Rationales

▼ 3.1 — B

Choice B is the best answer. The convention being tested is the use of plural and possessive nouns. The plural possessive noun “grains’” and the plural noun “properties” correctly indicate that the simulations involved multiple snow grains and that those snow grains had several properties.

Choice A is incorrect because the context requires the plural possessive noun “grains’” and the plural noun “properties,” not the singular possessive noun “grain’s” and the plural possessive noun “properties’.” Choice C is incorrect because the context requires the plural noun “properties,” not the singular possessive noun “property’s.” Choice D is incorrect because the context requires the plural possessive noun “grains’,” not the plural noun “grains.”

▼ 3.2 — D

Choice D is the best answer. "That⋯[rain] back onto Mars’s surface" is a relative clause that describes the "bits of molten rock." Forming the clause requires a conjugated, finite verb, and this is the only choice that provides that.

Choice A is incorrect. "To rain" is an infinitive and can’t serve as the main verb of a clause. A conjugated verb is needed here to form the main verb of the relative clause "that⋯[rain] back onto Mars’s surface," which describes the "bits of molten rock." Choice B is incorrect. "Raining" is a present participle and, on its own, can’t serve as the main verb of a clause. A conjugated verb is needed here to form the main verb of the relative clause "that⋯[rain] back onto Mars’s surface," which describes the "bits of molten rock." Choice C is incorrect. "Having rained" is a perfect participle and can’t serve as the main verb of a clause. A conjugated verb is needed here to form the main verb of the relative clause "that⋯[rain] back onto Mars’s surface," which describes the "bits of molten rock."

▼ 3.3 — D

Choice D is the best answer. The convention being tested is subject-verb agreement. The singular verb "takes" agrees in number with the singular subject "a cycle of lunar phases."

Choice A is incorrect because the plural verb "are taking" doesn’t agree in number with the singular subject "a cycle of lunar phases." Choice B is incorrect because the plural verb "have taken" doesn’t agree in number with the singular subject "a cycle of lunar phases." Choice C is incorrect because the plural verb "take" doesn’t agree in number with the singular subject "a cycle of lunar phases."

▼ 3.4 — D

Choice D is the best answer. The conventions being tested are the use of possessive determiners and the use of plural nouns. The singular possessive determiner "its"—which agrees in number with the singular noun phrase "Mira Nair's 1991 film *Mississippi Masala*"—and the plural noun "protagonists" correctly indicate that Nair's film has multiple protagonists.

Choice A is incorrect because "it's" is the contraction for "it is," not a possessive determiner. Choice B is incorrect because the context requires the plural noun "protagonists," not the singular possessive noun "protagonist's." Choice C is incorrect because the context requires the possessive determiner "its" and the plural noun "protagonists," not the contraction "it's" or the singular possessive noun "protagonist's."

▼ 3.5 — A

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "the South Side Writers Group" the subject of the sentence and places it immediately after the modifying phrase "established in 1936 by African American novelist Richard Wright." In doing so, this choice clearly indicates that the South Side Writers Group—and not another noun in the sentence—was established in 1936 by Richard Wright.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase "Chicago writers" immediately after the modifying phrase illogically suggests that the Chicago writers were established in 1936 by Richard Wright. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase "writers" immediately after the modifying phrase illogically suggests that the writers were established in 1936 by Richard Wright. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase "Chicago" immediately after the modifying phrase illogically suggests that Chicago was established in 1936 by Richard Wright.

▼ 3.6 — C

Choice C is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite past participle "characterized" is correctly used within a supplementary element that modifies the main clause "Zhang…*shanshui*," defining *qinglü shanshui* and explaining some of its identifying traits.

Choice A is incorrect because it results in a comma splice. Using the finite present perfect tense verb "has been characterized" creates a second main clause in the sentence, and the

two main clauses can’t be joined in this way by only the comma before "a type." Choice B is incorrect because it results in a comma splice. Using the finite future tense verb "will be characterized" creates a second main clause in the sentence, and the two main clauses can’t be joined in this way by only the comma before "a type." Choice D is incorrect because it results in a comma splice. Using the finite present tense verb "is characterized" creates a second main clause in the sentence, and the two main clauses can’t be joined in this way by only the comma before "a type."

▼ 3.7 — D

Choice D is the best answer. The convention being tested is the use of possessive nouns. The plural possessive noun “towns’” correctly indicates that the natural beauty and unique cultural traditions belong to both Arteaga and Lagos de Moreno.

Choice A is incorrect because the context requires the plural possessive noun “towns’,” not the singular noun “town.” Choice B is incorrect because the context requires the plural possessive noun “towns’,” not the singular possessive noun “town’s.” Choice C is incorrect because the context requires the plural possessive noun “towns’,” not the plural noun “towns.”

▼ 3.8 — A

Choice A is the best answer. The convention being tested is the use of possessive determiners. The plural possessive determiner "their" agrees in number with the plural noun "the poems," thus indicating that the poems had eight panels of text stitched together in the shape of a traditional eight-pointed Lakota star quilt.

Choice B is incorrect because "it’s" is the contraction for "it is" or "it has," not a possessive determiner. Choice C is incorrect because "they’re" is the contraction for "they are," not a possessive determiner. Choice D is incorrect because the singular possessive determiner "its" doesn’t agree in number with the plural noun "the poems."

▼ 3.9 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb “focuses” agrees in number with the singular subject “each one of these plays.” While the prepositional phrase “of these plays” within the subject contains a plural noun, the head of the subject (“each one”) is singular, indicating that each individual play focuses on a single historical figure.

Choice B is incorrect because the plural verb “focus” doesn’t agree in number with the singular subject “each one of these plays.” Choice C is incorrect because the plural verb “are focused” doesn’t agree in number with the singular subject “each one of these plays.” Choice D is incorrect because the plural verb “were focused” doesn’t agree in number with the singular subject “each one of these plays.”

