Rationales

▼ 2.1 — A

Choice A is the best answer. The conventions being tested are the use of possessive determiners and plural nouns. The singular possessive determiner "its" and the plural noun "wings" correctly indicate that the butterfly has multiple wings.

Choice B is incorrect because the context requires the plural noun "wings," not the plural possessive noun "wings'." Choice C is incorrect because the context requires the singular possessive determiner "its" and the plural noun "wings," not the contraction "it's" and the singular possessive noun "wing's." Choice D is incorrect because the context requires the singular possessive determiner "its" and the plural noun "wings," not the contraction "it's" and the plural possessive noun "wings'."

▼ 2.2 — C

Choice C is the best answer. The convention being tested is subject-verb agreement. The singular verb "stands" agrees in number with the singular subject "sculpture."

Choice A is incorrect because the plural verb "are standing" doesn't agree in number with the singular subject "sculpture." Choice B is incorrect because the plural verb "have been standing" doesn't agree in number with the singular subject "sculpture." Choice D is incorrect because the plural verb "were standing" doesn't agree in number with the singular subject "sculpture."

▼ 2.3 — B

Choice B is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite to-infinitive verb "to study" is correctly used to form a subordinate clause that indicates what Dr. Caballero-Gill uses chemistry and fossil evidence for (to study oceans as they were in the past).

Choice A is incorrect because it results in an ungrammatical sentence. The finite verb "has studied" can't be used in this way to form a subordinate clause that indicates what Dr. Caballero-Gill uses the evidence for. Choice C is incorrect because it results in an ungrammatical sentence. The finite verb "studied" can't be used in this way to form a subordinate clause that indicates what Dr. Caballero-Gill uses the evidence for. Choice D is incorrect because it results in an ungrammatical sentence. The finite verb "studies" can't be used in this way to form a subordinate clause that indicates what Dr. Caballero-Gill uses the evidence for.

▼ 2.4 — B

Choice B is the best answer. The convention being tested is pronoun-antecedent agreement. The plural reflexive pronoun “themselves” agrees in number with the plural antecedent “turtle barnacles,” correctly indicating what is attached to a sea turtle shell.

Choice A is incorrect because the singular pronoun “it” doesn’t agree in number with the plural antecedent “turtle barnacles.” Choice C is incorrect because it results in an unclear and confusing sentence. In this context, it’s unclear what the plural pronoun “them” refers to. Choice D is incorrect because the singular reflexive pronoun “itself” doesn’t agree in number with the plural antecedent “turtle barnacles.”

▼ 2.5 — C

Choice C is the best answer. The convention being tested is pronoun-antecedent agreement. The singular pronoun "this" agrees in number with the singular antecedent "Lê Lương Minh became the thirteenth secretary-general of the Association of Southeast Asian Nations (ASEAN) in January 2013." The pronoun "this" is referring back to the singular event described earlier in the sentence in which Minh became secretary-general of ASEAN.

Choice A is incorrect because the plural pronoun "these" doesn’t agree in number with the singular antecedent "Lê Lương Minh became the thirteenth secretary-general of the Association of Southeast Asian Nations (ASEAN) in January 2013." Choice B is incorrect because the plural pronoun "those" doesn’t agree in number with the singular antecedent "Lê Lương Minh became the thirteenth secretary-general of the Association of Southeast Asian Nations (ASEAN) in January 2013." Choice D is incorrect because the indefinite pronoun "some" is ambiguous in this context; the resulting sentence leaves unclear what marks the first time the organization appointed a Vietnamese leader.

▼ 2.6 — C

Choice C is the best answer. "It" is a singular pronoun used to stand in for objects. Since the antecedent in this case is the singular noun phrase "the human brain," "it" is a perfect pronoun to use here.

Choice A is incorrect. Although "she" is a singular pronoun, it is reserved for people and animals, not objects like "the human brain." Choice B is incorrect. "They" is a plural pronoun, but we need a singular pronoun to represent the antecedent "the human brain." Choice D is incorrect. "Those" is a plural pronoun, but we need a singular pronoun to represent the antecedent "the human brain."

▼ 2.7 — A

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. A main clause requires a finite (tensed) verb to perform the action of the subject (in this case, Nery and her colleagues), and this choice supplies the finite past tense verb "published" to indicate that these biologists shared their findings about changes in whale genes associated with body size.

Choice B is incorrect because it results in an ungrammatical sentence. The nonfinite participle "publishing" doesn't supply the main clause with a finite verb. Choice C is incorrect because it results in an ungrammatical sentence. The nonfinite participle "having published" doesn't supply the main clause with a finite verb. Choice D is incorrect because it results in an ungrammatical sentence. The nonfinite to-infinitive "to publish" doesn't supply the main clause with a finite verb.

▼ 2.8 — B

Choice B is the best answer. The conventions being tested are the use of verbs to express tense and the use of verb forms within a sentence. In this choice, the past tense verb "became" is consistent with the other past tense verbs ("owned," "operated," and "was") used to indicate that, at a period of time in the past, Bass's leadership resulted in her newspaper becoming one of the most influential Black-owned newspapers in the US. In addition, "became" supplies the main clause with a finite (tensed) verb, which is required to perform the action of the subject (in this case, "*The Eagle*").

Choice A is incorrect because the future tense verb "will become" isn't consistent with the other past tense verbs used to discuss Bass and her newspaper. Choice C is incorrect because the present progressive verb "is becoming" isn't consistent with the other past tense verbs used to discuss Bass and her newspaper. Choice D is incorrect because it results in an ungrammatical sentence. The nonfinite to-infinitive "to become" doesn't supply the main clause with a finite verb.

▼ 2.9 — D

Choice D is the best answer. The convention being tested is the use of plural nouns and possessive determiners. The plural noun "jugglers" and the plural possessive determiner "their" correctly indicate that there are multiple jugglers whose motion is being discussed.

