains region—was more common than the movement to California described in many historical accounts.

Choice A is incorrect because "for this reason" illogically signals that the historical outcome in this clause was caused by either the narrative about widespread movement to California or the 2016 study's complication of that narrative. Instead, dust bowl migrants' regional relocation was found to be more common than the movement to California described in many historical accounts. Choice C is incorrect because "additionally" illogically signals that the historical outcome in this clause merely adds to either the narrative about widespread movement to California or the 2016 study's complication of that narrative. Instead, dust bowl migrants' regional relocation was found to be more common than the movement to California described in many historical accounts. Choice D is incorrect because "nevertheless" illogically signals that the historical outcome in this clause is true despite either the narrative about widespread movement to California or the 2016 study's complication of that narrative. While the findings about dust bowl migrants' regional relocation did challenge the previous narrative, they did not challenge the study's findings, and this choice creates a confusing ambiguity. Instead, dust bowl migrants' regional relocation was found to be more common than the movement to California described in many historical accounts.

▼ 2.89 — D

Choice D is the best answer. "That is" logically signals that the information in this sentence, which explains the difference between the dispersalists' position and the vicariancists' position, clarifies the terms of the debate between dispersalists and vicariancists introduced in the previous sentence.

Choice A is incorrect because "furthermore" illogically signals that the information in this sentence is merely additional to (and separate from) the information in the previous

sentence about the debate between dispersalists and vicariancists. Instead, the sentence clarifies the terms of the debate, explaining the difference between the dispersalists' position and the vicariancists' position. Choice B is incorrect because "by contrast" illogically signals that the information in this sentence contrasts with the information in the previous sentence. Instead, the sentence clarifies the terms of the debate between dispersalists and vicariancists introduced in the previous sentence. Choice C is incorrect because "similarly" illogically signals that the information in this sentence is merely similar to (and separate from) the information in the previous sentence about the debate between dispersalists and vicariancists. Instead, the sentence clarifies the terms of the debate, explaining the difference between the dispersalists' position and the vicariancists' position.

▼ 2.90 — B

Choice B is the best answer. "Undermining this explanation" logically signals that the information in this sentence—that adult *Chelonibia testudinaria* showed behavior consistent with self-initiated locomotion—undermines or weakens the previous explanation that barnacle movement was a result of passive displacement by water currents.

Choice A is incorrect because "contrary to this phenomenon" illogically signals that the information in this sentence about barnacles exhibiting behavior consistent with self-initiated locomotion opposes the previous information about barnacles shifting slightly in position over time. Instead, the sentence undermines or weakens the previous claim about passive displacement. That is, the sentence doesn't oppose the fact that the barnacles shifted position: it challenges the previous sentence's explanation for the movement. Choice C is incorrect because "drawing a similar conclusion" illogically signals that the information in this sentence about barnacles exhibiting behavior consistent with self-initiated locomotion is similar to the previous conclusion that barnacle movement is the result of passive displacement. Instead, the sentence undermines or weakens the previous sentence's explanation for how the barnacles moved. Choice D is incorrect because "confirming this hypothesis" illogically signals that the information in this sentence about barnacles exhibiting behavior consistent with self-initiated locomotion confirms the hypothesis in the previous sentence that the barnacle movement was the result of passive displacement. Instead, the sentence undermines or weakens the previous sentence's explanation for how the barnacles moved.

▼ 2.91 — B

Choice B is the best answer. “Alternatively” logically signals that the information in this sentence—that Subject 7F64B incubated her own eggs—describes a contrasting alternative to the brood parasitism behavior described in the previous sentence, in which female wood ducks laid eggs to be incubated by other nesting ducks.

Choice A is incorrect because “in particular” illogically signals that Subject 7F64B’s behavior provides a specific, focused detail about, or example of, the brood parasitism behavior described in the previous sentence. Instead, Subject 7F64B’s behavior represents a contrasting alternative to that brood parasitism. Choice C is incorrect because “for example” illogically signals that Subject 7F64B’s behavior provides a specific example of the brood parasitism behavior described in the previous sentence. Instead, Subject 7F64B’s behavior represents a contrasting alternative to that brood parasitism. Choice D is incorrect because “similarly” illogically signals that Subject 7F64B’s behavior is similar to the brood parasitism behavior described in the previous sentence. Instead, Subject 7F64B’s behavior represents a contrasting alternative to that brood parasitism.

▼ 2.92 — D

Choice D is the best answer. Scientists believe in fusion’s potential as an energy source, but have struggled to actually make it work—in other words, there is a contradiction between scientists’ beliefs and their reality. “That said” is a disagreement transition that works perfectly in this context.

Choice A is incorrect. This choice uses a cause-and-effect transition, which doesn’t make sense here. Scientists not being able to generate extra energy from lab fusion reactions isn’t an effect of them believing in fusion’s potential. Choice B is incorrect. This transition indicates the addition of another supporting point. But this sentence is not adding a supporting point to the previous sentence—scientists not being able to successfully generate energy from fusion isn’t another point in favor of fusion meeting humanity’s clean energy needs. Choice C is incorrect. This choice uses a transition that introduces or elaborates on a particular example. But this sentence doesn’t give an example of scientists’ belief in fusion’s potential to meet humanity’s clean energy needs—in fact, it contrasts that optimistic belief with the reality of past failures to successfully employ fusion for energy production.