▼ 3.10 — C

Choice C is the best answer. The convention being tested is the use of punctuation and verb forms within a sentence. This choice leaves the verb "admired" in its nonfinite past participle form to function within a supplementary element ("much⋯followed"). Offset by commas after "works" and "followed," this supplementary element interrupts the main clause ("English poet and Shakespeare contemporary John Donne’s works⋯had⋯been essentially gathering dust⋯") with additional information about the works’ reception during Donne’s lifetime.

Choice A is incorrect because it fails to offset the supplementary element ("much⋯ followed") with appropriate punctuation, and using the finite verb "were much admired" results in an ungrammatical sentence. Choice B is incorrect because using the finite verb "were much admired" results in an ungrammatical sentence. Choice D is incorrect because it fails to offset the supplementary element ("much⋯followed") with appropriate punctuation, and using the finite verb "had been much admired" results in an ungrammatical sentence.

▼ 3.11 — B

Choice B is the best answer. The convention being tested is subject-verb agreement. The plural verb "increase" agrees in number with the plural subject "toxins."

Choice A is incorrect because the singular verb "is increasing" doesn’t agree in number with the plural subject "toxins." Choice C is incorrect because the singular verb "increases" doesn’t agree in number with the plural subject "toxins." Choice D is incorrect because the singular verb "has increased" doesn’t agree in number with the plural subject "toxins."

▼ 3.12 — B

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "Iceland’s parliament" the subject of the sentence and places it immediately after the modifying phrase "a government body officially known as the

Althing." In doing so, this choice clearly establishes that Iceland's parliament—and not another noun in the sentence—is the government body known as the Althing.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase "the world's oldest parliaments" immediately after the modifying phrase illogically suggests that the world's oldest parliaments are a government body known as the Althing. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase "the first meeting" immediately after the modifying phrase illogically suggests that the first meeting of Iceland's parliament was a government body known as the Althing. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase "930 CE" immediately after the modifying phrase illogically suggests that the year 930 CE is a government body known as the Althing.

▼ 3.13 — D

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "pine trees and the fungus *Tricholoma matsutake*" the subject of the sentence and places it immediately after the modifying phrase "forming⋯ association." In doing so, this choice clearly establishes that the pine trees and fungus—and not another noun in the sentence—are forming the networks.

Choice A is incorrect because it results in a dangling modifier. The placement of the it-cleft "it is" immediately after the modifying phrase illogically and confusingly suggests that "it" is forming extensive networks. Furthermore, it's not conventional to follow a long introductory modifying element with an it-cleft construction because it results in an unnecessarily wordy and confusing sentence, such as this. Choice B is incorrect because it results in a dangling modifier. The placement of "the transport of nutrients" immediately after the modifying phrase illogically suggests that the transport of nutrients is forming extensive networks. Choice C is incorrect because it results in a dangling modifier. The placement of "nutrients" immediately after the modifying phrase illogically suggests that nutrients are forming extensive networks.

▼ 3.14 — A

Choice A is the best answer. The convention being tested is the use of possessive determiners. The singular possessive determiner "its" agrees in number with the singular noun "the North Sea" and thus indicates that the shores are those of the North Sea.

Choice B is incorrect because “it’s” is the contraction for “it is” or “it has,” not a possessive determiner. Choice C is incorrect because “they’re” is the contraction for “they are,” not a possessive determiner. Choice D is incorrect because the plural possessive determiner “their” doesn’t agree in number with the singular noun “the North Sea.”

▼ 3.15 — D

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes “silica glass’s atomic arrangement” the subject of the sentence and places it immediately after the modifying phrase “compared to that of alumina glass.” In doing so, this choice clearly establishes that silica glass’s atomic arrangement—and not another noun in the sentence—is being compared to the atomic arrangement (“that”) of alumina glass.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase “silica glass” immediately after the modifying phrase illogically suggests that silica glass itself (rather than its atomic arrangement) is being compared to alumina glass’s atomic arrangement. Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “silica glass” immediately after the modifying phrase illogically suggests that silica glass itself (rather than its atomic arrangement) is being compared to alumina glass’s atomic arrangement. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “a significant disadvantage” immediately after the modifying phrase illogically suggests that “a significant disadvantage” is being compared to alumina glass’s atomic arrangement.

▼ 3.16 — B

Choice B is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle “searching” is correctly used to form a supplementary element that modifies the subject “scientists,” indicating that the scientists who adapted the test were looking for evidence of self-awareness in snakes.

Choice A is incorrect because it results in an ungrammatical sentence. The finite past tense verb “searched” can’t be used in this way to form a supplementary element that indicates what evidence the scientists who adapted the test were looking for. Choice C is incorrect because it results in an ungrammatical sentence. The finite past progressive verb “were searching” can’t be used in this way to form a supplementary element that indicates what evidence the scientists who adapted the test were looking for. Choice D is incorrect because it results in an ungrammatical sentence. The finite present perfect verb “have searched”

can’t be used in this way to form a supplementary element that indicates what evidence the scientists who adapted the test were looking for.

▼ 3.17 — C

Choice C is the best answer. The singular possessive pronoun "its" agrees with the singular antecedent "the animal" and indicates that the "young" belong to it.

Choice A is incorrect. This choice creates a pronoun-antecedent agreement error. "They’re" is a contraction of "they are," a plural pronoun and verb, but the antecedent "the animal" is singular. Also, we don’t need the extra verb "are" — we already have a main verb in this clause, so adding "are" would be confusing and ungrammatical. Choice B is incorrect. This choice creates a pronoun-antecedent agreement error. "Their" is a plural pronoun, but the subject of the sentence is "the animal," a singular noun. Choice D is incorrect. This choice creates a confusing and ungrammatical sentence. "It’s" is a contraction for "it is." We already have the verb "nurses" in this clause, so we shouldn’t add the verb "is."