Choice A is incorrect because the context requires the plural noun "jugglers" and the plural possessive determiner "their," not the plural possessive noun "jugglers'" and the

contraction "they’re." Choice B is incorrect because the context requires the plural possessive determiner "their," not the word "there," which means "in that place." Choice C is incorrect because the context requires the plural noun "jugglers," not the singular possessive noun "juggler’s."

▼ 2.10 — D

Choice D is the best answer. Misaka served in World War II before he joined the New York Knicks in 1947. To show that a past occurrence took place before another past occurrence, we need to use “had” + the past tense form of the verb. This is called the past perfect tense.

Choice A is incorrect. Misaka served in World War II before he joined the Knicks. Both events are in the past, but his service in World War II happened earlier, so we need a verb that makes it clear that his service (and the two national championships) had ended by the time he joined the Knicks. Choice B is incorrect. “Was already serving” forms the continuous past tense, which we use when we’re showing a past action that was ongoing. Misaka served in World War II before he joined the Knicks. Both events are in the past, but they’re not happening at the same time, so we shouldn’t use the continuous past tense here. Choice C is incorrect. Misaka served in World War II in the past, so we shouldn’t use the present tense “serves.”

▼ 2.11 — D

Choice D is the best answer. The convention being tested is subject-verb agreement. The plural verb "were" agrees in number with the plural subject "objects."

Choice A is incorrect because the singular verb "was" doesn’t agree in number with the plural subject "objects." Choice B is incorrect because the singular verb "is" doesn’t agree in number with the plural subject "objects." Choice C is incorrect because the singular verb "has been" doesn’t agree in number with the plural subject "objects."

▼ 2.12 — A

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. The singular verb "describes" agrees in number with the singular subject "map."

Choice B is incorrect because the plural verb "describe" doesn’t agree in number with the singular subject "map." Choice C is incorrect because the plural verb "have described"

doesn’t agree in number with the singular subject "map." Choice D is incorrect because the plural verb "are describing" doesn’t agree in number with the singular subject "map."

▼ 2.13 — A

Choice A is the best answer. "Ascended" is in the simple past tense. Since Kamehameha became king in the past, this makes the most sense.

Choice B is incorrect. "Will ascend" is in the future tense, but we wouldn’t know about Kamehameha III’s ascent if it hadn’t happened yet. The information in the sentence, as well as the tense of other verbs, tells us that the events described happened in the past. Choice C is incorrect. "Ascends" is in the simple present tense. However, the information in the sentence, as well as the tense of other verbs, tells us that the events described happened in the past. Choice D is incorrect. "Is ascending" is in the continuous present tense, which we use to show that something is ongoing, but this doesn’t make sense here—the information in the sentence, as well as the tense of other verbs, tells us that the events described happened in the past.

▼ 2.14 — D

Choice D is the best answer. The convention being tested is subject-verb agreement. The singular verb "sweeps" agrees in number with the singular subject "she," which refers to Alice Coltrane.

Choice A is incorrect because the plural verb "sweep" doesn’t agree in number with the singular subject "she." Choice B is incorrect because the plural verb "are sweeping" doesn’t agree in number with the singular subject "she." Choice C is incorrect because the plural verb "were sweeping" doesn’t agree in number with the singular subject "she."

▼ 2.15 — A

Choice A is the best answer. The convention being tested is the use of verbs to express tense in a sentence. In this choice, the present tense verb “get” is consistent with the other present tense verbs (“are,” “travel,” and “pack”) used to describe the Sherpas and their activities.

Choice B is incorrect. The past perfect verb “had gotten” isn’t consistent with the other present tense verbs used to describe the Sherpas and their activities. Choice C is incorrect. The past tense verb “got” isn’t consistent with the other present tense verbs used to describe the Sherpas and their activities. Choice D is incorrect. The past progressive verb

“were getting” isn’t consistent with the other present tense verbs used to describe the Sherpas and their activities.

▼ 2.16 — D

Choice D is the best answer. The convention being tested is the use of finite and nonfinite verb forms within a sentence. The nonfinite to-infinitive “to tell” is correctly used to form a nonfinite (infinitive) clause that explains the reason Engle uses poetry in her novel.

Choice A is incorrect because the finite present tense verb “tells” can’t be used in this way to explain the reason that Engle uses poetry in her novel. Choice B is incorrect because the finite past tense verb “told” can’t be used in this way to explain the reason that Engle uses poetry in her novel. Choice C is incorrect because the finite present progressive tense verb “is telling” can’t be used in this way to explain the reason that Engle uses poetry in her novel.

▼ 2.17 — A

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. A main clause requires a finite (tensed) verb to perform the action of the subject (in this case, "yellow"), and this choice supplies the present tense verb "is considered" to indicate that yellow is considered a complementary color to blue in modern color theory.

Choice B is incorrect because it results in an ungrammatical sentence. The nonfinite participle "having been considered" doesn’t supply the main clause with a finite verb. Choice C is incorrect because it results in an ungrammatical sentence. The nonfinite to-infinitive "to be considered" doesn’t supply the main clause with a finite verb. Choice D is incorrect because it results in an ungrammatical sentence. The nonfinite participle "being considered" doesn’t supply the main clause with a finite verb.

▼ 2.18 — B

Choice B is the best answer. The convention being tested is subject-verb agreement. The singular verb "was" agrees in number with the singular subject "Mary Madden of Ohio."

Choice A is incorrect because the plural verb "are" doesn’t agree in number with the singular subject "Mary Madden of Ohio." Choice C is incorrect because the plural verb "have been" doesn’t agree in number with the singular subject "Mary Madden of Ohio." Choice D is incorrect because the plural verb "were" doesn’t agree in number with the singular subject "Mary Madden of Ohio."