▼ 2.93 — B

Choice B is the best answer. "By contrast" logically signals that the information about how Massey defined space—by focusing on socio-political forces—contrasts with the information

in the previous clause, which discusses quantitative analytical approaches and spatial technologies.

Choice A is incorrect because "for example" illogically signals that the information that follows in the sentence exemplifies the quantitative analytical approaches to defining space described previously. Instead, the information about Massey's socio-political focus presents a contrasting approach. Choice C is incorrect because "as such" illogically signals that the information that follows in the sentence is a direct result or logical consequence of the quantitative analytical approaches to defining space described previously. Instead, the information about Massey's socio-political focus presents a contrasting approach. Choice D is incorrect because "likewise" illogically signals that the information that follows in the sentence is similar to the quantitative analytical approaches to defining space described previously. Instead, the information about Massey's socio-political focus presents a contrasting approach.

▼ 2.94 — B

Choice B is the best answer. "Hence" correctly signals that the claim in this sentence regarding extraterrestrial material follows logically from the information in the previous sentences. The previous sentences establish that siderophile elements in the mantle are more abundant than predicted in the core-differentiation model. This sentence claims, logically, that these elements came from extraterrestrial material that accreted to Earth *after* core differentiation.

Choice A is incorrect because "that said" illogically signals that the information in this sentence regarding extraterrestrial material is an exception to the previous information about siderophiles' abundance in the mantle. Instead, it is a new claim that follows logically from the previous information. Choice C is incorrect because "for example" illogically signals that the information in this sentence regarding extraterrestrial material exemplifies the previous information about siderophiles' abundance in the mantle. Instead, it is a new claim that follows logically from the previous information. Choice D is incorrect because "likewise" illogically signals that the information in this sentence regarding extraterrestrial material is merely similar to the previous information about siderophiles' abundance in the mantle. Instead, it is a new claim that follows logically from the previous information.

▼ 2.95 — C

Choice C is the best answer. "To that end" logically signals that the information in this sentence—that Dowsett founded the National Women's Equal Suffrage Association of

Hawai‘i—describes an action Dowsett took to achieve the goal stated in the previous sentence: to coordinate the efforts of suffragists in Hawai‘i.

Choice A is incorrect because “in other words” illogically signals that the information in this sentence about Dowsett founding a women’s suffrage association is a paraphrase or restatement of the previous information about Dowsett seeking to coordinate suffragists’ efforts. Instead, the sentence describes a specific action Dowsett took to achieve this goal. Choice B is incorrect because “conversely” illogically signals that the information in this sentence about Dowsett founding a women’s suffrage association contrasts with the previous information about Dowsett seeking to coordinate suffragists’ efforts. Instead, the sentence describes a specific action Dowsett took to achieve this goal. Choice D is incorrect because “alternatively” illogically signals that the information in this sentence about Dowsett founding a women’s suffrage association presents an alternative to her seeking to coordinate suffragists’ efforts. Instead, the sentence describes a specific action Dowsett took to achieve this goal.

▼ 2.96 — C

Choice C is the best answer. "Of course" logically signals that the information in this sentence—that "the wavy staircase and ornate floral tilework" of the Modernista hospital couldn’t actually grow in a forest—acknowledges an obvious limitation of, or qualification to, the previous claim that Modernista architects championed nature in their designs.

Choice A is incorrect because "furthermore" illogically signals that the information in this sentence merely adds to the previous claim that Modernista architects championed nature in their designs. Instead, the sentence acknowledges an obvious limitation in how literally that natural influence was expressed in the hospital’s features. Choice B is incorrect because "similarly" illogically signals that the information in this sentence is similar to the previous claim that Modernista architects championed nature in their designs. Instead, the sentence acknowledges an obvious limitation in how literally that natural influence was expressed in the hospital’s features. Choice D is incorrect because "thus" illogically signals that the information in this sentence is a result of the previous claim that Modernista architects championed nature in their designs. Instead, the sentence acknowledges an obvious limitation in how literally that natural influence was expressed in the hospital’s features.

▼ 2.97 — A

Choice A is the best answer. “Nevertheless” logically signals that the information in this sentence—that the spacesuits Suttirat Larlarb designed for the film *Sunshine* were made in

standard sizes in a factory—presents a notable exception to Larlarb's typical approach of custom-fitting garments to actors, which is described in the previous sentence.

Choice B is incorrect because "thus" illogically signals that the information in this sentence is a result or consequence of the previous information about Larlarb's typical approach of custom-fitting garments to actors. Instead, it presents a notable exception to Larlarb's typical approach. Choice C is incorrect because "likewise" illogically signals that the information in this sentence is similar to the previous information about Larlarb's typical approach of custom-fitting garments to actors. Instead, it presents a notable exception to Larlarb's typical approach. Choice D is incorrect because "moreover" illogically signals that the information in this sentence merely adds to the previous information about Larlarb's typical approach of custom-fitting garments to actors. Instead, it presents a notable exception to Larlarb's typical approach.