▼ 3.18 — D

Choice D is the best answer. The convention being tested is finite and nonfinite verb forms within a sentence. Relative clauses, such as the one beginning with “that,” require a finite verb, a verb that can function as the main verb of a clause. This choice correctly supplies the clause with the finite future tense verb “will be.”

Choice A is incorrect because the nonfinite participle “being” doesn’t supply the clause with a finite verb. Choice B is incorrect because the nonfinite to-infinitive “to be” doesn’t supply the clause with a finite verb. Choice C is incorrect because the nonfinite to-infinitive “to have been” doesn’t supply the clause with a finite verb.

▼ 3.19 — B

Choice B is the best answer. The convention being tested is the use of possessive nouns. The singular possessive nouns "rock’s" and "rap’s" correctly indicate that the chorus-to-verse ratios belong to the genres of rock and rap.

Choice A is incorrect because the context requires the singular possessive nouns "rock’s" and "rap’s," not the plural nouns "rocks" and "raps." Choice C is incorrect because the context requires the singular possessive noun "rock’s," not the plural noun "rocks." Choice D is incorrect because the context requires the singular possessive noun "rock’s," not the singular noun "rock." This choice incorrectly suggests that there was a single chorus-to-

verse ratio for rock and rap together, whereas the ratio was calculated for each genre individually.

▼ 3.20 — B

Choice B is the best answer. Subject-modifier placement requires a modifier and its subject to be next to each other. The subject of the modifier "a coming-of-age story⋯colonialism" is Chraïbi's novel *The Simple Past*, so the subject "Chraïbi's debut novel" fits perfectly after this introductory modifying phrase.

Choice A is incorrect. Modifiers and their subjects must go next to each other. The introductory modifier "a coming-of-age story⋯colonialism" is describing Chraïbi's novel, not Morocco. However, this choice places Morocco directly next to that modifier. Choice C is incorrect. Modifiers and their subjects must go next to each other. The introductory modifier "a coming-of-age story⋯colonialism" all describes Chraïbi's novel, not Chraïbi himself. However, this choice places Chraïbi directly next to that modifier. Choice D is incorrect. Modifiers and their subjects must go next to each other. The modifier "a coming-of-age story⋯" is describing Chraïbi's novel, so that needs to be the subject immediately after the modifier. This choice adds another modifier that describes Chraïbi's novel, but then puts "Chraïbi" himself—not the novel—right after that modifier, which doesn't make sense. Chraïbi wasn't "published two years before" Moroccan independence; his novel *The Simple Past* was.

▼ 3.21 — A

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. The singular verb "is" agrees in number with the singular subject "each one of a ghazal's couplets." While the prepositional phrase "of a ghazal's couplets" within the subject contains a plural noun, the head of the subject ("each one") is singular, indicating that each individual couplet (not the couplets as a group) is "thematically and logically autonomous," or self-standing.

Choice B is incorrect because the plural verb "were" doesn't agree in number with the singular subject "each one of a ghazal's couplets." Choice C is incorrect because the plural verb "have been" doesn't agree in number with the singular subject "each one of a ghazal's couplets." Choice D is incorrect because the plural verb "are" doesn't agree in number with the singular subject "each one of a ghazal's couplets."

▼ 3.22 — B

Choice B is the best answer. The convention being tested is subject-verb agreement. The singular verb "is" agrees in number with the singular subject "the shape."

Choice A is incorrect because the plural verb "are" doesn't agree in number with the singular subject "the shape." Choice C is incorrect because the plural verb "were" doesn't agree in number with the singular subject "the shape." Choice D is incorrect because the plural verb "have been" doesn't agree in number with the singular subject "the shape."

▼ 3.23 — D

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "findings from a 2022 study" the subject of the sentence and places it immediately after the modifying phrase "supported…Ages." In doing so, this choice clearly establishes that the findings—and not another noun in the sentence—are supported by the biochemical analyses.

Choice A is incorrect because it results in a dangling modifier. The placement of "vegetables and grains" immediately after the modifying phrase illogically suggests that vegetables and grains are supported by biochemical analyses. Choice B is incorrect because it results in a dangling modifier. The placement of "early medieval rulers' diets" immediately after the modifying phrase illogically suggests that the rulers' diets are supported by biochemical analyses. Choice C is incorrect because it results in a dangling modifier. The placement of "the primary components" immediately after the modifying phrase illogically suggests that the primary components are supported by biochemical analyses.

▼ 3.24 — A

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "the researchers" the subject of the sentence and places it immediately after the modifying phrase "knowing⋯day." In doing so, this choice clearly establishes that the researchers—and not another noun in the sentence—know that flying insects keep their backs pointed toward sunlight during the day.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase "the researchers' theory" immediately after the modifying phrase illogically suggests that the researchers' theory knows that flying insects keep their backs pointed toward sunlight during the day. Choice C is incorrect because it results in a dangling modifier. The placement of the noun "moths" immediately after the modifying phrase illogically suggests that moths know that flying insects keep their backs pointed toward sunlight during the day.

Choice D is incorrect because it results in a dangling modifier. The placement of the noun "moths" immediately after the modifying phrase illogically suggests that moths know that flying insects keep their backs pointed toward sunlight during the day.

▼ 3.25 — D

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice ensures that the modifying phrase “despite being cheap, versatile, and easy to produce” appears immediately before the noun it modifies, “commercial plastics,” clearly establishing that the commercial plastics—and not another noun in the sentence—are being described as cheap, versatile, and easy to produce.

Choice A is incorrect because it results in a dangling modifier. The placement of the function word “there” immediately after the modifying phrase illogically and confusingly suggests that “there” is cheap, versatile, and easy to produce. Choice B is incorrect because it results in a dangling modifier. The placement of the noun “two problems” immediately after the modifying phrase illogically suggests that the “problems” are cheap, versatile, and easy to produce. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “commercial plastics’ two associated problems” immediately after the modifying phrase illogically suggests that the “problems” are cheap, versatile, and easy to produce.