▼ 2.19 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb "occurs" agrees in number with the singular subject "radiation."

Choice B is incorrect because the plural verb "have occurred" doesn't agree in number with the singular subject "radiation." Choice C is incorrect because the plural verb "occur" doesn't agree in number with the singular subject "radiation." Choice D is incorrect because the plural verb "are occurring" doesn't agree in number with the singular subject "radiation."

▼ 2.20 — D

Choice D is the best answer. The convention being tested is subject-verb agreement. The plural verb "were" agrees in number with the plural subject "ayllus," which are described as plural "family clans."

Choice A is incorrect because the singular verb "is" doesn't agree in number with the plural subject "ayllus." Choice B is incorrect because the singular verb "was" doesn't agree in number with the plural subject "ayllus." Choice C is incorrect because the singular verb "has been" doesn't agree in number with the plural subject "ayllus."

▼ 2.21 — D

Choice D is the best answer. The convention being tested is the use of verbs to express tense in a sentence. In this choice, the past tense verb "was ruled" correctly indicates that Oba Ewuare I ruled the Kingdom of Benin in the distant past (from 1440 to 1473). This past tense verb choice is consistent with the other past tense verb ("was") used to describe the Kingdom of Benin.

Choice A is incorrect because the present tense verb "is ruled" doesn't indicate that Oba Ewuare I ruled the Kingdom of Benin in the distant past. Choice B is incorrect because the future tense verb "will be ruled" doesn't indicate that Oba Ewuare I ruled the Kingdom of Benin in the distant past. Choice C is incorrect because the present perfect tense verb "has been ruled" doesn't indicate that Oba Ewuare I ruled the Kingdom of Benin in the distant past.

▼ 2.22 — D

Choice D is the best answer. The convention being tested is subject-verb agreement. The singular verb "is" agrees in number with the singular subject "the country's name."

Choice A is incorrect because the plural verb "are" doesn't agree in number with the singular subject "the country's name." Choice B is incorrect because the plural verb "have been" doesn't agree in number with the singular subject "the country's name." Choice C is incorrect because the plural verb "are being" doesn't agree in number with the singular subject "the country's name."

▼ 2.23 — D

Choice D is the best answer. The convention being tested is the use of determiners in a sentence. The plural determiner "these" agrees in number with the plural noun "letters" that it modifies. This choice clearly indicates that the letters demonstrate Alcott's business sense.

Choice A is incorrect because the singular determiner "one" doesn't agree in number with the plural noun "letters." Choice B is incorrect because the singular determiner "that" doesn't agree in number with the plural noun "letters." Choice C is incorrect because the singular determiner "this" doesn't agree in number with the plural noun "letters."

▼ 2.24 — D

Choice D is the best answer. This verb needs to function as the main verb in the sentence, with the subject "one species," so it needs to be conjugated. This choice gives us the singular present tense "includes," which is the only conjugated form of the verb among the choices.

Choice A is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. This verb needs to function as the main verb in the sentence, with the subject "one species," so it needs to be conjugated. "Having included" is a participle form of the verb: it's not conjugated and doesn't function like a normal verb. Choice B is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. This verb needs to function as the main verb in the sentence, with the subject "one species," so it needs to be conjugated. "Including" is the gerund form of the verb: it's not conjugated and doesn't function like a normal verb. Choice C is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. This verb needs to function as the main verb in the sentence, with the subject "one species," so it needs to be conjugated. "To include" is the infinitive form of the verb: it's not conjugated.

▼ 2.25 — C

Choice C is the best answer. The convention being tested is the use of a verb to express tense in a sentence. In this choice, the past tense verb “finished” is consistent with the other past tense verb (“retired”) used to refer to Girgrah’s retirement in 2004.

Choice A is incorrect because the present tense verb “finish” isn’t consistent with the other past tense verb (“retired”) used to refer to Girgrah’s retirement in 2004. Furthermore, the plural verb “finish” doesn’t agree in number with the sentence’s singular subject “The Yemeni American athlete.” Choice B is incorrect because the present perfect progressive tense verb “has been finishing” isn’t consistent with the other past tense verb (“retired”) used to refer to Girgrah’s retirement in 2004. Choice D is incorrect because the future progressive tense verb “will be finishing” isn’t consistent with the other past tense verb (“retired”) used to refer to Girgrah’s retirement in 2004.

▼ 2.26 — D

Choice D is the best answer. The convention being tested is pronoun-antecedent agreement. The singular pronoun "he" agrees in number with the singular antecedent "Félix González-Torres," and it clearly indicates that González-Torres created the additional installations.

Choice A is incorrect because the plural noun phrase "they all" doesn’t agree in number with the singular antecedent "Félix González-Torres," and it doesn’t clearly indicate that he (González-Torres) created the additional installations. Choice B is incorrect because the plural pronoun "those" doesn’t agree in number with the singular antecedent "Félix González-Torres," and it doesn’t clearly indicate that he (González-Torres) created the additional installations. Choice C is incorrect because the plural pronoun "both" doesn’t agree in number with the singular antecedent "Félix González-Torres," and it doesn’t clearly indicate that he (González-Torres) created the additional installations.

▼ 2.27 — D

Choice D is the best answer. The convention being tested is the use of verbs to express tense. In this choice, the present tense verb “fly” is consistent with the other present tense verb (“journey”) used to describe the butterflies’ yearly migration. Together, these simple present tense verbs correctly indicate that the migration is a current, yearly occurrence.

Choice A is incorrect. The simple past tense verb “flew” isn’t consistent with the other present tense verb used to describe the butterflies’ yearly migration. Choice B is incorrect. The past progressive tense verb “were flying” isn’t consistent with the other present tense verb used to describe the butterflies’ yearly migration. Choice C is incorrect. The past perfect

tense verb “had flown” isn’t consistent with the other present tense verb used to describe the butterflies’ yearly migration.

▼ 2.28 — A

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. A main clause requires a finite (tensed) verb to perform the action of the subject (in this case, "multiple newspapers"), and this choice supplies the finite present tense verb "serve" to indicate that there are multiple newspapers serving the Spanish-speaking population of Washington, DC.

Choice B is incorrect because it results in an ungrammatical sentence. The nonfinite participle "having served" doesn’t supply the main clause with a finite verb. Choice C is incorrect because it results in an ungrammatical sentence. The nonfinite to-infinitive "to serve" doesn’t supply the main clause with a finite verb. Choice D is incorrect because it results in an ungrammatical sentence. The nonfinite participle "serving" doesn’t supply the main clause with a finite verb.

▼ 2.29 — A

Choice A is the best answer. The pronoun "them" agrees with the plural antecedents "poems" and "works."

Choice B is incorrect. "This" is a singular pronoun, but its antecedents, "poems" and "works," are plural. Choice C is incorrect. "That" is a singular pronoun, but its antecedents, "poems" and "works," are plural. Choice D is incorrect. "It" is a singular pronoun, but its antecedents, "poems" and "works," are plural.

▼ 2.30 — D

Choice D is the best answer. The convention being tested is the use of verbs to express tense in a sentence. In this choice, the past progressive tense verb “was studying” is consistent with the other past tense verbs (e.g., “made” and “collected”) used to describe Buratti’s discovery. Further, the past progressive tense correctly indicates that an ongoing action in the past was occurring (she was studying) at the same time that another event occurred in the past (she made an interesting discovery).

Choice A is incorrect because the present tense verb “studies” isn’t consistent with the past tense verbs used to describe Buratti’s discovery. Choice B is incorrect because the present perfect progressive tense verb “has been studying” isn’t consistent with the past tense verbs

used to describe Buratti’s discovery. Choice C is incorrect because the future tense verb “will study” isn’t consistent with the past tense verbs used to describe Buratti’s discovery.

▼ 2.31 — A

Choice A is the best answer. The convention being tested is the use of verbs to express tense. In this choice, the simple past tense verb “suggested” properly indicates that Zufall offered her suggestion for the product’s name in the past. This verb tense is consistent with the previous sentence’s use of a simple past tense verb (“advised”) to describe Zufall’s advice to McVicker in the 1950s.

Choice B is incorrect because the present tense verb “suggests” doesn’t indicate that Zufall offered her suggestion in the past. Choice C is incorrect because the past perfect verb “had suggested” isn’t consistent with the previous sentence’s use of the simple past tense verb “advised” to describe Zufall’s advice to McVicker. Choice D is incorrect because the past progressive verb “was suggesting” isn’t consistent with the previous sentence’s use of the simple past tense verb “advised” to describe Zufall’s advice to McVicker.

▼ 2.32 — D

Choice D is the best answer. The conventions being tested are the use of possessive nouns and the use of possessive determiners. The singular possessive noun "phrase’s" correctly indicates that there is only one simple phrase. The singular possessive determiner "its" agrees in number with the singular possessive noun "phrase’s," reinforcing the idea that there is only one simple yet complex phrase.

Choice A is incorrect because the context requires the singular possessive noun "phrase’s," not the plural possessive noun "phrases’." Choice B is incorrect because the context requires the singular possessive noun "phrase’s" and the corresponding singular possessive determiner "its," not the plural noun "phrases" and the corresponding plural possessive determiner "their." Choice C is incorrect because the context requires the singular possessive determiner "its," not the plural possessive determiner "their."

▼ 2.33 — C

Choice C is the best answer. The convention being tested is subject-verb agreement. The singular verb "was" agrees in number with the singular subject "every last second."

Choice A is incorrect because the plural verb "have been" doesn’t agree in number with the singular subject "every last second." Choice B is incorrect because the plural verb "are"

doesn’t agree in number with the singular subject "every last second." Choice D is incorrect because the plural verb "were" doesn’t agree in number with the singular subject "every last second."

▼ 2.34 — B

Choice B is the best answer. The convention being tested is subject-verb agreement. The plural verb "enable" agrees in number with the plural subject "sound-based tools."

Choice A is incorrect because the singular verb "has enabled" doesn’t agree in number with the plural subject "sound-based tools." Choice C is incorrect because the singular verb "is enabling" doesn’t agree in number with the plural subject "sound-based tools." Choice D is incorrect because the singular verb "enables" doesn’t agree in number with the plural subject "sound-based tools."

▼ 2.35 — C

Choice C is the best answer. The convention being tested is the use of verb forms within a sentence. The plural verb "study" agrees in number with the plural subject "many."

Choice A is incorrect because the singular verb "is studying" doesn’t agree in number with the plural subject "many." Choice B is incorrect because the singular verb "has studied" doesn’t agree in number with the plural subject "many." Choice D is incorrect because the singular verb "studies" doesn’t agree in number with the plural subject "many."

▼ 2.36 — A

Choice A is the best answer. The convention being tested is the use of verbs to express tense in a sentence. In this choice, the present tense verb "goes" is consistent with the other present tense verbs ("appears" and "symbolizes") used to describe the tortoise in Stoppard’s play. Furthermore, it’s conventional to use the present tense when discussing a literary work.

Choice B is incorrect because the future perfect tense verb "will have gone" isn’t consistent with the other present tense verbs used to describe the tortoise in Stoppard’s play. Choice C is incorrect because the past tense verb "went" isn’t consistent with the other present tense verbs used to describe the tortoise in Stoppard’s play. Choice D is incorrect because the past perfect tense verb "had gone" isn’t consistent with the other present tense verbs used to describe the tortoise in Stoppard’s play.