▼ 3.26 — D

Choice D is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle “prioritizing” is correctly used to form a supplementary element that modifies “their design,” describing what the headrests’ design prioritized.

Choice A is incorrect because it results in a comma splice. The finite past perfect verb “had prioritized” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses. Choice B is incorrect because it results in a comma splice. The finite past progressive verb “was prioritizing” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses. Choice C is incorrect because it results in a comma splice. The finite past tense verb “prioritized” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses.

▼ 3.27 — D

Choice D is the best answer. The convention being tested is pronoun-antecedent agreement. The singular pronoun “it” agrees in number with the singular antecedent “a given term” and clearly indicates that the term becomes susceptible to obliteration by incorporation.

Choice A is incorrect because the plural pronoun “they” neither agrees in number with the singular antecedent “a given term” nor clearly indicates that the given term—not another plural noun in the sentence, such as “examples”—becomes susceptible to obliteration by incorporation. Choice B is incorrect because the plural pronoun “these” neither agrees in number with the singular antecedent “a given term” nor clearly indicates that the given term—not another plural noun in the sentence, such as “examples”—becomes susceptible to obliteration by incorporation. Choice C is incorrect because the singular pronoun “this” is ambiguous in this context, leaving unclear what exactly becomes susceptible to obliteration by incorporation.

▼ 3.28 — B

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “the bioswales” the subject of the sentence and places it immediately after the modifying phrase “By reducing…sewers.” In doing so, this choice clearly establishes that the bioswales—and not another noun in the sentence—are reducing runoff flowing into city sewers.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase “the mitigation…waterways” immediately after the modifying phrase results in unclear modification. The resulting sentence makes it hard to determine what is responsible for “reducing the runoff”: the bioswales or some other noun in the sentence. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “the bioswales’ mitigation…waterways” immediately after the modifying phrase results in unclear modification. The resulting sentence makes it hard to determine what is responsible for “reducing the runoff”: the bioswales or some other noun in the sentence. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “street flooding and the resulting pollution” immediately after the modifying phrase illogically suggests that the “flooding and pollution” are reducing runoff flowing into city sewers.

▼ 3.29 — A

Choice A is the best answer. The convention being tested is the use of finite and nonfinite verb forms within a sentence. The nonfinite to-infinitive “to forge” is correctly used to form a

nonfinite (infinitive) clause that explains why the chemists re-created and reprogrammed the DNA-cleaving bacteria.

Choice B is incorrect. Without a comma separating the main clause (“chemists…bacteria”) from the participle “forging,” this choice illogically suggests that the bacteria are forging a tool, which doesn’t make sense. Choice C is incorrect. Without a coordinating conjunction such as “and” placed before it, the finite past tense verb “forged” can’t be used in this way to describe the chemists’ actions. Choice D is incorrect. If read as a finite verb, the present progressive verb “forging” isn’t consistent with the past tense verbs used in this sentence to describe the actions of the chemists. If read as a nonfinite verb, the participle “forging” can’t be used in this way because there is no following main clause for it to modify.

▼ 3.30 — C

Choice C is the best answer. The convention being tested is the use of possessive determiners. The singular possessive determiner "its" agrees in number with the singular subject "the Tajik Republic" and thus indicates that the other republics were its peers.

Choice A is incorrect because the plural possessive determiner "their" doesn’t agree in number with the singular subject "the Tajik Republic." Choice B is incorrect because "they’re" is the contraction for "they are," not a possessive determiner. Choice D is incorrect because "it’s" is the contraction for "it is" or "it has," not a possessive determiner.

▼ 3.31 — C

Choice C is the best answer. The convention being tested is pronoun-antecedent agreement. The singular pronoun "it" agrees in number with the singular antecedent "industry" and clearly indicates that the industry consists of just one or two suppliers per municipality.

Choice A is incorrect. The plural pronoun "these" neither agrees in number with the singular antecedent "industry" nor clearly indicates that the industry—not another plural noun in the sentence, such as "start-up costs" or "barriers"—consists of just one or two suppliers per municipality. Choice B is incorrect because the plural pronoun "they" doesn’t agree in number with the singular antecedent "industry." Choice D is incorrect because the singular pronoun "this" is ambiguous in this context; the resulting sentence leaves unclear what consists of just one or two suppliers per municipality.

▼ 3.32 — B

Choice B is the best answer. The conventions being tested are the use of plural and possessive nouns. The plural noun "variables" correctly indicates that there are multiple variables, and the plural possessive noun "objects'" correctly indicates that the movement of objects in general is being discussed.

Choice A is incorrect because the context requires the plural noun "variables," not the singular possessive noun "variable's." Choice C is incorrect because the context requires the plural possessive noun "objects'," not the singular possessive noun "object's." Choice D is incorrect because the context requires the plural possessive noun "objects'," not the plural noun "objects."

▼ 3.33 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The plural verb "explore" agrees in number with the plural subject "Barrada's pieces."

Choice B is incorrect because the singular verb phrase "has explored" doesn't agree in number with the plural subject "Barrada's pieces." Choice C is incorrect because the singular verb "explores" doesn't agree in number with the plural subject "Barrada's pieces." Choice D is incorrect because the nonfinite participle "exploring" doesn't supply the main clause with a finite verb.

▼ 3.34 — B

Choice B is the best answer. The convention being tested is subject-verb agreement. The singular verb "reinforces" agrees in number with the singular subject "the presence."

Choice A is incorrect because the plural verb "have reinforced" doesn't agree in number with the singular subject "the presence." Choice C is incorrect because the plural verb "are reinforcing" doesn't agree in number with the singular subject "the presence." Choice D is incorrect because the plural verb "reinforce" doesn't agree in number with the singular subject "the presence."