▼ 2.37 — D

Choice D is the best answer. The convention being tested is subject-verb agreement and agreement between nouns. The singular verb “is” and the singular noun “version” both agree in number with the relative pronoun “which.” In this context, “which” functions as a singular subject because it refers to the singular noun “the Nerf football.”

Choice A is incorrect because the plural verb “were” doesn’t agree in number with the singular noun phrase “the Nerf football” that it’s modifying. Choice B is incorrect because the plural verb “are” and the plural noun “versions” don’t agree in number with the singular noun phrase “the Nerf football” that they’re modifying. Choice C is incorrect because the plural verb “were” and the plural noun “versions” don’t agree in number with the singular noun phrase “the Nerf football” that they’re modifying.

▼ 2.38 — D

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “the activists” the subject of the sentence and places it immediately after the modifying phrase “after…legislation.” In doing so, this choice clearly establishes that the activists—and not another noun in the sentence—were pleading for the passage of antidiscrimination legislation.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase “pressure on lawmakers” immediately after the modifying phrase illogically suggests that the “pressure” was pleading for the passage of antidiscrimination legislation. Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “a sit-in protest” immediately after the modifying phrase illogically suggests that the “protest” was pleading for the passage of antidiscrimination legislation. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “lawmakers” immediately after the modifying phrase suggests that “lawmakers” were pleading for the passage of antidiscrimination legislation. While it’s possible for lawmakers to plead for the passage of legislation, the context strongly suggests that it’s the activists who pleaded for years for the passage of antidiscrimination legislation.

▼ 2.39 — D

Choice D is the best answer. The convention being tested is subject–verb agreement. The singular verb “is” agrees in number with the singular subject “the triangle.”

Choice A is incorrect because the plural verb “are” doesn’t agree in number with the singular subject “the triangle.” Choice B is incorrect because the plural verb “have been” doesn’t agree in number with the singular subject “the triangle.” Choice C is incorrect because the plural verb “were” doesn’t agree in number with the singular subject “the triangle.”

▼ 2.40 — B

Choice B is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite to-infinitive verb “to create” is correctly used to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps (by analyzing and arranging certain data).

Choice A is incorrect because it results in an ungrammatical sentence. The finite verb “create” can’t be used in this way to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps. Choice C is incorrect because it results in an ungrammatical sentence. The nonfinite participle “creating” can’t be used in this way to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps. Choice D is incorrect because it results in an ungrammatical sentence. The finite verb “created” can’t be used in this way to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps.

▼ 2.41 — A

Choice A is the best answer. The convention being tested is finite verb use in a main clause. A main clause requires a finite verb to perform the action of the subject (in this case, Ashford’s “gestures” and “habit”), and this choice supplies the finite past tense verb “helped” to indicate what Ashford’s gestures and habit helped accomplish.

Choice B is incorrect because the non-finite participle “helping” doesn’t supply the main clause with a finite verb. Choice C is incorrect because the relative clause “that helped” doesn’t supply the main clause with a finite verb. Choice D is incorrect because the non-finite to-infinitive “to help” doesn’t supply the main clause with a finite verb.

▼ 2.42 — A

Choice A is the best answer. Nothing belongs to the “poems” in the sentence, so it should not be possessive—just a simple plural noun. The protagonist does belong to the novel—it’s the protagonist of the novel—so “novel” needs to be a singular possessive noun.

Choice B is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. This choice uses the singular possessive "poem's," but the text indicates that it should be the simple plural "poems": there is more than one poem, and nothing belongs to the poems. Choice C is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. This choice uses the singular possessive "poem's," but the text indicates that it should be the simple plural "poems": there is more than one poem, and nothing belongs to the poems. This choice also uses the plural possessive "novels'," which is incorrect because there is only one novel. Choice D is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. This choice uses the plural possessive "novels'," which is incorrect because there is only one novel, so it should be the singular possessive "novel's." .

▼ 2.43 — D

Choice D is the best answer. The convention being tested is pronoun-antecedent agreement. The singular pronoun "it" agrees in number with the singular antecedent "water" and clearly indicates that the water swirls into a whirlpool.

Choice A is incorrect. The plural pronoun "these" neither agrees in number with the singular antecedent "water" nor clearly indicates that the water—not another plural noun in the sentence, such as "landmasses" or "winds"—swirls into a whirlpool. Choice B is incorrect. The plural pronoun "those" neither agrees in number with the singular antecedent "water" nor clearly indicates that the water—not another plural noun in the sentence, such as "landmasses" or "winds"—swirls into a whirlpool. Choice C is incorrect. The plural pronoun "them" neither agrees in number with the singular antecedent "water" nor clearly indicates that the water—not another plural noun in the sentence, such as "landmasses" or "winds"—swirls into a whirlpool.

▼ 2.44 — C

Choice C is the best answer. The convention being tested is the use of plural and possessive nouns. The singular possessive noun "playa's" and the plural possessive noun "rocks'" correctly indicate that the sediment is that of one playa (the Racetrack Playa) and that there are multiple rocks that have mysteriously migrated across the sediment.

Choice A is incorrect because the context requires the singular possessive noun "playa's" and the plural possessive noun "rocks'," not the plural noun "playas" and the singular possessive noun "rock's." Choice B is incorrect because the context requires the plural possessive noun "rocks'," not the plural noun "rocks." Choice D is incorrect because the

context requires the singular possessive noun “playa’s,” not the plural possessive noun “playas’.”

▼ 2.45 — A

Choice A is the best answer. The convention being tested is the use of plural nouns. The plural nouns "terms" and "presidents" correctly indicate that the amendment involves multiple terms and applies to presidents in general.

Choice B is incorrect because the context requires the plural noun "terms," not the singular possessive noun "term’s." Choice C is incorrect because the context requires the plural nouns "terms" and "presidents," not the singular possessive nouns "term’s" and "president’s." Choice D is incorrect because the context requires the plural noun "presidents," not the singular possessive noun "president’s."

▼ 2.46 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The plural verb “were signed” agrees in number with the plural subject “the treaties.”

Choice B is incorrect because the singular verb “is signed” doesn’t agree in number with the plural subject “the treaties.” Choice C is incorrect because the singular verb “was signed” doesn’t agree in number with the plural subject “the treaties.” Choice D is incorrect because the singular verb “has been signed” doesn’t agree in number with the plural subject “the treaties.”

▼ 2.47 — D

Choice D is the best answer. The object for the verb "was" is "first," and "to place" is acting as a modifier for "first." What was the finding? It was "the first." The first to do what? The first "to place humans in North America" 10,000 years ago. When a verb serves as a modifier within a noun phrase, it must be nonfinite (i.e., not conjugated to a specific subject). The infinitive form "to place" is the only nonfinite option among the choices that makes sense in context.

Choice A is incorrect. The object for the verb "was" is "first," and "places" is acting as a modifier for "first." What was the thing that Parker’s finding did? What was it the first to do? Place humans in North America 10,000 years ago. When a verb acts as a modifier, it must be nonfinite (i.e., not conjugated to a specific subject), but "places" is a finite form of the verb. Choice B is incorrect. The object for the verb "was" is "first," and "placed" is acting to

modify "first." What was it that Parker's finding was the first to do? Place humans in North America 10,000 years ago. When a verb acts as a modifier, it must be nonfinite (i.e., not conjugated to a specific subject), but "placed" is a finite form. "Placed" can also be a past participle, but that wouldn't make sense here because the meaning of "the first placed humans" would be unclear. Choice C is incorrect. The object for the verb "was" is "first," and "place" is modifying "first." What was the thing that Parker's finding did? What was it the first to do? Place humans in North America. When a verb acts as a modifier, it must be nonfinite (i.e., not conjugated to a specific subject), but "place" is a finite form of the verb. Additionally, "place" can't serve as a noun here, because it results in an illogical sentence (the "finding" wasn't "the first place").

▼ 2.48 — A

Choice A is the best answer. The convention being tested here is subject-verb agreement. The singular verb "was" agrees in number with the singular subject "Josephine St. Pierre Ruffin."

Choice B is incorrect because the plural verb "were" doesn't agree in number with the singular subject "Josephine St. Pierre Ruffin." Choice C is incorrect because the plural verb "are" doesn't agree in number with the singular subject "Josephine St. Pierre Ruffin." Choice D is incorrect because the plural verb "have been" doesn't agree in number with the singular subject "Josephine St. Pierre Ruffin."

▼ 2.49 — B

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "the titles" the subject of the sentence and places it immediately after the modifying phrases "laden with emojis and seemingly meaningless words, and driven largely by Sawano's 'personal feeling and mood.'" In doing so, this choice clearly establishes that the titles—and not another noun in the sentence—are being described as laden with emojis and driven by Sawano's personal feeling.

Choice A is incorrect because it results in a dangling modifier. The placement of "the listener" immediately after the modifying phrases illogically suggests that the listener, rather than the titles, is laden with emojis and driven by Sawano's personal feeling. Choice C is incorrect because it results in a dangling modifier. The placement of "each piece" (i.e., musical score) immediately after the modifying phrases illogically suggests that the pieces, rather than the titles of the pieces, are laden with emojis and driven by Sawano's personal feeling. Choice D is incorrect because it results in a dangling modifier. The placement of "the

listener’s approach” immediately after the modifying phrases illogically suggests that the listener’s approach, rather than the titles, is laden with emojis and driven by Sawano’s personal feeling.

▼ 2.50 — D

Choice D is the best answer. The convention being tested is subject-verb agreement. The plural verb "come" agrees in number with the plural subject "nematodes."

Choice A is incorrect because the singular verb "has come" doesn’t agree in number with the plural subject "nematodes." Choice B is incorrect because the singular verb "comes" doesn’t agree in number with the plural subject "nematodes." Choice C is incorrect because the singular verb "is coming" doesn’t agree in number with the plural subject "nematodes."

▼ 2.51 — B

Choice B is the best answer. Modifiers and their subjects must go next to each other. The modifier “far from being modern inventions” must be describing “drinking straws,” because those are the only possible inventions in this sentence.

Choice A is incorrect. Modifiers and their subjects must go next to each other. The modifier “far from being modern inventions” can’t be describing “Sumerians,” because they are a group of people, not an invention. Choice C is incorrect. Modifiers and their subjects must go next to each other. The modifier “far from being modern inventions” can’t be describing “the use of drinking straws,” because it is not “the use” of drinking straws that is an invention—it is the drinking straws themselves. Choice D is incorrect. Modifiers and their subjects must go next to each other. The modifier “far from being modern inventions” can’t be describing “Ancient Mesopotamia,” because that is a place, not an invention.

▼ 2.52 — B

Choice B is the best answer. The conventions being tested are the use of plural and possessive nouns. The singular possessive noun "author’s" correctly indicates that the political writings are those of Thomas Paine, and the plural noun "writings" correctly indicates that multiple works by Paine are being discussed.

Choice A is incorrect because the context requires the singular possessive noun "author’s," not the plural noun "authors." Choice C is incorrect because the context requires the plural noun "writings," not the singular possessive noun "writing’s." Choice D is incorrect because

the context requires the singular possessive noun "author's" and the plural noun "writings," not the plural possessive nouns "authors'" and "writings'."

▼ 2.53 — B

Choice B is the best answer. The convention being tested is pronoun–antecedent agreement. The plural pronoun "they" agrees in number with the plural antecedent "woodcuts" and clearly identifies what was exhibited at the Smithsonian American Art Museum.