▼ 3.35 — C

Choice C is the best answer. The convention being tested is the use of possessive determiners. The plural possessive determiner "their" agrees in number with the plural noun "types" and thus indicates that the more personal subject matter of Marisol's 1968 sculpture takes the place of those types of pop culture references that made Marisol a star.

Choice A is incorrect because the singular possessive determiner "its" doesn't agree in number with the plural noun "types." Choice B is incorrect because "they're" is the contraction for "they are," not a possessive determiner. Choice D is incorrect because "it's" is the contraction for "it is" or "it has," not a possessive determiner.

▼ 3.36 — D

Choice D is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle verb "looking" is correctly used to form a subordinate clause that describes the intent behind how L'Engle begins her novel.

Choice A is incorrect because the finite past tense verb "looked" can't be used in this way to form a subordinate clause. Choice B is incorrect because the finite present tense verb "looks" can't be used in this way to form a subordinate clause. Choice C is incorrect because the finite present progressive tense verb "is looking" can't be used in this way to form a subordinate clause.

▼ 3.37 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb "has enhanced" agrees in number with the singular subject "*A Sheaf Gleaned in French Fields,*" which is the title of a book of poems.

Choice B is incorrect because the plural verb "are enhancing" doesn't agree in number with the singular subject "*A Sheaf Gleaned in French Fields*." Choice C is incorrect because the plural verb "have enhanced" doesn't agree in number with the singular subject "*A Sheaf Gleaned in French Fields*." Choice D is incorrect because the plural verb "enhance" doesn't agree in number with the singular subject "*A Sheaf Gleaned in French Fields*."

▼ 3.38 — C

Choice C is the best answer. The convention being tested is the use of verb forms within a sentence. The sentence's subject is "a unique tradition of embroidery," and its finite main verb is "remains." This choice correctly uses the nonfinite present participle "dating" to form an integrated participial phrase ("dating…years") that modifies the subject, providing additional information about how far back the tradition goes.

Choice A is incorrect because it results in an ungrammatical sentence. Using the finite present tense verb "dates" creates a second finite verb in the main clause, which already has the finite verb "remains" as its main verb. Choice B is incorrect because it results in an

ungrammatical sentence. Using the finite present tense verb “date” creates a second finite verb in the main clause, which already has the finite verb “remains” as its main verb. Furthermore, the plural verb “date” doesn’t agree in number with the singular subject, “a unique tradition of embroidery.” Choice D is incorrect because it results in an ungrammatical sentence. Using the finite present perfect tense verb “has dated” creates a second finite verb in the main clause, which already has the finite verb “remains” as its main verb.

▼ 3.39 — B

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “amorphous ice” the subject of the sentence and places it immediately after the modifying phrase “defined···structure.” In doing so, this choice clearly establishes that amorphous ice—and not another noun in the sentence—is being described as having a disorganized molecular structure.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun “ice Ih” immediately after the modifying phrase illogically suggests that ice Ih has a disorganized molecular structure, whereas ice Ih is previously described as having molecules that form a hexagonal pattern. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “the lack of thermal energy” immediately after the modifying phrase illogically suggests that the lack of thermal energy has a disorganized molecular structure. Choice D is incorrect because it results in a dangling modifier. The placement of “ice Ih” immediately after the modifying phrase illogically suggests that ice Ih has a disorganized molecular structure, whereas ice Ih is previously described as having molecules that form a hexagonal pattern.

▼ 3.40 — D

Choice D is the best answer. The convention being tested is subject-verb agreement. The singular verb "identifies" agrees in number with the singular subject "analysis."

Choice A is incorrect because the plural verb "are identifying" doesn’t agree in number with the singular subject "analysis." Choice B is incorrect because the plural verb "identify" doesn’t agree in number with the singular subject "analysis." Choice C is incorrect because the plural verb "have identified" doesn’t agree in number with the singular subject "analysis."

▼ 3.41 — D

Choice D is the best answer. The convention being tested is the use of verb forms and punctuation within a sentence. The sentence's subject is "Udé," and its finite main verb is "honors." This choice correctly uses the nonfinite participle "having referred" to form a supplementary element ("having...excellence") describing Udé. The comma after "Udé" appropriately marks the boundary before that supplementary element.

Choice A is incorrect because using the finite verb "has referred" creates an ungrammatical sentence. The sentence already has the finite main verb "honors," so "has referred" can't also function as a second main verb here without additional punctuation or conjunctions. Moreover, no punctuation is needed when a subject ("Udé") is immediately followed by a finite verb ("has referred"). Choice B is incorrect because using the finite verb "has referred" creates an ungrammatical sentence. The sentence already has the finite main verb "honors," so "has referred" can't also function as a second main verb here without additional punctuation or conjunctions. Choice C is incorrect because using the finite verb "referred" creates an ungrammatical sentence. The sentence already has the finite main verb "honors," so "referred" can't also function as a second main verb here without additional punctuation or conjunctions.

▼ 3.42 — A

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. A main clause requires a finite (tensed) verb to perform the action of the subject. In this case, the subject is "several advantages," and the present perfect tense verb "have positioned" supplies the finite verb to indicate what has made acoustic waves a promising alternative to electrical waves.

Choice B is incorrect because it results in an ungrammatical sentence. The nonfinite participle "positioning" doesn't supply the main clause with a finite verb. Choice C is incorrect because it results in an ungrammatical sentence. The prepositional phrase "by positioning" doesn't supply the main clause with a finite verb. Choice D is incorrect because it results in an ungrammatical sentence. The nonfinite participle "having positioned" doesn't supply the main clause with a finite verb.

▼ 3.43 — C

Choice C is the best answer. The convention being tested is the use of verb forms within a sentence. This choice pairs the comma after "Serra" with the comma after "environment" and uses the nonfinite present participle "intending" to correctly form a supplementary phrase describing the reaction Serra intends his sculptures to provoke. This supplementary

phrase appears between the noun phrase that it modifies ("American abstract artist Richard Serra") and the finite present tense verb ("assembles"), which functions as the sentence's main verb and describes what Serra does.

Choice A is incorrect because it results in an ungrammatical sentence. The finite present continuous tense verb "is intending" can't be used in this way in conjunction with the finite present tense verb "assembles," which already functions as the main verb in the sentence. Choice B is incorrect because it results in an ungrammatical sentence. The finite present tense verb "intends" can't be used in this way to supplement the noun phrase "American abstract artist Richard Serra." Choice D is incorrect because it results in an ungrammatical sentence. The finite present tense verb "intends" can't be used in this way in conjunction with the finite present tense verb "assembles," which already functions as the main verb in the sentence.

▼ 3.44 — C

Choice C is the best answer. The word "earning" is being used to introduce an additional modifying phrase, which describes how Fairuz's repertoire lent her cross-generational appeal. When a verb ends in -ing and doesn't have a helper verb like "is" before it, it can be used to modify a noun or verb. This is appropriate here.

Choice A is incorrect. The underlined verb is being used to introduce additional descriptive information, which is set off from the rest of the sentence by a comma. Because there is no subject here, a finite form of the verb (like "earned") creates an error. We need another form of the verb that doesn't require a subject and can introduce descriptive information. Choice B is incorrect. The underlined verb is being used to introduce additional descriptive information, which is set off from the rest of the sentence by a comma. Because there is no subject here, a finite form of the verb (like "had earned") creates an error. We need another form of the verb that doesn't require a subject and can introduce descriptive information. Choice D is incorrect. The underlined verb is being used to introduce additional descriptive information, which is set off from the rest of the sentence by a comma. Because there is no subject here, a finite form of the verb (like "earn") creates an error. We need another form of the verb that doesn't require a subject and can introduce descriptive information.

▼ 3.45 — A

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle "suggesting" is correctly used to form a restrictive participial phrase ("suggesting...Holocene") within the main clause ("This

hypothesis...cannot stand..."). This participial phrase functions as part of the sentence's subject ("This...Holocene"), providing essential identifying information about what the hypothesis states—namely, that certain trees survived without interruption or human intervention throughout the Holocene.

Choice B is incorrect because it results in an ungrammatical sentence. The finite verb "suggested" can't be used in this way within the subject of the sentence. Choice C is incorrect because it results in an ungrammatical sentence. The finite verb "suggests" can't be used in this way within the subject of the sentence. Choice D is incorrect because it results in an ungrammatical sentence. The finite verb "has suggested" can't be used in this way within the subject of the sentence.

▼ 3.46 — C

Choice C is the best answer. The convention being tested is subject-verb agreement. The plural verb "underlie" agrees in number with the plural subject "frameworks."

Choice A is incorrect because the singular verb "underlies" doesn't agree in number with the plural subject "frameworks." Choice B is incorrect because the singular verb "is underlying" doesn't agree in number with the plural subject "frameworks." Choice D is incorrect because the singular verb "has been underlying" doesn't agree in number with the plural subject "frameworks."

▼ 3.47 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb "animates" agrees in number with the singular subject "question."

Choice B is incorrect because the plural verb "have animated" doesn't agree in number with the singular subject "question." Choice C is incorrect because the plural verb "animate" doesn't agree in number with the singular subject "question." Choice D is incorrect because it results in an ungrammatical sentence. The nonfinite participle "animating" doesn't supply the clause with a finite verb.

▼ 3.48 — D

Choice D is the best answer. The convention being tested is subject-verb agreement. The plural verb "attest" agrees in number with the plural subject "trailblazing accomplishments."

Choice A is incorrect because the singular verb "attests" doesn't agree in number with the plural subject "trailblazing accomplishments." Choice B is incorrect because the singular verb "has attested" doesn't agree in number with the plural subject "trailblazing accomplishments." Choice C is incorrect because the singular verb "is attesting" doesn't agree in number with the plural subject "trailblazing accomplishments."

▼ 3.49 — B

Choice B is the best answer. The missing verb is part of the same clause as the verb "premiered," and "Price" is the subject of both. So we need the past-tense form "developed" in order to match "premiered."

Choice A is incorrect. This choice creates a verb form error. The missing verb is part of the same clause as the verb "premiered," and "Price" is the subject of both. So we need the past-tense form "developed" in order to match "premiered." Choice C is incorrect. This choice creates a verb form error. The missing verb is part of the same clause as the verb "premiered," and "Price" is the subject of both. So we need the past-tense form "developed" in order to match "premiered." Choice D is incorrect. This choice creates a verb form error. The missing verb is part of the same clause as the verb "premiered," and "Price" is the subject of both. So we need the past-tense form "developed" in order to match "premiered."

▼ 3.50 — A

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "topological tapestries" the subject of the sentence and places it immediately after the modifying phrase "woven⋯grandmother." In doing so, this choice clearly establishes that the topological tapestries—and not another noun in the sentence—are being described as woven from recycled yarn and hand tufted.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase "Argentine textile artist Alexandra Kehayoglou" immediately after the modifying phrase illogically suggests that Kehayoglou is woven from recycled yarn and hand tufted. Choice C is incorrect because it results in a dangling modifier. The placement of the pronoun "she" and the noun phrase "Argentine textile artist Alexandra Kehayoglou" after the modifying phrase illogically suggests that Kehayoglou is woven from recycled yarn and hand tufted. Choice D is incorrect because it results in a dangling modifier. The placement of the noun "Alexandra Kehayoglou" immediately after the modifying phrase illogically suggests that Kehayoglou is woven from recycled yarn and hand tufted.

▼ 3.51 — D

Choice D is the best answer. The convention being tested is the use of verb forms in a sentence. The plural verb “determine” supplies the main clause with a finite main verb and agrees in number with the plural subject “a state’s voting record and polling data.”