Choice A is incorrect because the singular pronoun "it" doesn't agree in number with the plural antecedent "woodcuts." Choice C is incorrect because the singular pronoun "this" doesn't agree in number with the plural antecedent "woodcuts." Choice D is incorrect because the plural pronoun "some" is illogical in this context (referring to "some" of two woodcuts).

▼ 2.54 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The plural verb "vary" agrees in number with the plural subject "such phrases." The supplementary phrase "known as story starters," set off by commas, doesn't change the subject's number.

Choice B is incorrect. The singular verb phrase "has varied" doesn't agree in number with the plural subject "such phrases." Choice C is incorrect. The singular verb "varies" doesn't agree in number with the plural subject "such phrases." Choice D is incorrect. The singular verb phrase "is varying" doesn't agree in number with the plural subject "such phrases."

▼ 2.55 — A

Choice A is the best answer. The convention being tested is the use of verbs to express tense. In this choice, the present tense verb "benefit" is consistent with the other present tense verbs ("is," "stands," and "are shared") used to describe worker cooperatives and how they function.

Choice B is incorrect because the past tense verb "benefited" isn't consistent with the other present tense verbs used to describe worker cooperatives and how they function. Choice C is incorrect because the past progressive tense verb "were benefiting" isn't consistent with the other present tense verbs used to describe worker cooperatives and how they function. Choice D is incorrect because the past perfect tense verb "had benefited" isn't consistent

with the other present tense verbs used to describe worker cooperatives and how they function.

▼ 2.56 — B

Choice B is the best answer. The convention being tested is subject-verb agreement. The plural verb "are" agrees in number with the plural compound subject "the trefoil knot and the figure-eight knot." The two types of knots joined by "and" function as a plural subject and thus require a plural verb.

Choice A is incorrect because the singular verb "was" doesn't agree in number with the plural compound subject "the trefoil knot and the figure-eight knot." Choice C is incorrect because the singular verb "has been" doesn't agree in number with the plural compound subject "the trefoil knot and the figure-eight knot." Choice D is incorrect because the singular verb "is" doesn't agree in number with the plural compound subject "the trefoil knot and the figure-eight knot."

▼ 2.57 — C

Choice C is the best answer. The convention being tested is subject-verb agreement. The singular verb "powers" agrees in number with the singular subject "an artificial intelligence."

Choice A is incorrect because the plural verb "have been powering" doesn't agree in number with the singular subject "an artificial intelligence." Choice B is incorrect because the plural verb "power" doesn't agree in number with the singular subject "an artificial intelligence." Choice D is incorrect because the plural verb "are powering" doesn't agree in number with the singular subject "an artificial intelligence."

▼ 2.58 — A

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "researcher Robert Losey" the subject of the sentence and places it immediately after the modifying phrase "since⋯Siberia." In doing so, this choice clearly establishes that researcher Robert Losey—and not another noun in the sentence—is who uncovered fragments of a 2,000-year-old reindeer training harness in northern Siberia.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase "researcher Robert Losey's argument" immediately after the modifying phrase illogically suggests that the "argument" is what uncovered fragments of a 2,000-year-old

reindeer training harness in northern Siberia. Choice C is incorrect because it results in a dangling modifier. The placement of the noun “domestication” immediately after the modifying phrase illogically suggests that “domestication” is what uncovered fragments of a 2,000-year-old reindeer training harness in northern Siberia. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “the argument” immediately after the modifying phrase illogically suggests that the “argument” is what uncovered fragments of a 2,000-year-old reindeer training harness in northern Siberia.

▼ 2.59 — A

Choice A is the best answer. The convention being tested is pronoun-antecedent agreement. The plural pronoun “they” agrees in number with the plural antecedent “rivers” and clearly expresses the general statement that rivers expand and contract as they accumulate sediment. Secondarily, the plural verb “accumulate” agrees in number with the plural pronoun and its plural antecedent.

Choice B is incorrect because the singular pronoun “one” doesn’t agree in number with the plural antecedent “rivers.” Choice C is incorrect because the singular pronoun “it” doesn’t agree in number with the plural antecedent “rivers.” Choice D is incorrect because the use of the personal pronoun “we” is illogical in this context; it suggests that a group of people (including the speaker) accumulate sediment, which doesn’t make sense.

▼ 2.60 — D

Choice D is the best answer. The subject of the verb is “Lincoln,” and the first sentence tells us that we’re talking about something that Abraham Lincoln did in 1860. So the simple past tense “leveraged” fits the logic of the text.

Choice A is incorrect. This choice creates a tense issue. “Has leveraged” is the present perfect tense, which is used for an action that began in the past and continues into the present. Lincoln started leveraging his rivals’ talents in 1860—it’s definitely not still happening today. So the present perfect tense isn’t appropriate. Choice B is incorrect. This choice creates a tense issue. “Is leveraging” is the present tense, but Lincoln leveraged his rivals’ talents in 1860, so the present tense isn’t appropriate. Choice C is incorrect. This choice creates a tense issue. “Will leverage” is the future tense, but Lincoln leveraged his rivals’ talents in 1860, so the future tense isn’t appropriate.

▼ 2.61 — D

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun “superlubricity” the subject of the sentence and places it immediately after the modifying phrase “a nearly frictionless…state.” In doing so, this choice clearly establishes that superlubricity—and not another noun in the sentence—is being described as nearly frictionless and extremely slippery.