Choice A is incorrect because the singular verb “determines” doesn’t agree in number with the plural subject “a state’s voting record and polling data.” Choice B is incorrect because it results in an ungrammatical sentence. The nonfinite participle “determining” doesn’t supply the main clause with a finite plural verb. Choice C is incorrect because the singular verb “has determined” doesn’t agree in number with the plural subject “a state’s voting record and polling data.”

▼ 3.52 — D

Choice D is the best answer. The convention being tested is the use of verb forms within a sentence. The sentence’s subject is “Aslanian’s macroanalysis,” and its finite main verb is “shows.” This choice correctly uses the nonfinite present participle “examining” to form an integrated participial phrase (“examining…1800”) that describes the macroanalysis, indicating what it examined.

Choice A is incorrect because using the finite verb “examined” creates an ungrammatical sentence. The sentence already has the finite main verb “shows,” so “examined” can’t also function as a second main verb here without additional punctuation or conjunctions. Choice B is incorrect because using the finite verb “examines” creates an ungrammatical sentence. The sentence already has the finite main verb “shows,” so “examines” can’t also function as a second main verb here without additional punctuation or conjunctions. Choice C is incorrect because using the finite verb “had examined” creates an ungrammatical sentence. The sentence already has the finite main verb “shows,” so “had examined” can’t also function as a second main verb here without additional punctuation or conjunctions.

▼ 3.53 — C

Choice C is the best answer. The convention being tested is the use of verb forms in a sentence. The nonfinite past participle phrase "highly prized" is correctly used to form a supplementary element that modifies the main clause "this⋯artistry," describing memorable features of Brass Era automotive design.

Choice A is incorrect because it results in a comma splice. Using the finite present tense verb phrase "are highly prized" creates a second main clause in the sentence, and two main

clauses can’t be joined in this way with only a comma after "artistry." Choice B is incorrect because it results in a comma splice. Using the finite past perfect tense verb phrase "had been highly prized" creates a second main clause in the sentence, and two main clauses can’t be joined in this way with only a comma after "artistry." Choice D is incorrect because it results in a comma splice. Using the finite past tense verb phrase "were highly prized" creates a second main clause in the sentence, and two main clauses can’t be joined in this way with only a comma after "artistry."

▼ 3.54 — D

Choice D is the best answer. The convention being tested is subject-verb agreement. The singular verb "was" agrees in number with the singular subject "amplifying." Gerunds such as "amplifying" are always singular.

Choice A is incorrect because the plural verb "were" doesn’t agree in number with the singular subject "amplifying." Choice B is incorrect because the plural verb "have been" doesn’t agree in number with the singular subject "amplifying." Choice C is incorrect because the plural verb "are" doesn’t agree in number with the singular subject "amplifying."

▼ 3.55 — A

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “many critics” the subject of the sentence and places it immediately after the modifying phrase “in assessing…Kurosawa.” In doing so, this choice clearly establishes that it is the critics—and not another noun in the sentence—who assess Kurosawa’s films.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “Kurosawa’s…sources” immediately after the modifying phrase illogically suggests that his use of Western literary sources is what assesses Kurosawa’s films. Choice C is incorrect because it results in a dangling modifier. The placement of the function word “there” immediately after the modifying phrase illogically suggests that “there” is what assesses Kurosawa’s films. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “the focus…critics” immediately after the modifying phrase illogically suggests that the critics’ focus is what assesses Kurosawa’s films.

▼ 3.56 — D

Choice D is the best answer. The convention being tested is the use of punctuation within a sentence. The comma after “swimming” pairs with the dash after “ciliates” to offset the

supplementary element (“widely⋯ciliates”) that interrupts the main clause of the sentence.

Choice A is incorrect. Adding the verb “is” here creates an ungrammatical sentence structure with two main verbs (“is” and “bestows”) without appropriate punctuation and/or conjunction. Choice B is incorrect because it fails to offset the supplementary element with appropriate punctuation. Furthermore, adding the verb “is” here creates an ungrammatical sentence that has two finite verbs (“is” and “bestows”) without appropriate punctuation and/or conjunction. Choice C is incorrect because it fails to offset the supplementary element with appropriate punctuation. Furthermore, adding the verb “has been” here creates an ungrammatical sentence that has two finite verbs (“has been” and “bestows”) without appropriate punctuation and/or conjunction.

▼ 3.57 — C

Choice C is the best answer. The subject of the modifier "fortifying soil in arid ecosystems against erosion" is "biocrusts." Subject-modifier placement requires a modifier and its subject to be next to each other, so "biocrusts" or some variant meaning "biocrusts" (in this case, "these crusts") must begin the missing clause.

Choice A is incorrect. Modifiers and their subjects must go next to each other. The subject of the modifier "fortifying soil in arid ecosystems against erosion" is "biocrusts," not "a recent study’s estimate." Choice B is incorrect. Modifiers and their subjects must go next to each other. The subject of the modifier "fortifying soil in arid ecosystems against erosion" is "biocrusts," not "an estimated 60 percent reduction." Choice D is incorrect. Modifiers and their subjects must go next to each other. The subject of the modifier "fortifying soil in arid ecosystems against erosion" is "biocrusts," not "a recent study."

▼ 3.58 — D

Choice D is the best answer. The subject "talents" is plural, and so is the verb "aren’t": "the artistic talents⋯aren’t limited."

Choice A is incorrect. The subject "talents" is plural, but the verb "hasn’t been" is singular. Choice B is incorrect. The subject "talents" is plural, but the verb "wasn’t" is singular. Choice C is incorrect. The subject "talents" is plural, but the verb "isn’t" is singular.

▼ 3.59 — A

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice ensures that the introductory phrase “upon recovering two years later” appears

immediately before the noun it modifies (“Henry”), clearly establishing that Henry recovered two years later.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “the reign of Henry” immediately after the introductory phrase illogically suggests that the reign of Henry recovered two years later. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “Henry’s reign” immediately after the introductory phrase illogically suggests that Henry’s reign recovered two years later. Choice D is incorrect because it results in a dangling modifier. The placement of the function word “it” immediately after the introductory phrase illogically suggests that “it” recovered two years later.

▼ 3.60 — A

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun “electrograms” the subject of the sentence and places it immediately after the modifying phrase “recordings of electrical activity in the brain.” In doing so, this choice clearly establishes that electrograms—and not other nouns or noun phrases in the sentence—are recordings of electrical activity in the brain.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “the most highly skilled soccer players” immediately after the modifying phrase illogically suggests that the players are recordings of electrical activity in the brain. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “responses to hypothetical match scenarios” immediately after the modifying phrase illogically suggests that these responses are recordings of electrical activity in the brain. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “hypothetical match scenario responses” immediately after the opening phrase illogically suggests that these responses are recordings of electrical activity in the brain.

▼ 3.61 — D

Choice D is the best answer. The subject "survey" is singular, and so is the verb "was."

Choice A is incorrect. The subject "survey" is singular, but the verb "are" is plural. Choice B is incorrect. The subject "survey" is singular, but the verb "were" is plural. Choice C is incorrect. The subject "survey" is singular, but the verb "have been" is plural.

▼ 3.62 — D

Choice D is the best answer. The convention being tested is subject-verb agreement. The singular verb "is credited" agrees in number with the singular subject "mathematician Grigori Perelman."

Choice A is incorrect because the plural verb "are credited" doesn't agree in number with the singular subject "mathematician Grigori Perelman." Choice B is incorrect because the plural verb "have been credited" doesn't agree in number with the singular subject "mathematician Grigori Perelman." Choice C is incorrect because the plural verb "are being credited" doesn't agree in number with the singular subject "mathematician Grigori Perelman."

▼ 3.63 — D

Choice D is the best answer. The convention being tested is the use of verb forms within a sentence. The plural verb "help" provides the relative clause beginning with "that" with a finite verb and agrees in number with the plural subject "coiled branching structures."

Choice A is incorrect because the singular verb "has helped" doesn't agree in number with the plural subject "coiled branching structures." Choice B is incorrect because the singular verb "helps" doesn't agree in number with the plural subject "coiled branching structures." Choice C is incorrect because it results in an ungrammatical sentence. The nonfinite participle "helping" doesn't supply a finite verb to the relative clause beginning with "that."

▼ 3.64 — C

Choice C is the best answer. The subject of the sentence is "The African Games Co-production Market." That's one market, so it's a singular noun, which means it needs a singular verb. "Promotes" is the only singular verb among the choices.

Choice A is incorrect. This choice creates a subject-verb agreement error. The subject "The African Games Co-production Market" is singular, but the verb "promote" is plural. Choice B is incorrect. This choice creates a subject-verb agreement error. The subject "The African Games Co-production Market" is singular, but the verb "are promoting" is plural. Choice D is incorrect. This choice creates a subject-verb agreement error. The subject "The African Games Co-production Market" is singular, but the verb "have promoted" is plural.

▼ 3.65 — A

Choice A is the best answer. The convention being tested is subject-verb agreement. The plural verb "fascinate" agrees in number with the plural subject "musings."

Choice B is incorrect because the singular verb "has fascinated" doesn't agree in number with the plural subject "musings." Choice C is incorrect because the singular verb "fascinates" doesn't agree in number with the plural subject "musings." Choice D is incorrect because the singular verb "is fascinating" doesn't agree in number with the plural subject "musings."

▼ 3.66 — A

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle "including" is correctly used to form a supplementary element that interrupts the main clause "These extensive changes…reflected the poet's evolving literary perspective and experience of the US Civil War." This supplementary element, offset by commas after "changes" and "material," provides examples of the changes Whitman made to *Leaves of Grass*.

Choice B is incorrect because it results in an ungrammatical sentence. The finite modal verb "would include" can't be used in this way to form a supplementary element within the main clause. Choice C is incorrect because it results in an ungrammatical sentence. The finite past tense verb "included" can't be used in this way to form a supplementary element within the main clause. Choice D is incorrect because it results in an ungrammatical sentence. The finite present tense verb "include" can't be used in this way to form a supplementary element within the main clause.

Choice A is the best answer. The modifier "Based on events…by a king," is describing the drama "Rabinal Achí." Modifiers need to be next to the subjects they describe, so "Rabinal Achí" needs to be the first word after the comma.

Choice B is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. The modifier "Based on events…by a king," is describing the drama "Rabinal Achí." Modifiers need to be next to the subjects they describe, so "Rabinal Achí" needs to be the first word after the comma. Choice C is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. The modifier "Based on events…by a king," is describing the drama "Rabinal Achí." Modifiers need to be next to the subjects they describe, so "Rabinal Achí" needs to be the first word after the comma. Choice D is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. The modifier "Based on events…by a

king," is describing the drama "Rabinal Achí." Modifiers need to be next to the subjects they describe, so "Rabinal Achí" needs to be the first word after the comma.

▼ 3.68 — B

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "the HHI...market" the subject of the sentence and places it immediately after the modifying phrase "compared...market." In doing so, this choice clearly establishes that the HHI score of a less concentrated market—and not another noun in the sentence—is being compared with the HHI score of a highly concentrated market.

Choice A is incorrect because it results in a dangling modifier. The placement of "a market that is less concentrated" immediately after the modifying phrase illogically suggests that a market is being compared with an HHI score. Choice C is incorrect because it results in a confusing, illogical sentence. The placement of the modifier "when a market is less concentrated" after "a highly concentrated market" is contradictory. Furthermore, it's ambiguous what "its" is referring to in "its HHI score," resulting in an illogical comparison. Choice D is incorrect because it results in a dangling modifier. The placement of "a less concentrated market" immediately after the modifying phrase illogically suggests that a market is being compared with an HHI score.