Choice A is incorrect because it results in a dangling modifier. Regardless of the introductory “when…” clause, the main subject “two surfaces” follows the modifying phrase (“A nearly frictionless…state”), illogically suggesting that the surfaces are the nearly frictionless, extremely slippery state. Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “two surfaces” immediately after the modifying phrase illogically suggests that the surfaces are a nearly frictionless and extremely slippery state. Choice C is incorrect because it results in a dangling modifier. The placement of the gerund phrase “reaching superlubricity” immediately after the modifying phrase illogically suggests that the act of reaching superlubricity is the nearly frictionless, extremely slippery state.

▼ 2.62 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb "is" agrees in number with the singular subject "the Proto-Nilotic language."

Choice B is incorrect because the plural verb "are" doesn’t agree in number with the singular subject "the Proto-Nilotic language." Choice C is incorrect because the plural verb "have been" doesn’t agree in number with the singular subject "the Proto-Nilotic language." Choice D is incorrect because the plural verb "were" doesn’t agree in number with the singular subject "the Proto-Nilotic language."

▼ 2.63 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb “invites” agrees in number with the singular subject “Tracy Fullerton’s *Walden, a game*.”

Choice B is incorrect because the plural verb “invite” doesn’t agree in number with the singular subject “Tracy Fullerton’s *Walden, a game*.” Choice C is incorrect because the plural verb “are inviting” doesn’t agree in number with the singular subject “Tracy Fullerton’s *Walden, a game*.” Choice D is incorrect because the plural verb “have invited” doesn’t agree in number with the singular subject “Tracy Fullerton’s *Walden, a game*.”

▼ 2.64 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb "has entered" agrees in number with the singular subject "an abstract cubist painting."

Choice B is incorrect because the plural verb "have entered" doesn't agree in number with the singular subject "an abstract cubist painting." Choice C is incorrect because the plural verb "were entering" doesn't agree in number with the singular subject "an abstract cubist painting." Choice D is incorrect because the plural verb "enter" doesn't agree in number with the singular subject "an abstract cubist painting."

▼ 2.65 — D

Choice D is the best answer. The convention being tested is pronoun–antecedent agreement. The singular pronoun "it" agrees in number with the singular antecedent "violin" and thus indicates that the traditional violin (and not its curves) was made lighter.

Choice A is incorrect because the plural pronoun "those" doesn't agree in number with the singular antecedent "violin." Choice B is incorrect because the singular pronoun "one" is ambiguous in this context; the resulting sentence leaves unclear what Stradivari made lighter. Choice C is incorrect because the plural pronoun "them" doesn't agree in number with the singular antecedent "violin."

▼ 2.66 — D

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "the Alaska Centennial Commission" the subject of the sentence and places it immediately after the modifying phrase "wanting⋯Purchase." In doing so, this choice clearly establishes that the Alaska Centennial Commission—and not another noun in the sentence—wanted to celebrate the 100th anniversary of the Alaska Purchase.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase "a contest" immediately after the modifying phrase illogically suggests that the contest wanted to celebrate the 100th anniversary of the Alaska Purchase. Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase "an award of $300" immediately after the modifying phrase illogically suggests that the award of $300 wanted to celebrate the 100th anniversary of the Alaska Purchase. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase

"$300" immediately after the modifying phrase illogically suggests that the $300 wanted to celebrate the 100th anniversary of the Alaska Purchase.

▼ 2.67 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb "evokes" agrees in number with the singular subject "Alexander's use."

Choice B is incorrect because the plural verb "are evoking" doesn't agree in number with the singular subject "Alexander's use." Choice C is incorrect because the plural verb "have evoked" doesn't agree in number with the singular subject "Alexander's use." Choice D is incorrect because the plural verb "evoke" doesn't agree in number with the singular subject "Alexander's use."

▼ 2.68 — B

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "Anna Behrensmeyer" the subject of the sentence and places it immediately after the modifying phrase "a pioneer⋯fossils." In doing so, this choice clearly establishes that Anna Behrensmeyer—and not another noun in the sentence—is a pioneer in the field of taphonomy.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase "fossils of thin-shelled organisms" immediately after the modifying phrase illogically suggests that the "fossils" are a pioneer in the field of taphonomy. Choice C is incorrect because it results in a dangling modifier. The placement of the pronoun "it" immediately after the modifying phrase illogically suggests that "it" is a pioneer in the field of taphonomy. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase "a 2005 analysis" immediately after the modifying phrase illogically suggests that "a 2005 analysis" is a pioneer in the field of taphonomy.

▼ 2.69 — C

Choice C is the best answer. The convention being tested is the use of plural and possessive nouns. The singular possessive noun "screw's" and the plural noun "threads" correctly indicate that there is only one screw and it has multiple threads.

Choice A is incorrect because the context requires the plural noun "threads," not the singular possessive noun "thread's." Choice B is incorrect because the context requires the singular possessive noun "screw's," not the plural possessive noun "screws'." Choice D is incorrect

because the context requires the singular possessive noun “screw’s” and the plural noun “threads,” not the plural noun “screws” or the plural possessive noun “threads.’”

Choice C is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “Julian’s 1935 synthesis” the subject of the sentence and places it immediately after the modifying phrase “named…years.” In doing so, this choice clearly establishes that Julian’s 1935 synthesis of the alkaloid physostigmine—and not another noun in the sentence—was named in 1999 as one of the greatest achievements by a US chemist in the past hundred years.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun “Julian” immediately after the modifying phrase illogically suggests that Julian himself was named as one of the greatest achievements by a US chemist in the past hundred years. Choice B is incorrect because it results in a dangling modifier. The placement of the prepositional phrase “in 1935” immediately after the modifying phrase illogically and confusingly suggests that “in 1935” was named as one of the greatest achievements by a US chemist in the past hundred years. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “the alkaloid physostigmine” immediately after the modifying phrase illogically and confusingly suggests that the alkaloid physostigmine itself (not the synthesis of it) was named as one of the greatest achievements by a US chemist in the past hundred years.
